New Information Technology in Education David Hawkrige,2022-06-01 First published in 1983, New Information Technology in Education surveyed developments in the field of information technology and demonstrated how it

could be used to improve the quality of education. The book considered the experience of a wide range of countries, including the United States, Japan and those in Europe. While explaining the potential improvements that the new technology could bring, this book also reviewed the problem areas and helped educationalists to evaluate the relevance of the new technology for their own work. In an age of teaching via Zoom videos, it is interesting to take a look at a time when information technology in education was at its nascent stage. This book will be of interest to teachers and students of history, education, technology and pedagogy.
