Resilience in the Digital Age Fred S. Roberts, Igor A. Sheremet, 2021-02-19 The growth of a global digital economy has enabled rapid communication, instantaneous movement of funds, and availability of vast amounts of information. With this come challenges such as the vulnerability of digitalized sociotechnological systems (STSs) to destructive events (earthquakes, disease events, terrorist attacks). Similar issues arise for disruptions to complex linked natural and social systems (from changing climates, evolving urban environments, etc.). This book explores new approaches to the resilience of sociotechnological and natural-social systems in a digital world of big data, extraordinary computing capacity, and rapidly developing methods of Artificial Intelligence. Most of the book's papers were presented at the Workshop on Big Data and Systems Analysis held at the International Institute for Applied Systems Analysis in Laxenburg, Austria in February, 2020. Their authors are associated with the Task Group "Advanced mathematical tools for data-driven applied systems analysis" created and sponsored by CODATA in November, 2018. The world-wide COVID-19 pandemic illustrates the vulnerability of our healthcare systems, supply chains, and social infrastructure, and confronts our notions of what makes a system resilient. We have found that use of AI tools can lead to problems when unexpected events occur. On the other hand, the vast amounts of data available from sensors, satellite images, social media, etc. can also be used to make modern systems more resilient. Papers in the

book explore disruptions of complex networks and algorithms that minimize departure from a previous state after a disruption; introduce a multigrammatical framework for the technological and resource bases of today's large-scale industrial systems and the transformations resulting from disruptive events; and explain how robotics can enhance pre-emptive measures or post-disaster responses to increase resiliency. Other papers explore current directions in data processing and handling and principles of FAIRness in data; how the availability of large amounts of data can aid in the development of resilient STSs and challenges to overcome in doing so. The book also addresses interactions between humans and built environments, focusing on how AI can inform today's smart and connected buildings and make them resilient, and how AI tools can increase resilience to misinformation and its dissemination.

Why the Germans Do It Better John Kampfner, 2021-06
Emerging from a collection of city states 150 years ago, no other country has had as turbulent a history as Germany or enjoyed so much prosperity in such a short time frame. Today, as much of the world succumbs to authoritarianism and democracy is undermined from its heart, Germany stands as a bulwark for decency and stability. Mixing personal journey and anecdote with compelling empirical evidence, this is a critical and entertaining exploration of the country many in the West still love to hate. Raising important questions for our post-Brexit landscape, Kampfner asks why, despite its faults, Germany has become a model for others to emulate, while Britain fails to tackle contemporary challenges. Part memoir, part history, part travelogue, Why the Germans Do It Better is a rich and witty portrait of an eternally fascinating country.

How to Lose the Information War Nina

Jankowicz,2020-06-11 Since the start of the Trump era, the United States and the Western world has finally begun to wake up to the threat of online warfare and the attacks from Russia, who flood social media with disinformation, and circulate false and misleading information to fuel fake narratives and make the case for illegal warfare. The question no one seems to be able to answer is: what can the West do about it? Central and Eastern European states, including Ukraine and Poland, however, have been aware of the threat for years. Nina Jankowicz has advised these governments on the front lines of the information war. The lessons she learnt from that fight, and from her attempts to get US congress to act, make for essential reading. How to Lose the Information War takes the reader on a journey through five Western governments' responses to Russian information warfare tactics - all of which have failed. She journeys into the campaigns the Russian operatives run, and shows how we can better understand the motivations behind these attacks and how to beat them. Above all, this book shows what is at stake: the future of civil discourse and democracy, and the value of truth itself.

The Man Who Ran Washington Peter Baker,Susan Glasser,2021-09-07 BEST BOOK OF THE YEAR: The New York Times • The Washington Post • Fortune • Bloomberg From two of America's most revered political journalists comes the definitive biography of legendary White House chief of staff and secretary of state James A. Baker III: the man who ran Washington when Washington ran the world. For a quarter century, from the end of Watergate to the aftermath of the Cold War, no Republican won the presidency or ran the White House without the advice of James Addison Baker III. A scion of Texas aristocracy who became George H. W. Bush's tennis partner, Baker had never worked in Washington until a devastating family

tragedy struck when he was thirty-nine. Within a few years, he was leading Gerald Ford's campaign and would go on to manage a total of five presidential races and win a sixth for George W. Bush in a Florida recount. He ran Ronald Reagan's White House and became the most consequential secretary of state since Henry Kissinger. Ruthlessly partisan during campaign season, Baker became an indispensable dealmaker after the election. He negotiated with Democrats at home and Soviets abroad, rewrote the tax code, assembled the coalition that won the Gulf War, brokered the reunification of Germany, and helped bring a decades-long nuclear superpower standoff to an end. Brilliantly crafted by Peter Baker of The New York Times and Susan Glasser of The New Yorker, *The Man Who Ran Washington* is a page-turning study in the acquisition, exercise, and preservation of power in late twentieth-century America and the story of Washington when Washington ran the world. Their masterly biography is necessary reading and destined to become a classic.

Defining Collage in the Twenty-first Century

Christiane zu Salm, Cornelius Borck, Uta Grundmann, 2012
In contemporary art, the collage technique has been experiencing a renaissance with artists finding new ways to use collage; they might adopt the classical approach - glueing, overpainting and alienating existing images - but they also draw on new, comput

World in Danger Wolfgang Ischinger, 2020-11-10
A vision of a European future of peace and stability despite the present gloom The world appears to be at another major turning point. Tensions between the United States and China threaten a resumption of great power conflict. Global institutions are being tested as never before, and hard-edged nationalism has resurfaced as a major force in both democracies and authoritarian states. From the

European perspective, the United States appears to be abdicating its global leadership role. Meanwhile, Moscow and Beijing eagerly exploit every opportunity to pit European partners against one another. But a pivot point also offers the continent an opportunity to grow stronger. In *World in Danger*, Wolfgang Ischinger, Germany's most prominent diplomat, offers a vision of a European future of peace and stability. Ischinger examines the root causes of the current conflicts and suggests how Europe can successfully address the most urgent challenges facing the continent. The European Union, he suggests, is poised to become a more powerful actor on the world stage, able to shape global politics while defending the interests of its 500 million citizens. This important book offers a practical vision of a Europe fully capable of navigating these turbulent times.

The Seventeenth Century Sir George Norman Clark, 1972

Horst Ademeit: Secret Universe Horst Ademeit, 2011
Horst Ademeit documented the presence of 'cold rays', unseen negative forces, for almost 20 years (1989–2007). The inventory he accumulated and added to almost every day during this period was his attempt to study them: thousands of Polaroid and digital photographs, several leporello notebooks full of meticulously logged data and around 3,000 small spheres made of various kinds of wood. At the beginning of each day he also produced a 'Tagesbild' (picture of the day), numbered images of newspapers, groceries and measuring instruments arranged on the kitchen table, which were intended to record the respective cold ray exposure. English and German text.
