Atlas of Ancient Egypt John Baines,Jaromír Málek,1980 This fascinating history is filled with stunning photographs and maps and a distinguished text.

An Atlas of Ancient Egypt Egypt Exploration Fund,2017-10-18 Excerpt from An Atlas of Ancient Egypt: With Complete Index, Geographical and Historical Notes, Biblical References, Etc The Committee of the Egypt Exploration Fund issues this volume of Maps of Ancient Egypt as a Special Publication, in the belief that many of its friends and subscribers may desire to possess such an Atlas exhibiting the latest identifications Of ancient sites, and more especially marking the important geographical discoveries which have resulted from the work of the Society. Egypt changes but little, and the modern Map, with the natural as well as the artificial features depicted upon it, will give a truer insight into the physiography of the country in ancient times than the skeleton maps of Ancient Egypt which follow it. This map also shows the lines of the modern desert roads (which generally coincide with those of the old roadways), the Egyptian railway system, and the Suez Canal; it will therefore be appreciated by travellers, as well as by archaeological enquirers. Opposite to the maps of Ancient Egypt will be found tables containing the names of the N omes and their capitals, and of the local gods, but the state of our present knowledge does not enable us to delineate their boundaries; which, moreover, often varied. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Islamic Cairo in Maps Yasser M. Ayad,2021-11-16 A portable, easy-to-use map guide that locates over 700 hundred Islamic-era monuments in historic Cairo using the most sophisticated Geographic Information Systems (GIS) technology This portable, easy-to-use map guide helps you locate over seven hundred Islamic-era monuments in Cairo's historic core, stretching from the city's northern walls all the way southward to the Mosque of Ibn Tulun and the Citadel, and beyond to Coptic Cairo, which includes monuments that pre-date Islamic rule. Clearly divided into six digestible main sections, the first five contain clusters of monuments, while the sixth covers structures scattered all around the old Cairene urban fabric. The clear, uncluttered cartographic style makes finding where you want to go a pleasure, and the maps are accompanied by a comprehensive index of monuments that gives their dates where known, their location referenced to their corresponding map pages, and a timeline of key periods and dynasties. Attractively designed in full color and including over twenty photographs of key monuments, this guide is conveniently packed into a slim 104 pages--handy enough to take anywhere and great for planning and remembering excursions. It is not only an ideal companion for the city's visitors and residents but an invaluable resource for historians, writers, and students.

Atlas of ancient Egypt John Baines,1986

An Atlas of Ancient Egypt Egypt Exploration Society,2023-07-18 This atlas provides readers with a comprehensive overview of ancient Egypt. It includes detailed maps and historical information, as well as references to important biblical events that took place in Egypt. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The New Cultural Atlas of Egypt Leon Gray,2009

The Culture Map (INTL ED) Erin Meyer,2016-01-05 An international business expert helps you understand and navigate cultural differences in this insightful and practical guide, perfect for both your work and personal life. Americans precede anything negative with three nice comments; French, Dutch, Israelis, and Germans get straight to the point; Latin Americans and Asians are steeped in hierarchy; Scandinavians think the best boss is just one of the crowd. It's no surprise that when they try and talk to each other, chaos breaks out. In *The Culture Map*, INSEAD professor Erin Meyer is your guide through this subtle, sometimes treacherous terrain in which people from starkly different backgrounds are expected to work harmoniously together. She provides a field-tested model for decoding how cultural differences impact international business, and combines a smart analytical framework with practical, actionable advice.

Mummy Portraits of Roman Egypt Marie Svoboda,Caroline Cartwright,2020-08-25 This publication presents fascinating new findings on ancient Romano-Egyptian funerary portraits preserved in international collections. Once interred with mummified remains, nearly a thousand funerary portraits from Roman Egypt survive today in museums around the world, bringing viewers face-to-face with people who lived two thousand years ago. Until recently, few of these paintings had undergone in-depth study to determine by whom they were made and how. An international collaboration known as APPEAR (Ancient Panel Paintings: Examination, Analysis, and Research) was launched in 2013 to promote the study of these objects and to gather scientific and historical findings into a shared database. The first phase of the project was marked with a two-day conference at the Getty Villa. Conservators, scientists, and curators presented new research on topics such as provenance and collecting, comparisons of works across institutions, and scientific studies of pigments, binders, and supports. The papers and posters from the conference are collected in this publication, which offers the most up-to-date information available about these fascinating remnants of the ancient world. The free online edition of this open-access publication is available at www.getty.edu/publications/mummyportraits/ and includes zoomable illustrations and graphs. Also available are free PDF, EPUB, and Kindle/MOBI downloads of the book.

Mobile Mapping Clancy Wilmott,2020 This book argues for a theory of mobile mapping, a situated and spatial approach towards researching how everyday digital mobile media practices are bound up in global systems of knowledge and power. Drawing from literature in media studies and geography -- and the work of Michel Foucault and Doreen Massey -- it examines how geographical and historical material, social, and cultural conditions are embedded in the way in which contemporary (digital) cartographies are read, deployed, and engaged. This is explored through seventeen walking interviews in Hong Kong and Sydney, as potent discourses like cartographic reason continue to transform and weave through the world in ways that haunt mobile mapping and bring old conflicts into new media. In doing so, *Mobile Mapping* offers an interdisciplinary rethinking

about how multiple translations of spatial knowledges between rational digital epistemologies and tacit ways of understanding space and experience might be conceptualized and researched.

Google Earth Engine Applications Lalit Kumar, Onesimo Mutanga, 2019-04-23 In a rapidly changing world, there is an ever-increasing need to monitor the Earth's resources and manage it sustainably for future generations. Earth observation from satellites is critical to provide information required for informed and timely decision making in this regard. Satellite-based earth observation has advanced rapidly over the last 50 years, and there is a plethora of satellite sensors imaging the Earth at finer spatial and spectral resolutions as well as high temporal resolutions. The amount of data available for any single location on the Earth is now at the petabyte-scale. An ever-increasing capacity and computing power is needed to handle such large datasets. The Google Earth Engine (GEE) is a cloud-based computing platform that was established by Google to support such data processing. This facility allows for the storage, processing and analysis of spatial data using centralized high-power computing resources, allowing scientists, researchers, hobbyists and anyone else interested in such fields to mine this data and understand the changes occurring on the Earth's surface. This book presents research that applies the Google Earth Engine in mining, storing, retrieving and processing spatial data for a variety of applications that include vegetation monitoring, cropland mapping, ecosystem assessment, and gross primary productivity, among others. Datasets used range from coarse spatial resolution data, such as MODIS, to medium resolution datasets (Worldview -2), and the studies cover the entire globe at varying spatial and temporal scales.

Modeling Our World Michael Zeiler, 1999 Geographic data models are digital frameworks that describe the location and characteristics of things in the world around us. With a geographic information system, we can use these models as lenses to see, interpret, and analyze the infinite complexity of our natural and man-made environments. With the geodatabase, a new geographic data model introduced with ArcInfo 8, you can extend significantly the level of detail and range of accuracy with which you can model geographic reality in a database environment.

Digital Rubbish Jennifer Gabrys, 2013-04-26 This is a study of the material life of information and its devices; of electronic waste in its physical and electronic incarnations; a cultural and material mapping of the spaces where electronics in the form of both hardware and information accumulate, break down, or are stowed away. Where other studies have addressed digital technology through a focus on its immateriality or virtual qualities, Gabrys traces the material, spatial, cultural and political infrastructures that enable the emergence and dissolution of these technologies. In the course of her book, she explores five interrelated spaces where electronics fall apart: from Silicon Valley to Nasdaq, from containers bound for China to museums and archives that preserve obsolete electronics as cultural artifacts, to the landfill as material repository. *Digital Rubbish: A Natural History of Electronics* describes the materiality of electronics from a unique perspective, examining the multiple forms of waste that electronics create as evidence of the resources, labor, and imaginaries that are bundled into these machines. Ranging across studies of media and technology, as well as environments, geography, and design, Jennifer Gabrys draws together the far-reaching material and cultural processes that enable the making and breaking of these technologies.
