Cyberphobia Edward Lucas, 2015-11-17 Cybercrime is increasingly in the news on both an individual and national level—from the stolen identities and personal information of millions of Americans to the infiltration of our national security networks allowing access to both economic and trade secrets. In *Cyberphobia*, Edward Lucas unpacks this shadowy but metastasizing problem confronting our security. The uncomfortable truth is that we do not take cybersecurity seriously enough. When it comes to the internet, it might as well be the Wild West. Standards of securing our computers and other internet-connected technology are diverse, but just like the rules of the road meant to protect both individual drivers and everyone else driving alongside them, weak cybersecurity on the computers and internet systems near us put everyone at risk. Lucas sounds a necessary alarm on behalf of cybersecurity and prescribes immediate and bold solutions to this grave threat.

Half Lost Sally Green, 2017-03-07 The magical, stunning conclusion to the internationally acclaimed *Half Bad* trilogy, the inspiration for the Netflix series *The Bastard Son & The Devil Himself* An enthralling fantasy in the Harry Potter tradition.—Time magazine on *Half Bad* The Alliance is

losing. Their most critical weapon, seventeen-year-old witch Nathan Brynn, has killed fifty-two people, and yet he's no closer to ending the tyrannical, abusive rule of the Council of Witches in England. Nor is Nathan any closer to his personal goal: getting revenge on Annalise, the girl he once loved, before she committed an unthinkable crime. There is an amulet, protected by the extremely powerful witch Ledger, which could be the tool Nathan needs to save himself and the Alliance. But the amulet is not so easily acquired. And lately Nathan has started to suffer from visions: a vision of a golden moment when he dies, and of an endless line of Hunters, impossible to overcome. Gabriel, his closest companion, encourages Nathan to run away with him, to start a peaceful life together. But even Gabriel's love may not be enough to save Nathan from this war, or from the person he has become. Set in modern-day Europe, the final book in the Half Bad trilogy is more than a story about witches. It's a heart-pounding visceral look at survival and exploitation, the nature of good and evil, and the risks we take for love. Now streaming on Netflix as *The Bastard Son & The Devil Himself*. Cover may vary.

Wild Goose Chase Terri Thayer, 2010-09-08 A computer techie by trade, Dewey Pellicano would rather swallow needles than be pinned down to a life of quilting. Agnostic-Ish Josh Buoy, 2016-04-09 This is a book about science, religion, and the world in between. I was born into a Christian family, but fell out of religion and in love with the scientific method. I had little need of faith, I thought, when science could tell me so much more about the world, and ask so little of me in return. But as I aged into young adulthood, a new chapter of my story began. Did I really know why I believed what I believed? How could I be so certain of my convictions when I hadn't even honestly considered the evidence? This book traces my journey through the furthest reaches of thought, a journey that took me through the realms of psychology, biology, physics, and belief. Could I find a place for faith in the modern world? Or was I right to cast it off as I did?

Smart Water Utilities Pernille Ingildsen, Gustaf Olsson, 2016-05-15 Today there is increasing pressure on the water infrastructure and although unsustainable water extraction and wastewater handling can continue for a while, at some point water needs to be managed in a way that is sustainable in the long-term. We need to handle water utilities “smarter”. New and effective tools and technologies are becoming available at an

affordable cost and these technologies are steadily changing water infrastructure options. The quality and robustness of sensors are increasing rapidly and their reliability makes the automatic handling of critical processes viable. Online and real-time control means safer and more effective operation. The combination of better sensors and new water treatment technologies is a strong enabler for decentralised and diversified water treatment. Plants can be run with a minimum of personnel attendance. In the future, thousands of sensors in the water utility cycle will handle all the complexity in an effective way. *Smart Water Utilities: Complexity Made Simple* provides a framework for Smart Water Utilities based on an M-A-D (Measurement-Analysis-Decision). This enables the organisation and implementation of “Smart” in a water utility by providing an overview of supporting technologies and methods. The book presents an introduction to methods and tools, providing a perspective of what can and could be achieved. It provides a toolbox for all water challenges and is essential reading for the Water Utility Manager, Engineer and Director and for Consultants, Designers and Researchers.

The Presentation of Self in Everyday Life Erving Goffman, 2021-09-29 A notable contribution to our understanding of ourselves. This book explores the realm of human behavior in social situations and the way that we appear to others. Dr. Goffman uses the metaphor of theatrical performance as a framework. Each person in everyday social intercourse presents himself and his activity to others, attempts to guide and control the impressions they form of him, and employs certain techniques in order to sustain his performance, just as an actor presents a character to an audience. The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions.

Supporting Users in Password Authentication with Persuasive Design Tobias Seitz, 2018-08-03 Activities like text-editing, watching movies, or managing personal finances are all accomplished with web-based solutions nowadays. The providers need to ensure security and privacy of user data. To that end, passwords are still the most common authentication method on the web. They are inexpensive and easy to implement. Users are largely accustomed to this kind of authentication but passwords represent a considerable nuisance, because they are tedious to create, remember, and maintain. In many cases, usability issues turn into security problems, because users try to work around the challenges and create easily predictable credentials. Often, they reuse their passwords for many purposes, which aggravates the risk of identity theft. There have been numerous attempts to remove the root of the problem and replace passwords, e.g., through biometrics. However, no other authentication strategy can fully replace them, so passwords will probably stay a go-to authentication method for the foreseeable future. Researchers and practitioners have thus aimed to improve users' situation in various ways. There are two main lines of research on helping users create both usable and secure passwords. On the one hand, password policies have a notable impact on password practices, because they enforce certain characteristics. However, enforcement reduces users' autonomy and often causes frustration if the requirements are poorly communicated or overly complex. On the other hand, user-centered designs have been proposed: Assistance and persuasion are typically more user-friendly but their influence is often limited. In this thesis, we explore potential reasons for the inefficacy of certain persuasion strategies. From the gained knowledge, we derive novel persuasive design elements to support users in password authentication. The exploration of contextual factors in password practices is based on four projects that reveal both psychological aspects and real-world constraints. Here, we investigate how mental models of password strength and password managers can provide important pointers towards the design of persuasive interventions. Moreover, the associations between personality traits and password practices are evaluated in three user studies. A meticulous audit of real-world password policies shows the constraints for selection and reuse practices. Based on the review of context factors, we then extend the design space of persuasive password support with three projects. We first depict the explicit and implicit user needs in password support. Second, we craft and evaluate a choice architecture that illustrates how a phenomenon from marketing psychology can provide new insights into the design of nudging strategies. Third, we tried to empower users to create memorable passwords with emojis. The results show the challenges and potentials of emoji-passwords on different platforms. Finally, the thesis presents a framework for the persuasive design of password support. It aims to structure the required activities during the entire process. This enables researchers and practitioners to craft novel systems that go beyond traditional paradigms, which is illustrated by a design exercise.
