101 Skills You Need to Survive in the Woods Kevin Estela, 2019-04-16 The Foundation of All Survival Skills is "Feeder" Mind-Set "Feeder" mind-set means being in control of a situation, proactive rather than reactive. It is an optimistic outlook that reframes any situation as a learning experience. These skills will keep you safe and better prepare you to deal with emergencies in the field, when you'll need the additional skills of signaling and communication, navigation and crisis first aid taught in this book. Each chapter concludes with more advanced techniques to build your skills in various challenging situations, with tips that even seasoned survival enthusiasts haven't thought of. 101 Skills You Need to Survive in the Woods is not a onetime read but a lifetime

reference you will turn to over and over again. It will become the first thing you pack for any adventure and just might save your— or someone else's—life. Kevin Estela, a bushcraft and survival expert, is an avid world traveler and martial arts instructor.

Wilderness Navigation Handbook Fred Touche, 2005-09-28 Designed for both land and water use, this comprehensive guide helps unlock the complexity of map and chart reading as it relates to navigation. Beginning with detailed technical descriptions of the tools of navigation—a compass, an altimeter, a GPS system, and a sextant—this handbook shows how to use these tools either individually or in combination with each other to navigate any area. Factors that cause tools and techniques to fail are discussed, such as why an altimeter often shows the wrong elevation, a GPS position is sometimes off track, and the sun often points in an unexpected direction. Twenty-one real-life scenarios provide practical wisdom for even the most intrepid navigator. Specific information on using the moon for directions and the stars for position, measuring boiling water temperature for elevation, map projections, map datums, great circle routes, and the UTM/UPS grid system is included.
