**Project Hail Mary** Andy Weir,2022-10-04 #1 NEW YORK TIMES BESTSELLER • From the author of The Martian, a lone astronaut must save the earth from disaster in this “propulsive” (Entertainment Weekly), cinematic thriller full of suspense, humor, and fascinating science—in development as a major motion picture starring Ryan Gosling. HUGO AWARD FINALIST • ONE OF THE YEAR’S BEST BOOKS: Bill Gates, GatesNotes, New York Public Library, Parade, Newsweek, Polygon, Shelf Awareness, She Reads, Kirkus Reviews, Library Journal • “An epic story of redemption, discovery and cool speculative sci-fi.”—USA Today “If you loved The Martian, you’ll go crazy for Weir’s latest.”—The Washington Post Ryland Grace is the sole survivor on a desperate, last-chance mission—and if he fails, humanity and the earth itself will perish. Except that right now, he doesn’t know that. He can’t even remember his own name, let alone the nature of his assignment or how to complete it. All he knows is that he’s been asleep for a very, very long time. And he’s just been awakened to find himself millions of miles from home, with nothing but two corpses for company. His crewmates dead, his memories fuzzily returning, Ryland realizes that an impossible task now confronts him. Hurtling through space on this tiny ship, it’s up to him to puzzle out an impossible scientific mystery—and conquer an extinction-level threat to our species. And with the clock ticking down and the nearest human being light-years away, he’s got to do it all alone. Or does he? An irresistible interstellar adventure as only Andy Weir could deliver, Project Hail Mary is a tale of discovery, speculation, and survival to rival The Martian—while taking us to places it never dreamed of going.

*Teaching English Reading in the Chinese-Speaking World* Clay Williams,2016-04-07 This book investigates inherent, structural differences in the Chinese and English writing systems which predispose learners from childhood to develop specific literacy-learning strategies, which can impair later efforts at learning foreign language literacy if the foreign language script varies significantly from the native language script. It compares educational practices and philosophies in Chinese and English-speaking classrooms, and examines the psychological underpinnings of these literacy learning strategies. This book presents psychometric testing of adult reading strategy defaults and examines case study data, revealing that Chinese students are susceptible to misapplying Chinese character-level processing strategies to English word identification tasks, which decreases reading efficiency, and ultimately can lead to learning failure. Finally, a new educational framework is proposed for teaching beginning language-specific word identification and literacy-learning skills to learners whose first language script varies significantly from that of the target language.

**How to Do Nothing** Jenny Odell,2020-12-29 \*\* A New York Times Bestseller \*\* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY: Time • The New Yorker • NPR • GQ • Elle • Vulture • Fortune • Boing Boing • The Irish Times • The New York Public Library • The Brooklyn Public Library A complex, smart and ambitious book that at first reads like a self-help manual, then blossoms into a wide-ranging political manifesto.—Jonah Engel Bromwich, The New York Times Book Review One of President Barack Obama's Favorite Books of 2019 Porchlight's Personal Development & Human Behavior Book of the Year In a world where addictive technology is designed to buy and sell our attention, and our value is determined by our 24/7 data productivity, it can seem impossible to escape. But in this inspiring field guide to dropping out of the attention economy, artist and critic Jenny Odell shows us how we can still win back our lives. Odell sees our attention as the most precious—and overdrawn—resource we have. And we must actively and continuously choose how we use it. We might not spend it on things that capitalism has deemed important ... but once we can start paying a new kind of attention, she writes, we can undertake bolder forms of political action, reimagine humankind’s role in the environment, and arrive at more meaningful understandings of happiness and progress. Far from the simple anti-technology screed, or the back-to-nature meditation we read so often, How to do Nothing is an action plan for thinking outside of capitalist narratives of efficiency and techno-determinism. Provocative, timely, and utterly persuasive, this book will change how you see your place in our world.

**Introduction to Information Retrieval** Christopher D. Manning,Prabhakar Raghavan,Hinrich Schütze,2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

The Martian Andy Weir,2014-02-11 Nominated as one of America’s best-loved novels by PBS’s The Great American Read Six days ago, astronaut Mark Watney became one of the first people to walk on Mars. Now, he's sure he'll be the first person to die there. After a dust storm nearly kills him and forces his crew to evacuate while thinking him dead, Mark finds himself stranded and completely alone with no way to even signal Earth that he’s alive—and even if he could get word out, his supplies would be gone long before a rescue could arrive. Chances are, though, he won't have time to starve to death. The damaged machinery, unforgiving environment, or plain-old human error are much more likely to kill him first. But Mark isn't ready to give up yet. Drawing on his ingenuity, his engineering skills—and a relentless, dogged

refusal to quit—he steadfastly confronts one seemingly insurmountable obstacle after the next. Will his resourcefulness be enough to overcome the impossible odds against him?

**Lash-Up** Larry Bond,2015-05-05 New York Times bestselling author Larry Bond thrills again in Lash-Up, an explosive new novel. In a bid to dominate Asia and the western Pacific, China provokes a military crisis with the United States and then starts shooting down GPS satellites. America has only a short amount of time to devise some way of protecting its remaining satellites or China will gain an enormous advantage in the coming conflict. The only way the satellites can be protected is from orbit, so an armed spacecraft must be quickly designed, built, and launched to fight on this new battlefield. A team of soldier-scientists must construct a craft capable of knocking space weapons out of the sky. The fate of the United States rests on the shoulders of these determined people. **Kingdom of Characters (Pulitzer Prize Finalist)** Jing Tsu,2023-01-17 PULITZER PRIZE FINALIST A New York Times Notable Book of 2022 What does it take to reinvent a language? After a meteoric rise, China today is one of the world's most powerful nations. Just a century ago, it was a crumbling empire with literacy reserved for the elite few, as the world underwent a massive technological transformation that threatened to leave them behind. In Kingdom of Characters, Jing Tsu argues that China's most daunting challenge was a linguistic one: the century-long fight to make the formidable Chinese language accessible to the modern world of global trade and digital technology. Kingdom of Characters follows the bold innovators who reinvented the Chinese language, among them an exiled reformer who risked a death sentence to advocate for Mandarin as a national language, a Chinese-Muslim poet who laid the groundwork for Chairman Mao's phonetic writing system, and a computer engineer who devised input codes for Chinese characters on the lid of a teacup from the floor of a jail cell. Without their advances, China might never have become the dominating force we know today. With larger-than-life characters and an unexpected perspective on the major events of China's tumultuous twentieth century, Tsu reveals how language is both a technology to be perfected and a subtle, yet potent, power to be exercised and expanded.

**The Curry Guy** Dan Toombs,2017-05-04 Dan Toombs (aka The Curry Guy) has perfected the art of replicating British Indian Restaurant (BIR) cooking after travelling around the UK, sampling dishes, learning the curry house kitchen secrets and refining those recipes at home. In other words, Dan makes homemade curries that taste just like a takeaway from your favourite local but in less time and for less money. Dan has learnt through the comments left on his blog and social media feeds that people are terribly let down when they make a chicken korma or a prawn bhuna from other cookbooks and it taste nothing like the dish they experience when they visit a curry house... but they thank him for getting it right. The Curry Guy shows all BIR food lovers around the world how to make their favourite dishes at home. Each of the classic curry sauces are given, including tikka masala, korma, dopiazza, pasanda, madras, dhansak, rogan josh, vindaloo, karai, jalfrezi, bhuna and keema. Popular vegetable and sides dishes are there as accompaniments, aloo gobi, saag aloo and tarka dhal, plus samosas, pakoras, bhaji, and pickles, chutneys and raitas. Of course, no curry is complete without rice or naan. Dan shows you how to cook perfect pilau rice or soft pillowy naan every time.
