Research Challenges in Information Science:

Information Science and the Connected World Selmin

Nurcan,Andreas L. Opdahl,Haralambos Mouratidis,Aggeliki

Tsohou,2023-05-22 This book constitutes the proceedings of the

17th International Conference on Research Challenges in

Information Sciences, RCIS 2023, which took place in Corfu,

Greece, during May 23-26, 2023. It focused on the special theme

Information Science and the Connected World. The scope of RCIS

is summarized by the thematic areas of information systems and

their engineering; user-oriented approaches; data and

information management; business process management; domain-

specific information systems engineering; data science;

information infrastructures, and reflective research and practice.

The 28 full papers presented in this volume were carefully

reviewed and selected from a total of 87 submissions. The book

also includes 15 Forum papers and 6 Doctoral Consortium papers.

The contributions were organized in topical sections named:

Requirements; conceptual modeling and ontologies; machine

learning and analytics; conceptual modeling and semantic

networks; business process design and computing in the

continuum; requirements and evaluation; monitoring and

recommending; business process analysis and improvement; user

interface and experience; forum papers; doctoral consortium papers. Two-page abstracts of the tutorials can be found in the back matter of the volume.

New Business and Regulatory Strategies in the Postal Sector
Pier Luigi Parcu,Timothy J. Brennan,Victor Glass,2019-02-13 This book addresses major issues facing postal and delivery services throughout the world. Worldwide, there is currently a considerable amount of interest in postal and delivery economics. The industry is reacting to a state of near crisis and is implementing different drastic changes. The European Commission and member States are still wrestling with the problem of how to implement entry liberalization into postal markets, how to address digital competition, and how to maintain the universal service obligation (USO). The Postal Accountability and Enhancement Act of 2006 in the U.S. has perhaps created and exacerbated the problems faced by USPS. Digitalisation, technological development and online platforms are strongly affecting both the way postal and delivery operators are managing their services as well as their role on the market. Strong emphasis was attributed to the assets of Postal Operators (POs) and their added value in the digital age as well as on new business strategies. This volume presents original essays by prominent researchers in the field, selected and edited from

papers presented at this year's 26th Conference on Postal and Delivery Economics held in Split, Croatia, from May 30- June 2, 2018. Topics addressed by this volume include quality of service, last mile solutions, and competition in the liberalized market. This book will be a useful tool not only for graduate students and professors, but also for postal administrations, consulting firms, and federal government departments.
