The Emerald Home Run Steven Andrew Janda,2011-06-01 If you look for parallels in baseball and the Bible, you will find them! The Emerald Home Run is a true story which combines the Bible and a book author Steven A. Janda wrote about the parables of Christ in 2008 entitled, Ready or Not, Here I Come. Suddenly, says Janda, I began to notice many interesting parallels in Major League Baseball. On April 15, 2009, Ken Griffey Jr. hit his 613th career home run, The Emerald Home Run, after returning to the Seattle Mariners from a nine-year absence with the Cincinnati Reds and briefly with the Chicago White Sox. As soon as Griffey hit the home run, Hall of Fame Announcer Dave Neihaus said this was Griffey's 400th home run as a Mariner. Instantly, says Janda, I remembered Moses, who delivered the children of Israel after 400 years of bondage to the Egyptians. The author reveals numeric mysteries, including how Revelation appears in Genesis, how the tribes of Israel in the Law of Moses are joined numerically to Genesis and revealed in Major League Baseball by the Gregorian calendar. And children will love the secret formula for multiplying certain number patterns into millions without a calculator!The revelations in this book have never appeared in text books. The Emerald Home Run is truly an arithmetic lesson for the whole world to enjoy. Do not be left behind. About the Author: Steven A. Janda of Renton, Washington, invites readers to learn about the Babe Ruth 999 Mystery and much more at www.EmeraldHomeRun.blogspot.com. Emerald Windows Terri Blackstock,2009-08-30 Ten years ago, devastated by an ugly scandal, Brooke Martin fled the small town of Hayden to pursue a career as a stained glass artist. Now Brooke has returned on business to discover that some things never change. Her spotted reputation remains. Tongues still wag. And that makes what should be her dream assignment tough. Brooke has been hired to design new stained glass windows at Hayden Bible Church. The job is a career windfall. But Nick Marcello is overseeing the project, and some in the church think Nick and Brooke's relationship is not entirely professional--and as before, there is no convincing those people otherwise. In the face of mounting rumors, the two set out to produce the masterpiece Nick has conceived: a brilliant set of windows displaying God's covenants in the Bible. For Brooke, it is more than a project--it is a journey toward faith. But opposition is heating up. A vicious battle of words and will is about to tax Brooke's commitment to the limit. Only this time, she is determined not to run.

Emerald Alex Gordon,2015-01-13

"Gordon follows these familiar cues with an obvious passion for the genre and a skill at setting vivid scenes. He invests Akron, Emerald and the rest of the characters with impressive amounts of life, and he describes battles with a fine-tuned attention to detail."

"The book offers an interesting twist on the fantasy formula, and fans of the grittier takes on the genre are sure to find something to appreciate here."

—Blue Ink Reviews

Three Stars (out of Five)

"In a mythical kingdom, passionate love between a young man and a female dragon transcends the ordinary romantic fling. Enter an incredible fantasy that defies even magic in Alex Gordon's *Emerald*, a story that takes place in a medieval-style realm teetering on the brink of disaster after an exhausting war."

“His passionate characters reflect stamina and strength. Emerald will delight fans of mystical kingdoms where fantastical creatures take on distinctive personalities, lending a unique voice to the narrative.”

Running Home Katie Arnold, 2020-09-08 In the tradition of Wild and H Is for Hawk, an Outside magazine writer tells her story—of fathers and daughters, grief and renewal, adventure and obsession, and the power of running to change your life. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY REAL SIMPLE I’m running to forget, and to remember. For more than a decade, Katie Arnold chased adventure around the world, reporting on extreme athletes who performed outlandish feats—walking high lines a thousand feet off the ground without a harness, or running one hundred miles through the night. She wrote her stories by living them, until eventually life on the thin edge of risk began to seem normal. After she married, Katie and her husband vowed to raise their daughters to be adventurous, too, in the mountains and canyons of New Mexico. But when her father died of cancer, she was forced to confront her own mortality. His death was cataclysmic, unleashing a perfect storm of grief and anxiety. She and her father, an enigmatic photographer for National Geographic, had always been kindred spirits. He introduced her to the outdoors and took her camping and on bicycle trips and down rivers, and taught her to find solace and courage in the natural world. And it was he who encouraged her to run her first race when she was seven years old. Now nearly paralyzed by fear and terrified she was dying, too, she turned to the thing that had always made her feel most alive: running. Over the course of three tumultuous years, she ran alone through the wilderness,

logging longer and longer distances, first a 50-kilometer ultramarathon, then 50 miles, then 100 kilometers. She ran to heal her grief, to outpace her worry that she wouldn't live to raise her own daughters. She ran to find strength in her weakness. She ran to remember and to forget. She ran to live. Ultrarunning tests the limits of human endurance over seemingly inhuman distances, and as she clocked miles across mesas and mountains, Katie learned to tolerate pain and discomfort, and face her fears of uncertainty, vulnerability, and even death itself. As she ran, she found herself peeling back the layers of her relationship with her father, discovering that much of what she thought she knew about him, and her own past, was wrong. *Running Home* is a memoir about the stories we tell ourselves to make sense of our world—the stories that hold us back, and the ones that set us free. Mesmerizing, transcendent, and deeply exhilarating, it is a book for anyone who has been knocked over by life, or feels the pull of something bigger and wilder within themselves. “A beautiful work of searching remembrance and searing honesty . . . Katie Arnold is as gifted on the page as she is on the trail. *Running Home* will soon join such classics as *Born to Run* and *Ultramarathon Man* as quintessential reading of the genre.”—Hampton Sides, author of *On Desperate Ground* and *Ghost Soldiers*

The Emerald Atlas John Stephens, 2011-04-05 A strong . . . trilogy, invoking just a little Harry Potter and Series of Unfortunate Events along the way.—*Realms of Fantasy* Siblings Kate, Michael, and Emma have been in one orphanage after another for the last ten years, passed along like lost baggage. Yet these unwanted children are more remarkable than they could possibly imagine. Ripped from their parents as babies, they are being protected from a horrible evil of devastating power, an evil they know nothing about. Until now. Before long, Kate, Michael, and Emma are on a journey through time to dangerous and secret corners of the world . . . a journey of allies and enemies, of magic and mayhem. And—if an ancient prophecy is true—what they do can change history, and it's up to them to set things right. A new Narnia for the tween set.—*The New York Times* [A] fast-paced, fully imagined fantasy.—*Publishers Weekly* Echoes of other popular fantasy series, from Harry Potter to the Narnia books, are easily found, but debut author Stephens has created a new and appealing read . . .—*School Library Journal*, Starred Review

EC00P '93 - Object-Oriented Programming Oscar M. Nierstrasz, 2003-05-16 It is now more than twenty-five years since object-oriented programming was “invented” (actually, more than thirty years since work on Simula started), but, by all accounts, it would appear as if object-oriented technology has only been “discovered” in the past ten years! When the first European Conference on Object-Oriented Programming was held in Paris in 1987, I think it was generally assumed that Object-Oriented Programming, like Structured Programming, would quickly enter the vernacular, and that a conference on the subject would rapidly become superfluous. On the contrary, the range and impact of

object-oriented approaches and methods continues to expand, and, - spite the inevitable oversell and hype, object-oriented technology has reached a level of scientific maturity that few could have foreseen ten years ago. Object-oriented technology also cuts across scientific cultural boundaries like p- haps no other field of computer science, as object-oriented concepts can be applied to virtually all the other areas and affect virtually all aspects of the software life cycle. (So, in retrospect, emphasizing just Programming in the name of the conference was perhaps somewhat short-sighted, but at least the acronym is pronounceable and easy to rem- ber!) This year's ECOOP attracted 146 submissions from around the world - making the selection process even tougher than usual. The selected papers range in topic from programming language and database issues to analysis and design and reuse, and from experience reports to theoretical contributions.
