**Routledge Handbook of Environment and Society in Asia** Paul G. Harris,Graeme Lang,2014-09-19 Nowhere is the connection between society and the environment more evident and potentially more harmful for the future of the world than in Asia. In recent decades, rapid development of Asian countries with very large populations has led to an unprecedented increase in environmental problems such as air and water pollution, solid and hazardous wastes, deforestation, depletion of natural resources and extinction of native species. This handbook provides a comprehensive survey of the cultural, social and policy contexts of environmental change across East Asia. The team of international experts critically examine a wide range of environmental problems related to energy, climate change, air, land, water, fisheries, forests and wildlife. The editors conclude that, with nearly half of the human population of the planet, and several rapidly growing economies, most notably China, Asian societies will determine much of the future of human impacts on the regional and global environments. As climate change-related threats to society increase, the book strongly argues for increased environmental consciousness and action in Asian societies. This handbook is a very valuable companion for students, scholars, policy makers and researchers working on environmental issues in Asia.

**The Lung Circulation** Domingo M. Aviado,2013-10-22 The Lung Circulation, Volume 2: Pathologic Physiology and Therapy of Diseases considers the reactions of various

cardiovascular and bronchopulmonary drugs for certain lung-related diseases. This book is organized into three sections encompassing 15 chapters that also cover the etiology of acute cardiopulmonary diseases and chronic pulmonary hypertension. The first section reviews the benefits of five pulmonary treatment options, including musculotropic vasodilators and vasoconstrictors; general anesthetics and adjuvants; antitussives, expectorants, and antiallergens; Digitalis, glycosides, and quinidine; and medical and surgical procedures. The second section describes the pathologic physiology and pathogenesis of some acute cardiopulmonary diseases, such as acute injuries, systemic shock, acute pulmonary edema, pulmonary embolism, and other localized pulmonary diseases. The third section surveys numerous studies on the chronic pulmonary hypertension. This book is directed toward pulmonologists.
