PEP (het persoonlijk efficiency programma) Kerry Gleeson, 2012-10-02 Dankzij Kerry Gleesons revolutionaire boek PEP® (het Persoonlijk Efficiency Programma), krijgen meer dan 1 miljoen mensen wereldwijd hun werk af en voelen ze zich beter op hun werk. Nu is de beurt aan jou. Leer organiseren en een no-nonsense vergadering te leiden. Ga efficiënt om met e-mail en andere communicatiemiddelen en houd zo meer grip op je werk. Als je efficiënter werkt, ben je eerder klaar en houd je meer tijd over die je zelf kunt indelen. Zo is het een stuk makkelijker om die wankelende balans tussen werk en privé weer te vinden. De vierde editie van deze ultieme werkbesparende, stressreducerende, carrièreversterkende gids helpt je elke uitdaging op het werk aan te gaan. Met alle aandacht voor de moderne communicatiemiddelen leer je hoe je: > jezelf organiseert > je niet meer overstelpt voelt en jezelf bevrijdt van stress > zaken voor elkaar krijgt met de minste moeite > een einde maakt aan de niet-aflatende e-mailstroom > effectief en efficiënt vergaderingen leidt > minder tijd op kantoor doorbrengt en meer vrije tijd overhoudt. Kerry Gleeson is grondlegger en CEO van het Institute for Business Technology (IBT), vanaf 1 januari 2010 handelend onder de naam PEP®worldwide. Hij ontwikkelde het wereldwijd succesvolle PEP®-programma, waar bedrijven als Shell, Philips en Siemens mee werken.

The Third Industrial Revolution Jeremy Rifkin, 2011-10-04 The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful Third Industrial Revolution. He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an energy internet, just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

Machine Learning Techniques for Time Series Classification Michael Botsch, 2023-06-23 Classification of time series is an important task in various fields, e.g., medicine, finance, and industrial applications. This work discusses strong temporal classification using machine learning techniques. Here, two problems must be solved: the detection of those time instances when the class labels change and the correct assignment of the labels. For this purpose the scenario-based random forest algorithm and a segment and label approach are introduced. The latter is realized with either the augmented dynamic time warping similarity measure or with interpretable generalized radial basis function classifiers. The main application presented in this work is the detection and categorization of car crashes using machine learning. Depending on the crash severity different safety systems, e.g., belt tensioners or airbags must be deployed at time instances when the best-possible protection of passengers is assured.
