The Global Smartphone Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang,2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

Emoji Speak Jieun Kiaer,2023-05-18 Providing an in-depth discussion of emoji use in a global context, this volume presents the use of emoji as a hugely important facet of computer-mediated communication, leading author Jieun Kiaer to coin the term 'emoji speak'. Exploring why and how emojis are born, and the different ways in which people use them, this book highlights the diversity of emoji speak. Presenting the results of empirical investigations with participants of British, Belgian, Chinese, French, Japanese, Jordanian, Korean, Singaporean, and Spanish backgrounds, it raises important questions around the complexity of emoji use. Though emojis have become ubiquitous, their interpretation can be more challenging. What is humorous in one region, for example, might be considered inappropriate or insulting in another. Whilst emoji use can speed up our communication, we might also question whether they convey our emotions sufficiently. Moreover, far from belonging to the youth, people of all ages now use emoji speak, prompting Kiaer to consider the future of our communication in an increasingly digital world.

Online around the World Laura M. Steckman, Marilyn J. Andrews, 2017-05-24 Covering more than 80 countries around the world, this book provides a compelling, contemporary snapshot of how people in other countries are using the Internet, social media, and mobile apps. How do people in other countries use the social media platform Facebook differently than Americans do? What topics are discussed on the largest online forum—one in Indonesia, with more than seven million registered users? Why does Mongolia rate in the top-ten countries worldwide for peak Internet speeds? Readers of *Online around the World: A Geographic Encyclopedia of the Internet, Social Media, and Mobile Apps* will discover the answers to these questions and learn about people's Internet and social media preferences on six continents—outside of the online community of users within the United States. The book begins with an overview of the Internet, social media platforms, and mobile apps that chronologically examines the development of technological innovations that have made the Internet what it is today. The country-specific entries that follow the overview provide demographic information and describe specific events influenced by online communications, allowing readers to better appreciate the incredible power of online interactions across otherwise-unconnected individuals and the realities and peculiarities of how people communicate in today's fast-paced, globalized, and high-technology environment. This encyclopedia presents social media and the Internet in new light, identifying how the use of language and the specific application of human culture impacts emerging technologies and communications, dramatically affecting everything from politics to social activism, education, and censorship.

Emotion in Discourse J. Lachlan Mackenzie, Laura Alba-Juez, 2019-03-15 Interest in human emotion no longer equates to unscientific speculation. 21st-century humanities scholars are paying serious attention to our capacity to express emotions and giving rigorous explanations of affect in language. We are unquestionably witnessing an 'emotional turn' not only in linguistics, but also in other fields of scientific research. *Emotion in Discourse* follows from and reflects on this scholarly awakening to the world of emotion, and in particular, to its intricate relationship with human language. The book presents both the state of the art and the latest research in an effort to unravel the various workings of the expression of emotion in discourse. It takes an interdisciplinary approach, for emotion is a multifarious phenomenon whose functions in language are enlightened by such other disciplines as psychology, neurology, or communication studies. The volume shows not only how emotion manifests at different linguistic levels, but also how it relates to aspects like linguistic appraisal, emotional intelligence or humor, as well as covering its occurrence in various genres, including scientific discourse. As such, the book contributes to an emerging interdisciplinary field which could be labeled "emotionology", transcending previous linguistic work and providing an updated characterization of how emotion functions in human discourse.

Lo Smartphone Globale: Non solo una tecnologia per giovani Daniel Miller ,Laila Abed Rabho,Patrick Awondo,Maya de Vries ,Marília Duque,Pauline Garvey,Laura Haapio-Kirk ,Charlotte Hawkins,Alfonso Otaegui,Shireen Walton,Xinyuan Wang ,Stephanie Engola,2021-12-09 Se c'è una cosa che abbiamo sempre, letteralmente, sotto il naso, è lo smartphone. Ed è normale credere, dunque, che sappiamo cosa sia. Ma è davvero così? Per scoprirlo, 11 antropologi hanno trascorso 16 mesi in varie comunità in Africa, Asia, Europa e Sud America per osservare il modo in cui gli anziani utilizzano lo smartphone, e la loro ricerca ha rivelato che si tratta di una tecnologia rivolta a tutti, non solo ai giovani. Lo smartphone globale presenta i risultati frutto di questo progetto di ricerca comparativa di respiro globale. Gli smartphone sono diventati tanto un luogo in cui viviamo, quanto un dispositivo di 'opportunismo perpetuo' da cui non ci separiamo mai. Gli autori hanno dimostrato che lo smartphone è molto più di un 'contenitore di app', concentrandosi sulle differenze tra ciò che le persone dicono sugli smartphone e il modo in cui li usano. Nessun dispositivo aveva mai raggiunto un tale livello di 'trasformabilità' – trasformabilità che si concretizza nella capacità di assimilare rapidamente i nostri valori personali. Per poterlo comprendere, dunque, dobbiamo tener presente un'ampia gamma di sfumature nazionali e culturali, quali la comunicazione visiva in Cina e Giappone, i trasferimenti di denaro sotto forma di credito telefonico in Camerun e in Uganda, e l'accesso a informazioni mediche in Cina e Irlanda, oltre alle diverse traiettorie della terza età ad Al Quds, in Brasile e in Italia. Solo allora potremo sapere davvero cos'è uno smartphone e capire appieno l'impatto che ha sulla vita delle persone in tutto il mondo.

Interactional Humor Béatrice Priego-Valverde,2023-12-04 The central question explored in this volume is: How is humor multimodally produced, perceived, responded to, and negotiated? To this end, it offers a panorama of linguistic research on multimodal and interactional humor, based on different theoretical frameworks, corpora, and methodologies. Humor is considered as an activity that is interactionally achieved, regardless of whether the interaction in which it is embedded is face-to-face, computer-mediated, with a human or a robot, oral or written. The aim is to analyze both the linguistic resources of the participants (such as their lexicon, prosody, gestures, gazes, or smiles) and the semiotic resources that social networks and instant messaging platforms offer them (such as memes, gifs, or emojis).

Le Smartphone Global: Au-delà d'une culture jeune Alfonso Otaegui,Charlotte Hawkins,Daniel Miller,Laila Abed Rabho,Laura Haapio-Kirk,Marília Duque,Maya de Vries,Patrick Awondo,Pauline Garvey,Shireen Walton,Xinyuan Wang,2022-02-10 Le smartphone est généralement sous notre nez au point où l'on pense tout savoir de lui. Mais savons-nous réellement ce que c'est ? Pour le comprendre, 11 anthropologues ont passé chacun 16 mois dans des communautés en Afrique, en Asie, en Europe et en Amérique du Sud pour analyser l'utilisation des smartphones par les personnes âgées. Leur recherche montre que les smartphones sont une technologie pour tous, qui n'est pas seulement dédiée aux jeunes. Le Smartphone Global présente une série de perspectives originales qui découle de ce projet de recherche international et comparatif. Les smartphones sont devenus autant un lieu de vie qu'un appareil que nous utilisons pour un « opportunisme permanent », parce que nous les portons toujours avec nous. Les auteurs démontrent que le smartphone est plus qu'un dispositif pour des applications et explorent les différences entre ce que disent les gens à propos du smartphone et la façon dont ils l'utilisent. Le smartphone est sans pareil dans la mesure où nous pouvons le transformer. Par conséquent, il est rapidement assimilé aux valeurs personnelles. Pour le comprendre, nous devons prendre en compte une gamme de nuances nationales et culturelles,

notamment la communication visuelle en Chine et au Japon, le transfert d'argent au Cameroun et en Ouganda et l'accès aux informations sanitaires au Chili et en Irlande, ainsi que diverses trajectoires de vieillissement à Al-Quds, au Brésil et en Italie. Ce n'est qu'au terme de cela que nous pouvons cerner la nature d'un smartphone et comprendre ses conséquences sur les vies humaines dans le monde.

Mobile Messaging and Resourcefulness Caroline Tagg, Agnieszka Lyons, 2022-03-23 This book advocates a new post-digital linguistic ethnography approach to unpacking mobile communication and enabling a more informed understanding of individuals' communicative practices in cities today. Drawing on data from a group of ordinary working people, multilingual individuals from superdiverse cities across the United Kingdom, the volume brings observations from this data together to form a new concept of 'resourcefulness' as a means of explaining the emergent sense of agency individuals develop towards remediating existing forms of technology in their everyday lives. The book in turn establishes the notion of the 'networked individual' by way of demonstrating the ways in which communicative practices cross spaces and platforms. Further chapters detail examples to highlight resourcefulness at work in enabling more efficient business communication, routes to self-expression and the creation and development of social support systems, while a concluding chapter looks at both the limitations and possibilities of resourcefulness and directions for future research. This innovative volume will be of particular interest to students and researchers in applied linguistics, sociolinguistics, linguistic ethnography, and media and communication studies.
