The Story of Emoji Gavin Lucas,2016 This is the first book to explain the genesis and cultural significance of emoji, the world's cutest and most popular form of shorthand. If you have a Twitter account or regularly send text messages, it's highly likely that you've used or received emoji. These characters include symbols and pictograms that represent a host of everyday objects and activities plus, crucially, a selection of faces that denote a range of emotions from happy to sad, angry, confused, surprised, or tired. The word emoji literally translates from Japanese as picture (e) and character (moji). The Story of Emoji traces emoji from their origin as a symbol typeface created specifically for on-screen use by a Japanese mobile phone provider in the late 1990s to an international communication phenomenon. As well as a history of emoji and an interview with their creator, Shigetaka Kurita, the book includes an exploration of non-text typefaces, from the decorative fleurons of the early days of the printing press to the innumerable digital typefaces available today, to the use of emoticons, ASCII art, and kaomoji in typed messages. It also looks at an array of artworks, fashion lines, special character sets, advertisements, and projects that convey emoji's widespread impact on contemporary culture. Finally, the book concludes with a section for which a group of illustrators, artists, and graphic designers have created original emoji characters they wish existed, including bacon, a vinyl record, and even a stabbed-in-the-back emoji.

Emoticons as a new means of communication in Italy and Germany Stefan Rosenträger,2008-05-05 Scientific Essay from the year 2008 in the subject Communications - Multimedia, Internet, New Technologies, grade: 1,0, University of Bologna (Discipline della Comunicazione), course: Semiotica dei nuovi media, 12 entries in the bibliography, language: English, abstract: The main objective of this term paper is to analyse the semiotic function of the emoticons and the way people use them to express their emotions. The special focus will be on the comparison between Germany and Italy. Are the cultural differences between these two countries noticeable even when you look at their use of smileys? How do Italians and Germans handle these semiotic devices? These are some of the questions that shall be analysed in the following.

Art Hack Practice Victoria Bradbury,Suzy O'Hara,2019-10-29 Bridging art and innovation, this book invites readers into the processes of artists, curators, cultural producers and historians who are working within new contexts that run parallel to or against the phenomenon of 'maker culture'. The book is a fascinating and compelling resource for those interested in critical and interdisciplinary modes of practice that combine arts, technology and making. It presents international case studies that interrogate perceived distinctions between sites of artistic and economic production by brokering new ways of working between them. It also discusses the synergies and dissonances between art and maker culture, analyses the social and collaborative impact of maker spaces and reflects upon the ethos of the hackathon within the fabric of a media lab's working practices. Art Hack Practice: Critical Intersections of Art, Innovation and the Maker Movement is essential reading for courses in art, design, new media, computer science, media studies and mass communications as well as those working to bring new forms of programming to museums, cultural venues, commercial venture and interdisciplinary academic research centres.

Personal, Portable, Pedestrian Mizuko Itō,Daisuke Okabe,Misa Matsuda,2005 How mobile communications in Japan became a pervasively personal tool that connects families and friends, creating always-on social engagement.

Information Systems Design and Intelligent Applications Suresh Chandra Satapathy,Vikrant Bhateja,Radhakhrishna Somanah,Xin-She Yang,Roman Senkerik,2019-01-04 The book gathers a collection of high-quality peer-reviewed research papers presented at the International Conference on Information System Design and Intelligent Applications (INDIA 2018), which was held at the Universite des Mascareignes, Mauritius from July 19 to 21, 2018. It covers a wide range of topics in computer science and information technology, from image processing, database applications and data mining, to grid and cloud computing, bioinformatics and many more. The intelligent tools discussed, e.g. swarm intelligence,

artificial intelligence, evolutionary algorithms, and bio-inspired algorithms, are currently being applied to solve challenging problems in various domains.

Social Writing/social Media Douglas M. Walls,Stephanie Vie,2017 Examines the impact of social media on three writing-related themes: publics and audiences, presentation of self and groups, and pedagogy at various levels of higher education.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Iran Negin Nabavi,2012-08-30 Recent Iranian history has been full of unexpected turns. Whether it was the 1979 revolution, which resulted in the establishment of the first ever Islamic Republic in the history of the Muslim world, the rise to power of the reformist movement in 1997, or the emergence of the Green Movement, an opposition movement that took shape spontaneously in the days immediately following the presidential elections in June 2009, the world has been taken unawares at every juncture. This book brings together essays that both speculate on the import of the developments of 2009 and shed light on the complexities and the ever-changing dynamics of post-revolutionary Iran.

Folklore in the Digital Age Violetta Krawczyk-Wasilewska,Andy Ross,2017-01-31 ?Folklore in the Digital Age shows how digital folklore transcends the boundaries of cyberspace and has very real effect on our everyday life in today's interconnected global world. Online and digital cultures are perhaps the most vivid aspects of globalization and while global multimedia culture may on the one hand endanger traditional folklore, there is no doubt that it creates new folklore as well. Collecting essays from Violetta Krawczyk-Wasilewska's 15 years of e-folklore research, this book is an illustration of the range of modern folklore studies. While these essays cover the most serious political issues of the day, such as the 9/11 attacks, the Arab Spring and global epidemic threats such as the HIV virus, the book also touches on more lighthearted topics, such as online dating and food culture.

Japanese Cybercultures Nanette Gottlieb,Mark McLelland,2003-08-29 Japan is rightly regarded as one of the most technologically advanced countries in the world, yet the development and deployment of Internet technology in Japan has taken a different trajectory compared with Western nations. This is the first book to look at the specific dynamics of Japanese Internet use. It examines the crucial questions: * how the Japanese are using the Internet: from the prevalence of access via portable devices, to the fashion culture of mobile phones * how Japan's cute culture has colonized cyberspace * the role of the Internet in different musical subcultures * how different men's and women's groups have embraced technology to highlight problems of harassment and bullying * the social, cultural and political impacts of the Internet on Japanese society * how marginalized groups in Japanese society - gay men, those living with AIDS, members of new religious groups and Japan's hereditary sub-caste, the Burakumin - are

challenging the mainstream by using the Internet. Examined from a variety of interdisciplinary perspectives, using a broad range of case-studies, this is an exciting and genuinely cutting-edge book which breaks new ground in Japanese studies and will be of value to anyone interested in Japanese culture, the Internet and cyberculture.

Programming the Mobile Web Maximiliano Firtman,2010-07-23 Today's market for mobile apps goes beyond the iPhone to include BlackBerry, Nokia, Windows Phone, and smartphones powered by Android, webOS, and other platforms. Composing Media Composing Embodiment Kristin L Arola,Anne Wysocki,2012-03-31 "What any body is—and is able to do—cannot be disentangled from the media we use to consume and produce texts." ---from the Introduction. Kristin Arola and Anne Wysocki argue that composing in new media is composing the body—is embodiment. In Composing (Media) = Composing (Embodiment), they have brought together a powerful set of essays that agree on the need for compositionists—and their students—to engage with a wide range of new media texts. These chapters explore how texts of all varieties mediate and thereby contribute to the human experiences of communication, of self, the body, and composing. Sample assignments and activities exemplify how this exploration might proceed in the writing classroom. Contributors here articulate ways to understand how writing enables the experience of our bodies as selves, and at the same time to see the work of (our) writing in mediating selves to make them accessible to institutional perceptions and constraints. These writers argue that what a body does, and can do, cannot be disentangled from the media we use, nor from the times and cultures and technologies with which we engage. To the discipline of composition, this is an important discussion because it clarifies the impact/s of literacy on citizens, freedoms, and societies. To the classroom, it is important because it helps compositionists to support their students as they enact, learn, and reflect upon their own embodied and embodying writing.

Fearless Genius Doug Menuez,2014-06-03 An award-winning documentary photographer delivers a stunning visual history of the Silicon Valley

technology boom, in which he was witness to key moments in the careers of Steve Jobs and more than seventy other leading innovators as they created today's digital world. An eye-opening chronicle of the Silicon Valley technology boom, capturing key moments in the careers of Steve Jobs and more than seventy other leading innovators as they created today's digital world In the spring of 1985, a technological revolution was under way in Silicon Valley, and documentary photographer Doug Menuez was there in search of a story—something big. At the same time, Steve Jobs was being forced out of his beloved Apple and starting over with a new company, NeXT Computer. His goal was to build a supercomputer with the power to transform education. Menuez had found his story: he proposed to photograph Jobs and his extraordinary team as they built this new computer, from conception to product launch. In an amazing act of trust, Jobs granted Menuez unlimited access to the company, and, for the next three years, Menuez was able to get on film the spirit and substance of innovation through the day-to-day actions of the world's top technology guru. From there, the project expanded to include the most trailblazing companies in Silicon Valley, all of which granted Menuez the same complete access that Jobs had. Menuez photographed behind the scenes with John Warnock at Adobe, John Sculley at Apple, Bill Gates at Microsoft, John Doerr at Kleiner Perkins, Bill Joy at Sun Microsystems, Gordon Moore and Andy Grove at Intel, Marc Andreessen at Netscape, and more than seventy other leading companies and innovators. It would be fifteen years before Menuez stopped taking pictures, just as the dotcom bubble burst. An extraordinary era was coming to its close. With his singular behind-the-scenes access to these notoriously insular companies, Menuez was present for moments of heartbreaking failure and unexpected success, moments that made history, and moments that revealed the everyday lives of the individuals who made it happen. This period of rapid, radical change would affect almost every aspect of our culture and our lives in ways both large and small and would also create more jobs and wealth than any other time in human history. And Doug Menuez was there, a witness to a revolution. In more than a hundred photographs and accompanying commentary, Fearless Genius captures the human face of innovation and shows what it takes to transform powerful ideas into reality.

Data Algorithms Mahmoud Parsian,2015-07-13 If you are ready to dive into the MapReduce framework for processing large datasets, this practical book takes you step by step through the algorithms and tools you need to build distributed MapReduce applications with Apache Hadoop or Apache Spark. Each chapter provides a recipe for solving a massive computational problem, such as building a recommendation system. You'll learn how to implement the appropriate MapReduce solution with code that you can use in your projects. Dr. Mahmoud Parsian covers basic design patterns, optimization techniques, and data mining and machine learning solutions for problems in bioinformatics, genomics, statistics, and social network analysis. This book also includes an overview of MapReduce, Hadoop, and Spark. Topics include: Market basket analysis for a large set of transactions Data mining algorithms (K-means, KNN, and Naive Bayes) Using huge genomic data to sequence DNA and RNA Naive Bayes theorem and Markov chains for data and market prediction Recommendation algorithms and pairwise document similarity Linear regression, Cox regression, and Pearson correlation Allelic frequency and mining DNA Social network analysis (recommendation systems, counting triangles, sentiment analysis)

The End of the Future Stephanie Polsky,2019 Introduction: life on the algorithmic estate -- Conspiring worlds: emergent sovereign imaginaries in the first and second late Elizabethan Age -- Black mirror: binary apperception and digital racism -- Poverty and experience: Walter Benjamin's War in the age of vertical sovereignty -- Big blue: the Anthropocene and the advent of planetary finitude -- Epilogue: the futures of ends.

Electronic Literacies Mark Warschauer,1998-11-01 Electronic Literacies is an insightful study of the challenges and contradictions that arise as culturally and linguistically diverse learners engage in new language and literacy practices in online environments. The role of the Internet in changing literacy and education has been a topic of much speculation, but very little concrete research. This book is one of the first attempts to document the role of the Internet and other new digital technologies in the development of language and literacy. Warschauer looks at how the

nature of reading and writing is changing, and how those changes are being addressed in the classroom. His focus is on the experiences of culturally and linguistically diverse learners who are at special risk of being marginalized from the information society. Based on a two-year ethnographic study of the uses of the Internet in four language and writing classrooms in the state of Hawai'i--a Hawaiian language class of Native Hawaiian students seeking to revitalize their language and culture; an ESL class of students from Pacific Island and Latin American countries; an ESL class of students from Asian countries; and an English composition class of working-class students from diverse ethnic backgrounds--the book includes data from interviews with students and teachers, classroom observations, and analysis of student texts. This rich ethnographic data is combined with theories from a broad range of disciplines to develop conclusions about the relationship of technology to language, literacy, education, and culture. Central to Warschauer's discussion and conclusions is how contradictions of language, culture, and class affect the impact of Internet-based education. While Hawai'i is a special place, the issues confronted here are similar in many ways to those that exist throughout the United States and many other countries: How to provide culturally and linguistically diverse students traditionally on the educational and technological margins with the literacies they need to fully participate in public, community, and economic life in the 21st century.

Handbook of Japanese Sociolinguistics Yoshiyuki Asahi,Mayumi Usami,Fumio Inoue,2022-04-04 This volume is the first comprehensive survey of the sociolinguistic studies on Japanese. Japanese, like other languages, has developed a highly diverse linguistic system that is realized as variation shaped by interactions of linguistic and social factors. This volume primarily focuses on both classic and current topics of sociolinguistics that were first studied in Western languages, and then subsequently examined in the Japanese language. The topics in this volume cover major issues in sociolinguistics that also characterize sociolinguistic features of Japanese. Such topics as gender, honorifics, and politeness are particularly pertinent to Japanese, as is well-known in general sociolinguistics. At the same time, this volume includes studies on other topics such as social stratification, discourse, contact, and language policy, which have been widely conducted in the Japanese context. In addition, this volume introduces domestic approaches to sociolinguistics developed in Japan. They emerged a few decades before the development of the so-called Labovian and Hymesian sociolinguistics in the US, and they have shaped a unique development of sociolinguistic studies in Japan. Contents Part I: History Chapter 1: Research methodology Florian Coulmas Chapter 2: Japan and the international sociolinguistic community Yoshiyuki Asahi and J.K. Chambers Chapter 3: Language life Takehiro Shioda Part II: Sociolinguistic patterns Chapter 4: Style, prestige, and salience in language change in progress Fumio Inoue Chapter 5: Group language (shūdango) Taro Nakanishi Chapter 6: Male-female differences in Japanese Yoshimitsu Ozaki Part III: Language and gender Chapter 7: Historical overview of language and gender studies: From past to future Orie Endo and Hideko Abe Chapter 8: Genderization in Japanese: A typological view Katsue A. Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of

independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
