Epileptic Syndromes in Infancy, Childhood and Adolescence - 5th edition Bureau Michelle, Genton Pierre, Dravet Charlotte, 2012-11-12 The ultimate reference book : the 5th updated edition of the famous “blue guide”. Included : A DVD with new sequences completes each chapter! Epileptology changes. The syndromic approach is completed by an etiological approach, based on the major advances in genetics and functional genetics. New entities have found their place, and a purely descriptive, “electroclinical” approach is no longer adapted in many circumstances. The 5th edition of the Blue Guide includes the most recent advances. It was necessary to justify the physiological, epidemiologic, genetic and therapeutic approaches and to consider them in the light of the new classification efforts, which are still in the making. Nevertheless, the description of epileptic syndromes, both classical and recent, remains at the core of this book.

**Smaller, Quicker, Cheaper** Daniel A. Wagner, 2011 The effective use of educational assessments is fundamental to improving learning. However, effective use does not refer only to the technical parameters or statistical methodologies. Learning assessments in use today whether large-scale or household surveys or hybrid (smaller, quicker, cheaper or SQC) have varied uses and purposes. The present volume provides a review of learning assessments, their status in terms of the empirical knowledge base, and some new ideas for improving their effectiveness, particularly for those children most in need. It is argued here that SQC learning assessments have the potential to enhance educational accountability, increase transparency, and support a greater engagement of stakeholders with an interest in improving learning. In addition, countries need a sustained policy to guide assessment choices, including a focus on poor and marginalized populations.

**Education Reform and the Learning Crisis in Developing Countries** Prema Clarke, 2022-09-15 Over three decades ago, international donors declared that there was a learning crisis in developing countries. In the years since, large investments have been made towards education, yet there has been an apparent relative lack of progress in student learning. This book unpicks this disparity, and explores the implications of evidence-based donor programming for quality education. It undertakes an in-depth analysis of the interventions financed by the main donors in primary education, such as infrastructure development, provision of instructional material, teacher training and community mobilization, and argues that the research undertaken during this period was unable to provide answers. The author outlines an alternative model for evidence generation that can assist in the design of relevant and targeted interventions for

learning, to ultimately inform and improve future education programmes. Timely and radical, this book is essential reading for researchers and students in the fields of education research and education reform.

**Negotiated Justice and Corporate Crime** Colin King, Nicholas Lord, 2018-05-21 This book argues that there is a strong normative argument for using the criminal law as a primary response to corporate crime. In practice, however, corporate crimes are rarely dealt with through criminal sanctioning mechanisms. Rather, the preference – for both prosecutors and corporates – appears to be on negotiating out of the criminal process. Reflecting this emphasis on negotiation, this book examines the use of Civil Recovery Orders and Deferred Prosecution Agreements as responses to corporate crime, and discusses a variety of UK case studies. Drawing upon legal and criminological backgrounds, and with an emphasis on the conceptual frameworks of ‘negotiated justice’ and ‘legitimacy’, the authors examine the law, policy and practice of these enforcement responses. They offer an original, theoretically-informed analysis which is accessible to practitioners and researchers.

THE EARLY GRADE READING ASSESSMENT Amber K. Gove, Anna Wetterberg, 2011-09-28 The Early Grade Reading Assessment (EGRA) measures students' progress towards reading. EGRA gauges early literacy skills through a 15-minute individual oral assessment of five fundamental reading skills. RTI worked with education experts to develop the EGRA in 2006, and it has been piloted and implemented in more than 40 countries. This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA, and to share this knowledge with practitioners, policymakers, and international donors. Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education.

*Overview:* MELQO UNESCO, UNICEF, World Bank, Brookings Institution (USA). Center for Universal Education, 2017-08-14 The Measuring Early Learning Quality and Outcomes (MELQO) initiative began in 2014 as part of the global emphasis on early childhood development (ECD). Led by UNESCO, the World Bank, the Center for Universal Education at the Brookings Institution and UNICEF, the initiative aims to promote feasible, accurate and useful measurement of children's development and learning at the start of primary school, and of the quality of their pre-primary learning environments. Items are designed for children between the ages of 4 and 6 years. Following the premise that many existing tools include similar items, the leading organizations's core team worked with a consortium of experts, non-governmental organizations (NGOs) and multilaterals to build upon current measurement tools to create a common set of items organized into modules

for measuring: 1) early childhood development and learning, and 2) the quality of pre-primary learning environments. The MELQO core team and experts also collaborated to outline a process for context-specific adaptation of the measurement modules resulting from lessons learned from field-testing in several countries in 2015 and 2016. The modules are designed to be implemented at scale, with an emphasis on feasibility for low- and middle-income countries (LMICs). A key question addressed by MELQO was the balance between a global tool suitable for use everywhere, and local priorities and goals for children's development. [Introduction, ed]

**New Vision** Hossein Amirsadeghi, Salwa Mikdadi, Nada M. Shabout, 2009 With over 500 stunning colour illustrations *New Vision: Arab Contemporary Art in the 21st Century* offers the most comprehensive, scholarly and in-depth survey yet of what is happening at the cutting-edge of art in the Arab world. In the perpetual quest for the new, the exciting and the innovative, the attention of the global art community has in recent years been more and more focused on the Middle East. Exhibitions and articles have highlighted a remarkable burst of creativity in the region, as Arab countries from Syria to Algeria, Egypt to Lebanon and Palestine to Saudi Arabia have launched some of the most fascinating artists in recent years. The conceptual playfulness of Hassan Khan, the charged paintings of Jeffar Khaldi, the organic sculptures of Diana Al-Hadid, and the moving photography of Yto Barrada have dazzled audiences with their variety, innovation and thoughtfulness. Until now, however, nobody has captured the vitality of the region's art in a single book. Five groundbreaking essays offer the best context to date for contemporary Arab art. These are followed by some 90 superbly illustrated profiles of key artists, organizations

and galleries. Mixing the well known (such as Mona Hatoum or Susan Hefuna) with the up and coming (for example, Steve Sabella or Mireille Astore). Exclusive interviews with artists and key curators give an unrivalled insight into the aims, ideas and inspirations of this new generation. Perfect for all scholars, students and lovers of art, as well as all those interested in the broader Arab cultures, this book is set to become the touchstone publication on this increasingly important and exciting subject. --Book Jacket.
