Storytelling with Data Cole Nussbaumer

Knaflitz, 2015-10-09 Don't simply show your

data—tell a story with it! *Storytelling with Data* teaches you the fundamentals of data visualization and how to communicate effectively with data.

You'll discover the power of storytelling and the way to make data a pivotal point in your story. The lessons in this illuminative text are grounded in theory, but made accessible through numerous real-world examples—ready for immediate application to your next graph or presentation. *Storytelling* is not an inherent skill, especially when it comes to data visualization, and the tools at our disposal don't make it any easier. This book demonstrates how to go beyond conventional

tools to reach the root of your data, and how to use your data to create an engaging, informative, compelling story. Specifically, you'll learn how to: Understand the importance of context and audience Determine the appropriate type of graph for your situation Recognize and eliminate the clutter clouding your information Direct your audience's attention to the most important parts of your data Think like a designer and utilize concepts of design in data visualization Leverage the power of storytelling to help your message resonate with your audience Together, the lessons in this book will help you turn your data into high impact visual stories that stick with your audience. Rid your world of ineffective graphs, one exploding 3D pie chart at a time. There is a story in your data—Storytelling with Data will give you the skills and power to tell it!

Cinematography Mailing List - High Definition - January 2001 to November 2004 Geoff

Boyle,2005-02-01 This book consists of edited conversations between DP's, Gaffer's, their crew and equipment suppliers. In common with the other CML books it doesn't have the same structure as a normal film reference book. It covers discussions on High Definition between Janaury 2001 and November 2004. The discussions have occasionally been edited for clarity and brevity. They will sometimes ramble a little but that's the nature of a conversation and some interesting information comes out in the process! Our aim is to promote the free exchange of ideas among fellow professionals, the cinematographer, their camera crew, manufacturer's, rental houses and related

businesses. Kodak, Arri, Aaton, Panavision, Otto Nemenz, Clairmont, Optex, VFG, Schneider, Tiffen, Fuji, Panasonic, Thomson, K5600, BandPro, Lighttools, Cooke, Plus8, SLF, Atlab Kinetta and Fujinon are among the companies represented.
