The English of Tourism Georgeta Rață,2013-01-03 The English of Tourism is a collection of essays on the English specific to the Tourism Industry. The approach is a linguistic one: the different aspects of the English used in the field of tourism (tourism industry, types of tourism, travel agencies, Internet sites of travel agencies, eco-tourism, travel) and in tourism-related fields (accommodation, advertising, entertainment, food services, hospitality, transportation) are analysed from a morphological (combination, derivation), syntactical (nominal phrases, verbal phrases), lexical and lexicographical, semantic (homonymy, semantic fields, synonymy, terminology), pragmatic (academic discourse, idiom, metaphor), etymological (etymon, Latin heritage), and contrastive (Croatian-Romanian, English-Croatian, English-Romanian, French-English, Romanian-English) points of view. This book will appeal to people employed in industries including hotels, transportation, events, food and beverage, parks and recreation, as well as to professors, researchers, students, and translators from Croatian-, English-, French-, and Romanian-speaking countries, active in their own countries or abroad. The types of academic readership it will appeal to include: academic teaching staff, researchers and students in the field of tourism, of tourism-related fields - accommodation, advertising, entertainment, food services, hospitality, and transportation - and of languages.

Kyrgyzstan Laurence Mitchell,2008 Following the break-up of the USSR, Kyrgyzstan soon earned a reputation as the most hospitable and least repressive of the newly emerged central Asian republics. Unlike some of its neighbours, it has actively encouraged foreign tourism and has pursued a policy of supporting community projects with an emphasis on adventure tourism. The Bradt guide details all the services and experiences the country offers including trekking, mountaineering, horseriding and wildlife-watching. Historical sites, cultural activities and background on the Kyrgystan people are all covered by this definitive guide.

**TREKKING GUIDE** ERIC EH BUDDHADHARMA,2015-11-13 People with a determined mind and physical fitness, should trek at high altitude sometime in their life. Trekking is one grade difficult to walking in the hilly terrains and one grade easier than negotiating the mountain passes. Whatever it may be, trekking seem to be a simple adventure sport, but many a times it turns out to be hazardous and life threatening. From the time, you finish your breakfast and leave the hamlet to start the trek, until the time you return back to the same spot or to any other rest house; you are always at a risk of injury, threat to your life, or at least in a situation of SOS. I have trekked at high altitudes in India and Nepal with my children, aged 4 1/2, and 8 1/2 year olds. They did not take a piggyback to the base camps but trekked at 9000, 13000 and 19000 ft altitudes themselves along with us and other trekkers en-routes. Taking such small children at high altitudes were extremely risky and against the views of most trekkers and even our family elders. We do love our children and we are concerned about their safety. It is only a good planning and a careful strategy each time you start your trek, that keeps you safe and accident free. In order to ensure almost 100% safety, my wife and I read several books on trekking, before starting out on our first trek in the Nepal Himalayas; unfortunately many vital information were lacking on safety in all these books. Myself

being in fitness since childhood, decided to jot down points that were necessary for a good and safe trek. This was necessary for us to come back home safe and sound after enjoying over a fortnight of bone breaking arduous journeys in the mountain trails of Indian as well as Nepal Himalayas, with a baby and a child, both of whom walked steadily, keeping pace with adult trekkers in the trail. When you leave home until you are back with the experience of trekking, you are prone to many hazards, in the journey as well as in the trails. To ensure that you are safe and well equipped with all the necessities, the same way your grandma or your mom would like you to be in, you need to read this book and carry it along when you start your journey the next time you plan a trek. This small guidebook has endless valuable information which many people and books on trekking, unfortunately, do not provide you with. This is why it is called "God's guide to safe trekking", meaning the advice and suggestions here are genuine and sincere which only the Almighty God could provide in such instances, for your safety. The advice in this book is non-commercial and non-biased, not seeking to advertise any specific product or service. This little book on safe trekking is handy and your friend in need. During your trek, you may go through it every evening, while you relax in one of those hamlets in the trails, tucked in your sleeping bag, against the quiet flowing streams and the crackling sound of the candles. Have a pleasant and safe trek now and always, God bless you!

Ecosystem and Species Habitat Modeling for Conservation and Restoration Shalini Dhyani, Dibyendu Adhikari, Rajarshi Dasgupta, Rakesh Kadaverugu, 2023-05-02 This edited book is focused on SDG 15. This volume covers aspects of species and ecosystem modeling in understanding the complexity of ecological systems, restoration, protected area management, and species conservation. The book follows a systematic and situation-sensitive approach to discuss ecosystem and species modeling tools, approaches, science, case studies, opportunities, and gaps for enhancing conservation efforts, ensuring ecosystem resilience, and addressing sustainability issues. The book emphasizes on science, innovations, case studies, and strategic relevance as main pillars of using ecosystem and species modeling tools and implementing the outcomes and results. In addition, clear conceptual frameworks, elaborated methodologies, and their applications are included to support policy planning and interventions to reduce and reverse human encroachment in human-dominated natural ecosystems, their degradation, and loss of important species and ecosystem services. Essential information with a special focus on advances and opportunities in advancing the implementation of results and outputs of the modeling tools, challenges and constraints for addressing loss of ecosystem services, designing and implementing sustainable landscape restoration, environmental risk assessment, and finally understanding policy implications and concerns for mainstreaming modeling results in conservation planning and decision-making is included in the book. Further topics include ultimate translational value of modeling tools and efforts across transitional ecosystems and species habitat to provide better evidence to influence the nature-based solutions (NbS) and ecosystem health assessment using Red List of Ecosystems (RLE). The emerging roles of integrative socio-ecological as well as techno-cultural factors in promoting the relevance of ecosystem and species modeling is one of the key features of this book. This edited volume is of interest and useful to researchers, students, scholars, policy makers, forest managers, consultants, and policy makers in the fields of protected area management, forest department, conservation, modeling, climate change, and sustainability science, and also authors engaged in IPBES, IPCC, and several other assessments.

Tibet Michael Buckley, 2018-07-05 This new, thoroughly updated edition of Bradt's Tibet encompasses the wider region of ethnic Tibet with more detailed coverage of the Amdo and Kham regions than is found in other guides. It also includes essential information on new border openings and is particularly strong on map data, which is extremely difficult to find in Tibet itself, including new theme maps covering a range of topics, from Tibetan regions to the Three Parallel Rivers UN World Heritage Sites, sacred landscapes, permafrost and major river sources. Bradt's Tibet benefits from years of consistent research. Michael Buckley has been visiting and researching Tibet for more than 30 years and has a raft of books to his name. Thanks to his knowledge and expertise, Bradt's Tibet offers a more extensive language appendix than is found in other guidebooks, plus essential guidelines on cultural etiquette (including a special section on hand gestures to use), local customs and travelling with minimum impact on Tibet's culture and environment. There is also an appendix on fauna and an extensive list of recommended further resources, including books, music, films and even virtual reality. Exploring ethnic Tibet independently is a challenge. The 'land of snows' possesses the world's highest peaks (including Everest) and its deepest gorges as well as some of the wildest and roughest road routes in high Asia. Bradt's Tibet provides all the practical information you need to explore ethnic Tibet independently, whether motoring, mountain-biking or trekking. Tibet has always fascinated travellers and armchair travellers because it is so difficult to access due to its remoteness and extreme altitude. Now, under Chinese rule, Tibet is a sensitive destination for Westerners. Visitors need all the information that they can lay their hands on and this guidebook provides plenty. With flight routes and rail access to Tibet expanding, and new border crossings opening, Michael Buckley and Bradt's Tibet provide all of the information you need to make the most of a trip.

*Citizen Aid and Everyday Humanitarianism* Anne Meike Fechter, Anke Schwittay, 2021-05-13

*Citizen Aid and Everyday Humanitarianism* brings together, under the umbrella terms of citizen aid and grassroots humanitarianism, interdisciplinary research on small-scale, privately-funded forms of aid that operate on the margins of the official development sector. The last decade has seen a steady rise of such activities in the Global South and North, such as in response to the influx of refugees into Europe. The chapters in this volume cover a variety of locations in Asia, Africa and Europe, presenting empirically grounded cases of citizen aid. They range from educational development projects, to post-disaster emergency relief. Importantly, while some activities are initiated by Northern citizens, others are based on South-South assistance, such as Bangladeshi nationals supporting Rohingya refugees, and peer support in the Philippines in the aftermath of typhoon Haiyan. Together, the contributions consider citizen aid vis-à-vis more institutionalised forms of aid, review methodological approaches and their challenges and query the political dimensions of these initiatives. Key themes are historical perspectives on 'demotic humanitarianism', questions of legitimacy and professionalisation, founders' motivations, the role of personal connections, and the importance of digital media for brokerage and fundraising. Being mindful of the power imbalances inherent in citizen aid and everyday humanitarianism, they suggest that both deserve more systematic attention. *Citizen Aid and Everyday Humanitarianism* will be of great interest to scholars and professionals working in international development, humanitarianism, international aid and anthropology. The chapters were originally published as a special issue of *Third World Quarterly*.
