Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition Dina Di Giacomo, Pierpaolo Vittorini, Pilar Lacasa, 2019-03-01 Recently, technology and aging have been key research areas in human cognition. The Research Topic “Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition” investigated technology's impact on cognitive and intellectual processes, highlighting how intensively technology can change and/or enhance the cognitive functioning throughout one's lifespan. The aim of this Research Topic was to provide an outlook through multidisciplinary research and development while addressing the dynamic intersection of cognition, mind, and technology. Our scope was 1) to favor the cognitive technology debate, 2) to overcome the dichotomies of technology and psychology, 3) to emphasize the advances in knowledge and well-being. This Research Topic comprises review studies and original articles, focused on digital skills that enhance human potential. Transversal approaches and cross-sectorial analysis were encouraged, leading to investigation areas related to cognitive and mental processing—in educational, rehabilitation, clinical settings—across aging. Articles of high relevance to the Research Topic were submitted on the subjects of a) research in human performance and human factors, b) new research and technologies addressing the needs of a growing populace, and c) cognitive aging and cognitive rehabilitation research.

The Sixth Station Linda Stasi, 2013-12-01 Some say Demiel ben Yusef is the world's most dangerous terrorist, personally responsible for bombings and riots that have claimed the lives of thousands. Others insist he is a man of peace, a miracle worker, and possibly even the Son of God. His trial in New York City for crimes against humanity attracts scores of protestors, as well as media

and religious leaders from around the world. Cynical reporter Alessandra Russo heads to the UN hoping for a piece of the action, but soon becomes entangled in controversy and suspicion when ben Yusef singles her out for attention among all other reporters. As Alessandra begins digging into ben Yusef's past, she is already in more danger than she knows—and when she is falsely accused of murder during her investigation, she is forced to flee New York. On the run from unknown enemies, Alessandra finds herself on the trail of a global conspiracy and a story that could shake the world to its foundations. Is Demiel ben Yusef the Second Coming or the Antichrist? The truth may lie in the secret history of the Holy Family, a group of Templars who defied the church, and a mysterious relic stained with the sacred blood of Christ Himself.

**Apocalypse** Jacques Ellul, 2020-05-05 “There has never been a book provoking more delirium, foolishness and irrational movements, without any relationship to Jesus Christ [than the Book of Revelation].” —Jacques Ellul, Introduction Known for his trenchant critique of modernity and of those Christians who celebrate their captivity to it, Ellul here cuts to the heart of the theological intention of the Book of Revelation, and thereby reveals the liberating gospel in all its offensiveness. Neither an exhaustive commentary nor a work of historical-exegetical analysis, *Apocalypse* is a provocative, independent interpretation. Ellul seeks to rescue Revelation from the reassuring and orthodox banality to which commentators often reduce it. The goal is to perceive the totality of the book in its movement and structure. “Architecture in movement” is the key to understanding Revelation’s puzzling but simple message. This edition also comes with a new foreword by Jacob Marques Rollison who provides an essential aid for guiding readers through Ellul’s thorough engagement with Revelation.

*Archeologia e Calcolatori*, 30, 2019 Marco Arizza, Valeria Boi, Alessandra Caravale, Augusto Palombini, Alessandra Piergrossi, 2019-11-28 Il volume 30 di «Archeologia e Calcolatori» si apre con un inserto speciale, dedicato al trentennale della rivista. Alle introduzioni di F. Djindjian e di P. Moscati, che delineano un quadro dell'informatica archeologica nel suo divenire, seguono gli articoli dei membri del Comitato di Redazione, a testimoniare l'attività di ricerca e di sperimentazione che ha caratterizzato il cammino editoriale della rivista, e il contributo di una giovane laureata dell'Università Bocconi, che ha lavorato a stretto contatto con il team di «Archeologia e Calcolatori». Nella parte centrale sono pubblicati gli articoli proposti annualmente dagli autori. Ne emerge un quadro che rappresenta gli aspetti applicativi più qualificanti dell'informatica archeologica (le banche dati, i GIS, le analisi statistiche, i sistemi multimediali), ma che guarda oggi con sempre maggiore interesse agli strumenti di visualizzazione scientifica e di comunicazione delle conoscenze. Il volume si chiude con gli Atti del XII Workshop ArcheoFOSS (Free, Libre and Open Source Software e Open Format nei processi di ricerca archeologica), un'iniziativa lodevole, nata nel 2006, cui si è più volte dato spazio

nelle pagine della rivista.

**PAD #13** Marina Parente, Carla Sedini, 2017-01-10 The issue, edited by Marina Parente and Carla Sedini, founder of D4T - Design for Territories Research Network of Politecnico di Milano, aims to contribute to this new field of study helping readers understand the design-led phenomenon, which involves the tangible resources of a territory (like monumental and landscape heritage) as well as the intangible ones (like cultural identity and people values). The main topic of this issue is: How could the design develop the local dimension enhancing and revitalizing the territory at the same time? Furthermore, with issue #13 we are opening a series with artists' images that will match the articles with a visual research connected to the proposed subject. Photographer Carla Sedini, co-editor with Marina Parente of this issue, gave us permission to publish a selection of images about "design that is not there", "design that may be" and "tacit design" within urban territories around the world. We hope that many creatives will interpret the "Suggestions for Design" launched here. The numerous contributors to this issue are: Miriam Bicocca; Letizia Bollini; Marco Borsotti & Sonia Pistidda; Raffaella Fagnoni & Silvia Pericu; Davide Fassi, Laura Galluzzo & Anna Linda De Rosa; Rosanna Gaddi; Helena Gentili & Daria Casciani; José Luis González Cabrero, Ana Margarita Avila Ochoa, Ana Calvera, Debora

**Handbook of the Economics of Art and Culture** ,2013-09-16 This volume emphasizes the economic aspects of art and culture, a relatively new field that poses inherent problems for economics, with its quantitative concepts and tools. Building bridges across disciplines such as management, art history, art philosophy, sociology, and law, editors Victor Ginsburgh and David Throsby assemble chapters that yield new perspectives on the supply and demand for artistic services, the contribution of the arts sector to the economy, and the roles that public policies play. With its focus on culture rather than the arts, Ginsburgh and Throsby bring new clarity and definition to this rapidly growing area. Presents coherent summaries of major research in art and culture, a field that is inherently difficult to characterize with finance tools and concepts Offers a rigorous description that avoids common problems associated with art and culture scholarship Makes details about the economics of art and culture accessible to scholars in fields outside economics

**History of the Italian Agricultural Landscape** Emilio Sereni,2014-07-14 Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems.

History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, *The Original Characteristics of French Rural History*. Sereni invented the concept of the historical agricultural landscape: an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**A Politeia for a different, stronger and fairer Europe** Paolo

Savona, 2018-12-10 T00:00:00+01:00 Making the European Union “stronger and more equitable”. That’s the aim of this document which Paolo Savona, the European Affairs Minister, has submitted to the European authorities on behalf of the Italian Government. It contains a series of proposals to complete the European institutional architecture and to correct the policies currently followed, by promoting an intra-European dialogue in the framework of a high level working group composed by the Representatives of the Commission and the Member States in order to offer more social well-being and growth opportunities which could combine with the requests for monetary and financial stability, whose satisfaction, contrarily to the first two objectives, is endowed with good tools. All this in line with the commitments made in the Treaties that followed one another from that of Maastricht onwards. One central point of this proposal is that the governance of the European economy and society can not be entrusted to mechanical rules typical of the private governance organization that is prevalently aimed at the efficient management of resources, but to political choices which start from the changing structural and conjunctural conditions of the individual Member States and the Union inspired by a “Politeia”, that is, the ways in which the common good is organized in order to embrace the social issues with particular regard to the needs of the weakest parts of the population.

Anatomy of an Orogen: The Apennines and Adjacent Mediterranean Basins F. Vai, I. Peter

Martini,2013-12-21 This is the first book in English reviewing and updating the geology of the whole Apennines, one of the recent most uplifted mountains in the world. The Apennines are the place from which Steno (1669) first stated the principles of geology. The Apennines also represent amongst others, the finding/testing sites of processes and products like volcanic eruptions, earthquakes, olistostromes and mélanges (argille scagliose), salinity crisis, geothermal fluids, thrust-top basins, and turbidites (first represented in a famous Leonardo's painting). As such, the Apennines are a testing and learning ground readily accessible and rich of any type of field data. A growing literature is available most of which is not published in widely available journals. The objective of the book is to provide a synthesis of current data and ideas on the Apennines, for the most part simply written and suitable for an international audience. However, sufficient details and in-depth analyses of the various complex settings have been presented to make this material useful to professional scholars and to students of senior university courses.

**Urban Memory** Mark Crinson,2005 This multi-authored work considers the increasingly vital concept of urban memory, approaching the issue from different perspectives across art, culture, architecture and human consciousness, with studies on contemporary urban spaces worldwide.

**Our Enduring Values Revisited: Librarianship in an Ever-Changing World** Michael Gorman,2015 In the almost 15 years since *Our Enduring Values* was published, there has been a sea change in the way much of the world thinks about and uses libraries. Young librarians and seasoned LIS professionals alike are experiencing increasing pressure to adjust to new economic, societal, and technological demands amidst the often-dire rhetoric currently surrounding the future of our institutions. In this stirring manifesto, public intellectual, librarian, and philosopher Gorman addresses head on the “existential panic” among library professionals caused by the radical shift in how libraries

are viewed. He reconnects readers with the core values that continue to inspire generations of library professionals and scholars—while making the case that these values are doubly crucial to hold on to in the brave new shifting world of librarianship. Destined to become another classic of library literature, this book explores such contemporary issues as The growing emphasis of the library as a cultural institution, placing libraries within their cultural context as gathering places for learning, access to information, and communityThe impact of technological innovations on core values such as access and stewardshipLibrary places and spaces of the futureHow the mass digitization of books, archives, and other materials affects the purpose and function of librariesIntellectual freedom and privacy in the era of the PATRIOT Act, Wikileaks, and Edward SnowdenThe role of libraries as both champions and facilitators of social justiceInspirational yet clear-sighted, Gorman emphatically reaffirms the importance of libraries and librarians while proposing a path for future survival and growth.
