A Passion for Mathematics Clifford A. Pickover,2011-02-25 *A Passion for Mathematics* is an educational, entertaining trip through the curiosities of the math world, blending an eclectic mix of history, biography, philosophy, number theory, geometry, probability, huge numbers, and mind-bending problems into a delightfully compelling collection that is sure to please math buffs, students, and experienced mathematicians alike. In each chapter, Clifford Pickover provides factoids, anecdotes, definitions, quotations, and captivating challenges that range from fun, quirky puzzles to insanely difficult problems. Readers will encounter mad mathematicians, strange number sequences, obstinate numbers, curious constants, magic squares, fractal geese, monkeys typing Hamlet, infinity, and much, much more. *A Passion for Mathematics* will feed readers' fascination while giving them problem-solving skills a great workout!

Molecular Basis of Resilience Patrick L. Iversen,2019-01-05 This book illuminates mechanisms of resilience. Threats and defense systems lead to adaptive changes in gene expression. Environmental conditions may dampen adaptive responses at the level of RNA expression. The first seven chapters elaborate threats to human health. Human populations spontaneously invade niche boundaries exposing us to threats that drive the resilience process.

Emerging RNA viruses are a significant threat to human health. Antiviral drugs are reviewed and how viral genomes respond to the environment driving genome sequence plasticity. Limitations in predicting the human outcome are described in “nonlinear anomalies.” An example includes medical countermeasures for Ebola and Marburg viruses under the “Animal Rule.” Bacterial infections and a review of antibacterial drugs and bacterial resilience mediated by horizontal gene transfer follow. Chapter 6 shifts focus to cancer and discovery of novel therapeutics for leukemia. The spontaneous resolution of AML in children with Down syndrome highlights human resilience. Chapter 7 explores chemicals in the environment. Examples of chemical carcinogenesis illustrate how chemicals disrupt genomes. Historic research ignored RNA damage from chemically induced nucleic acid damage. The emergence of important forms of RNA and their possible role in resilience is proposed. Chapters 8-10 discuss threat recognition and defense systems responding to improve resilience. Chapter 8 describes the immune response as a threat recognition system and response via diverse RNA expression. Oligonucleotides designed to suppress specific RNA to manipulate the immune response including exon-skipping strategies are described. Threat recognition and response by the cytochrome P450 enzymes parallels immune responses. The author proposes metabolic clearance of small molecules is a companion to the immune system. Chapter 10 highlights RNA diversity expressed from a single gene. Molecular Resilience lists paths to RNA transcriptome plasticity forms

the molecular basis for resilience. Chapter 11 is an account of ExonDys 51, an approved drug for the treatment of Duchenne muscular dystrophy. Chapter 12 addresses the question "what informs molecular mechanisms of resilience?" that drives the limits to adaptation and boundaries for molecular resilience. He speculates that radical oxygen, epigenetic modifications, and ligands to nuclear hormone receptors play critical roles in regulating molecular resilience.

The Study of Games Elliott Morton Avedon, Brian Sutton-Smith, Paul G. Brewster, 2015-01-27 The authors, Elliott Morton Avedon and Brian Sutton-Smith are recognized authorities on the study of games. Elliott Morton Avedon was born on 28 April 1930 in Florida. He is the author of Therapeutic Recreation Service: An Applied Behavioural Approach. Brian Sutton-Smith was born in Wellington, New Zealand in 1924. His academic career is focused on children's games, adult games, children's play, children's drama, films and narratives, as well as children's gender issues and sibling position. Brian Sutton-Smith is the author of some 50 books, the most recent of which is The Ambiguity of Play, and some 350 scholarly articles. He has been the President of The Anthropological Association for the Study of Play and of The American Psychological Association, Division g10 (Psychology and the Arts). As a founder of the Children's Folklore Society he has received a Lifetime Achievement Award from the American Folklore Society.

Strategic Alliances, Mergers and Acquisitions J. M. Ulijn, Geert

Duysters, Elise Meijer, 2010-01-01 Organizational flirts and marriages alliances, mergers and acquisitions are dramatic examples of how soft cultures can produce hard facts of success or failure. Decisions born from human vanity can lead to destruction of human capital. The chapters selected by Ulijn, Duysters and Meijer illustrate the many facets of organizational family life for the scholar and, hopefully, for the decision-maker who considers another move. Geert Hofstede, author of *Culture's Consequences* This unique book focuses on the link between different types of culture (national, corporate, professional) and the success of strategic alliances, mergers and acquisitions. Over the past decades we have seen a significant increase in the number of strategic alliances, mergers and acquisitions. Despite this proliferation many recent studies have reported high failure rates. This failure is often attributed to cultural differences between partners, which has led to a growing body of literature on the subject. To date, most of these studies have focused on national and corporate culture, whereas this book also places particular emphasis on the importance of culture at the professional level. The authors clearly show that all three levels of culture may have a profound impact upon the ultimate success or failure of alliances, mergers and acquisitions. Researchers in the field of international business, strategic management, and strategic alliances, mergers and acquisitions will find this book to be of invaluable interest. Managers in multinational corporations and international business students should also not be without

this important resource.

Handbook of Relativistic Quantum Chemistry Wenjian Liu, 2016-06-15 This handbook covers new methodological developments and applications of relativistic quantum chemistry. It also pays attention to the foundation of relativistic quantum mechanics and addresses a number of fundamental issues that have not been covered by any book. For instance, what is the appropriate relativistic many-electron Hamiltonian? How to do relativistic explicit/local correlation? How to formulate relativistic properties? How to combine double-group and time-reversal symmetries? How to do QED calculations for molecules? Just to name a few. This book aims to establish the big picture of relativistic molecular quantum mechanics, ranging from pedagogic introduction for uninitiated readers, advanced methodologies and efficient algorithms for experts, to possible future perspectives, such that the reader knows when/how to apply/develop the methodologies. This self-contained two-volume book can be regarded as a supplement to the three-volume Handbook of Computational Chemistry, which contains no relativity at all. It is to be composed of 6 sections with different chapters (will be further expanded), each of which is to be written by the most active experts, who will be invited upon approval of this proposal.

Knowing and Teaching Elementary Mathematics Liping Ma, 2010-03-26 Studies of teachers in the U.S. often document insufficient subject matter knowledge in mathematics. Yet, these studies give few examples of the knowledge teachers

need to support teaching, particularly the kind of teaching demanded by recent reforms in mathematics education. *Knowing and Teaching Elementary Mathematics* describes the nature and development of the knowledge that elementary teachers need to become accomplished mathematics teachers, and suggests why such knowledge seems more common in China than in the United States, despite the fact that Chinese teachers have less formal education than their U.S. counterparts. The anniversary edition of this bestselling volume includes the original studies that compare U.S and Chinese elementary school teachers' mathematical understanding and offers a powerful framework for grasping the mathematical content necessary to understand and develop the thinking of school children. Highlighting notable changes in the field and the author's work, this new edition includes an updated preface, introduction, and key journal articles that frame and contextualize this seminal work.

West African Masking Traditions and Diaspora Masquerade Carnivals Raphael Chijioke Njoku, 2020-06-23 A revisionist account of African masquerade carnivals in transnational context that offers readers a unique perspective on the connecting threads between African cultural trends and African American cultural artifacts

The Individualized Corporation Sumantra Ghoshal, Christopher A. Bartlett, 1999-01-27 Based on six years of research and hundreds of interviews with managers at every level of companies such as Intel, ABB, Canon, 3M, and McKinsey, The Individualized Corporation explores the collapse of an outmoded corporate form and reveals the emergence of a fundamentally different management philosophy--one that forces on the power of the individual as the driver of value creation in the company and the importance of individuality in management. The image of the Organization Man as a cog in a corporate machine has become both dated and dangerous. Rather than try to force employees into a homogeneous corporate mold based on a company's strategy, structure, and system, world-renowned scholars and consultants Sumantra Ghoshal and Christopher Bartlett argue that managers must embrace a philosophy based on purpose, process, and people that focuses on developing and leveraging the individual's unique talents and skills--a company's most important source of competitive advantage. Without proposing a universal solution or a quick-fix prescription, this important book provides an

indispensable guide for those who must lead their companies into the next century.

I Catch Killers Gary Jubelin, 2020-08-01 THE #1 TRUE CRIME BESTSELLER.

Serial killings, child abductions, organised crime hits and domestic murders. This is the memoir of a homicide detective. WINNER OF 2021 DANGER PRIZE FOR NON-FICTION Here I am: tall and broad, shaved head, had my nose broken three times fighting. Black suit, white shirt, the big city homicide detective. I've led investigations into serial killings, child abductions, organised crime hits and domestic murders. But beneath the suit, I've got an Om symbol in the shape of a Buddha tattooed on my right bicep. It balances the tattoo on my left ribs: Better to die on your feet than live on your knees. That's how I choose to live my life. As a cop, I got paid to catch killers and I learned what doing it can cost you. It cost me marriages and friendships. It cost me my reputation. They tell you not to let a case get personal, but I think it has to. Each one has taken a piece out of me and added a piece,

until there's only pieces. I catch killers - it's what I do. It's who I am. Gary Jubelin was one of Australia's most celebrated detectives, leading investigations into the disappearance of preschooler William Tyrrell, the serial killing of three Aboriginal children in Bowraville and the brutal gangland murder of Terry Falconer. During his 34-year career, Detective Chief Inspector Jubelin also ran the crime scene following the Lindt Cafe siege, investigated the death of Caroline Byrne and recovered the body of Matthew Leveson. Jubelin retired from the force in 2019. This is his story.

Hypothalamic-Pituitary Diseases Felipe F. Casanueva, Ezio Ghigo, 2018-04-13
This book presents the state of the art in the pathophysiology, diagnosis, and therapy of hypothalamic and pituitary disorders. After an introduction devoted to the physiology of the neuroendocrine control of the hypothalamic-pituitary unit, the diverse disorders involving hormonal excess or deficiency are systematically addressed axis by axis. For each disorder, pathophysiology, clinical presentation, and management are discussed in detail. In addition, individual chapters focus on the neuroendocrinology of energy homeostasis and of bone metabolism, metabolic derangement secondary to pituitary dysfunction, and pituitary control of the endocrine pancreas. While the focus of the book is predominantly on pathophysiological and clinical aspects, due attention is also devoted to potential diagnostic and therapeutic innovations. The book is intended as a major reference for endocrinologists and basic and clinical scientists.
