Time Tamed Nicholas Foulkes,2019-10-31 'Downright fascinating...indispensable reading' Daily Telegraph 'Nicholas Foulkes' excellent...book is beautifully illustrated. Captivating' Daily Mail For more than 25,000 years, humanity has sought to understand and measure the passing of time, in the process creating some of the most remarkable and beautiful timepieces. Now, in Nicholas Foulkes' lavishly illustrated book, the battle to tame time is brought vividly to life. From the baboon bone dating back to the palaeolithic era that marked the lunar cycle and on to the 3500-year-old water clock at Karnak, from our earliest days mankind has sought to track the passing of time. More recently, the struggles to measure longitude and to create a workable train timetable across the vast, open expanse of the United States have inspired new developments. In *Time Tamed*, Nicholas Foulkes reveals how we have done this by focusing on some of the most significant developments in timekeeping across the ages. He also highlights the most stunning and lavish clocks and watches in history - from Big Ben to Rolex - for telling the time has never been purely about function, but also about design. The book is filled with remarkable tales, from the 14th century monk in St Albans who created one of the first mechanical clocks to the Holy Roman Emperor who built a clock into an automated ship that fired a cannon to summon guests to dinner. More recently, there was the Surrey woman who used a Napoleonic era watch to 'deliver' the accurate time to London shopkeepers in the wartime era of Churchill, or the Swiss denture maker who solved a tricky problem for the Indian Raj's polo players. *Time Tamed* is a book you'll want to spend many hours enjoying.

Marine Chronometers at Greenwich Jonathan Betts,2018-01-03 The Marine Chronometers at Greenwich is the fifth, and largest, of the distinguished series of catalogues of instruments in the collections of the National Maritime Museum. Housed at the Royal Observatory Greenwich – the 'home of time' and the Prime Meridian of the world – this extraordinary collection, which includes the celebrated marine timekeepers by John Harrison (1693-1776), is generally considered to be the finest of its kind in existence. The book is however much more than just a catalogue, and includes an accessible and engaging history of the chronometer, revealing why these instruments were important in our scientific and cultural history, and explaining, in simple terms, how they worked and were used. A comprehensive Glossary and Bibliography are included to ensure any technicalities are explained and that the reader has suggestions for useful 'further reading'. Over 480 photographs and illustrations, including many fine macro-photographs and line drawings, illustrate the 'jewel-like' beauty of the chronometer's construction and explain the function and subtleties of its mechanism. A chapter on 'How the Chronometer was Made', describes the fine sub-division of labour used to create these special machines, from bare metal, right up to delivery on board ship, and brief biographies of the makers tell the human story behind this important nineteenth-century industry. Another chapter, 'The Evolution of the Chronometer', aimed at collectors, historians and curators, provides clearly structured information on assessing and dating the chronometer, something many find difficult. And, for the dedicated specialist, there is extensive tabulated data on the technical structure of this important collection, a unique resource for future research.

The Watch & Clock Makers' Handbook, Dictionary, and Guide F. J. Britten,2011-03-16 Widely regarded as one of the most famous and useful encyclopedias on watch- and clock-making, this eleventh edition of the regularly updated guide was first published in 1907. This is the final edition Britten completed before his death in 1913, and it is full of classic information on tools, repairs, terms, and definitions. Britten's book is the only place to get invaluable information on watch- and clock-making techniques and technology of the early-twentieth century and before. The Watch and Clock Makers' Handbook, Dictionary, and Guide is an important resource for hobbyists, artists, antique dealers, history buffs, students, and horologists—amateur and professional alike.

Sapphire Blue Kerstin Gier,2012-10-30 Gwen's life has been a rollercoaster since she discovered she was the Ruby, the final member of the secret time-traveling Circle of Twelve. In between searching through history for the other time-travelers and asking for a bit of their blood (gross!), she's been trying to figure out what all the mysteries and prophecies surrounding the Circle really mean. At least Gwen has plenty of help. Her best friend Lesley follows every lead diligently on the Internet. James the ghost teaches Gwen how to fit in at an eighteenth century party. And Xemerius, the gargoyle demon who has been following Gwen since he caught her kissing Gideon in a church, offers advice on everything. Oh, yes. And of course there is Gideon, the Diamond. One minute he's very warm indeed; the next he's freezing cold. Gwen's not sure what's going on there, but she's pretty much destined to find out.
