**Luftwaffe Fighter Aces** Mike Spick,2011-07-19 In this exciting book Mike Spick shows how the Luftwaffe's leading fighter pilots were able to outscore their allied counterparts so effectively and completely during the Second World War. When the records of the Jagdflieger pilots became available after the war, they were initially greeted with incredulity \_ the highest claim was for 352 kills, and more than 100 pilots had recorded more than 100 victories. However postwar research proved that these claims had in fact been made in good faith and confirmation had only been given after rigorous checking. To discover the secret of this success, aviation history expert Mike Spick examines the exploits of these aces and sets out the context in which it took place. Every major theater is covered in detail including the conditions peculiar to each: climate, relative numerical and qualitative strengths, the presence or absence of radar and other measures, and the relative merits of the planes being flown. He focuses on the methods and tactics used by individual aces and uses firsthand sources wherever possible to put the reader right alongside the pilot in the cockpit.

**Recharge Your Library Programs with Pop Culture and Technology:** Linda D. Behen,2013-06-17 Learn how to integrate pop culture and technology into school library programs and classrooms, and make today's digital content, mobile devices, and students' changing interests work to the educator's advantage. Today's school libraries need to evolve and meet the needs of 21st-century students—the instruction, programming, and library services must be relevant to today's learners. Additionally, the interactions between educators and the students are what make the critical difference in the students' learning, and turn the library and classroom into places where they will find, assimilate, experience, and understand information. This book provides practical strategies for using pop culture and technology trends to connect with easily distracted middle and high school students and hold their attention. Author Linda D. Behen addresses why school libraries are in transition and why there is a need for dramatic change. She discusses the evolution of all libraries in response to digital content; ubiquitous mobile devices such as smart phones, iPads, and other tablet computers; patrons' changing interests; and the ways in which schools and school libraries have found to effectively adapt to technology changes and student needs. This book is essential for middle and high school librarians and educators, library school students and instructors, and young adult public librarians.

" Brand Perception among Rural and Urban Consumers" Dr. Pramod H. Patil,2022-08-30 The Fast Moving Consumer Goods (FMCG) sector is a cornerstone of the Indian economy and it touches every aspect of human life. It is the fourth largest sector and an important contributor to the Indian economy. This industry is volume-driven and characterized by low margins; it mainly deals with the production, distribution, and marketing of consumer packaged goods and is therefore alternatively called the CPG (Consumer Packaged Goods) industry. The industry is also engaged in the operations, supply chain, and general management of these goods. The FMCG industry provides a wide range of consumables and, therefore, the amount of money circulated against FMCG products is also very high.
