**Office 2001 for Macintosh: The Missing Manual** Nan Barber,David Reynolds,2001-05-03 To the surprise of most Mac fans, the number one bestselling Macintosh software is Microsoft Office for the Macintosh. It's by far the most popular Macintosh software, and the first software purchase a new Mac user is likely to make. And for the first time, Office 2001 comes without a single page of printed instructions. The packaging is a five- inch-square clear plastic case housing the CD-ROM and little else. Fortunately, Pogue Press/O'Reilly is once again ready to embrace the befuddled and overwhelmed—with Office 2001 for Macintosh: The Missing Manual. It tackles each of the primary Office applications with depth, humor, and clarity, and provides relief for the hapless Mac user who'd rather read professionally written printed instructions than hunt through a maze of personality-free help screens. The book is structured to help the beginner as well as the seasoned user. Part One provides an overview of Word. From What's New, to Basic Word Processing, to Document Design, to Advanced Word Processing—with in-depth details on creating Web pages and performing mail merges using Word. Part Two covers the new Palm-syncable calendar in Entourage, including all aspects of email, how to best use the calendar and address book, and crucial information on the Palm Hotsync. Part three explains all the finer points of Excel, including Microsoft's exciting new List Manager, specifically designed for creating and manipulating lists without the prerequisite of learning spreadsheet tools. Office 2001 for Macintosh: The Missing Manual is coauthored by a dream team of Missing Manual alumni: David Reynolds, executive editor of MacAddict magazine and coauthor of AppleWorks 6: The Missing Manual, and Nan Barber, whose efforts as the copy editor of the first four Missing Manual titles gave her an intuitive feeling for the friendly, funny, authoritative voice of the series. Once again, the authors are joined by series founder David Pogue, who has closely edited the book to ensure excellence of depth, accuracy, and prose.

*"I don't translate, I create!"* Vanessa Drexler,2016-01-05 "I don't translate, I create!" – This is the slogan of a translation agency called "Sternkopf Communications" located in Flöha, Germany. The translators at this translation agency are specialized in the field of marketing and perceive creativeness their daily bread. But what does this actually mean – I don't translate, I create? Undoubtedly, the translation of a text from one language into another is not an easy and straightforward process. On the contrary, the translator needs to invest much time and one or the other headache before a target text (TT) finally sounds natural, fluent, coherent and logical for the target audience. Different possible translation solutions will have to be considered, language as well as culture-related equivalents often are not easily at hand etc. Would it not be pleasant if machine translation (MT) was there to help with this process? Yet, despite the enormous importance of creativity in translating, computer-aided translation (CAT) tools are being used frequently by professional translators, not to replace but to support the translator in their daily business. CAT tools enable their users to translate in a more consistent way, since they search source texts for words, phrases or sentences that have already been translated before and stored in the TM so that the translator does not need to translate this text unit again 'from scratch'. Considering that this process brings about what could be called 'semi-mechanical' TTs, the use of CAT tools seems to stand in stark contrast to the importance of creativity mentioned above. Thus, the question arises whether CAT tools influence the creative energy of translators and, if this is the case, whether translators regard this influence as rather positive or negative. In this context, it is also important to consider which fields of expertise generally demand a high degree of uniformity/consistency in translations and which subject fields generally allow for a high degree of creative freedom. Accordingly, this paper pursues two related purposes. The first is to compare five CAT tools in their degree of usability. The second purpose is to identify translators' perspectives on uniformity and creativity in translations with the goal to shedding light on the question whether CAT tools generally tend to positively or negatively influence the translation process on a rather linguistic than technological basis.

web dec 6 2015 moral of the story if you wan t  
to paddle well in bigger conditions but aren t  
100 bullet proof in 2 3 foot conditions you  
should probably consider a more stable boat  
every paddler should experience downwind  
downwind paddling is ultimately what the  
surfski experience is all about i know for me it  
has become an absolute addiction
