*The Fifteen Schoolgirls* Dick Tahta,2006-10-01 A famous problem found in books on mathematical recreations was first proposed in an annual in 1850 by a vicar and amateur mathematician, Thomas Kirkman. Fifteen schoolgirls walk out three abreast for seven days and it was required to arrange each day's walk so that any pair of girls were only once in the same row during the week. The puzzle arose

from Kirkman's work on a more general mathematical problem which he was to explore in a number of published articles over the next few years. Much of his work was ignored at the time, but it involved various combinatorial ideas that have now become of some interest and importance. He was also interested in a range of other mathematics, such as the theory of polyhedra, the newly developing theory of groups, and the classification of knots. He was respected by many of his professionals and was elected a Fellow of the Royal Society. This book presents a brief account of the original problem and some of the ways it has been generalised and eventually solved. It also surveys in a not too technical way, some of the other work of a remarkable nineteenth-century polymath.

The Rust Programming Language (Covers Rust 2018) Steve Klabnik, Carol Nichols, 2019-09-03

The official book on the Rust programming language, written by the Rust development team at the Mozilla Foundation, fully updated for Rust 2018. The Rust Programming Language is the official book on Rust: an open source systems programming language that helps you write faster, more reliable software. Rust offers control over low-level details (such as memory usage) in combination with high-level ergonomics, eliminating the hassle traditionally associated with low-level languages. The authors of The Rust Programming Language, members of the Rust Core Team, share their knowledge and experience to show you how to take full advantage of Rust's features--from installation to creating robust and scalable programs. You'll begin with basics like creating functions, choosing data types, and binding variables and then move on to more advanced concepts, such as: Ownership and borrowing, lifetimes, and traits Using Rust's memory safety guarantees to build fast, safe programs Testing, error handling, and effective refactoring Generics, smart pointers, multithreading, trait objects,

and advanced pattern matching Using Cargo, Rust's built-in package manager, to build, test, and document your code and manage dependencies How best to use Rust's advanced compiler with compiler-led programming techniques You'll find plenty of code examples throughout the book, as well as three chapters dedicated to building complete projects to test your learning: a number guessing game, a Rust implementation of a command line tool, and a multithreaded server. New to this edition: An extended section on Rust macros, an expanded chapter on modules, and appendixes on Rust development tools and editions.

The Canterbury Puzzles H. E. Dudeney,2002-10-01 This book includes 110 puzzles, not as individual problems but as incidents in connected stories. The first 31 are amusingly posed by pilgrims in Chaucer's Canterbury Tales. Additional puzzles are presented using different characters. Many require only the ability to exercise logical or visual skills; others offer a stimulating challenge to the mathematically advanced.

*Ditch That Textbook* Matt Miller,2015-04-13 Textbooks are symbols of centuries-old education.

They're often outdated as soon as they hit students' desks. Acting by the textbook implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning. In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

**Millennials Killed the Video Star** Amanda Ann Klein, 2021-01-04 Between 1995 and 2000, the number of music videos airing on MTV dropped by 36 percent. As an alternative to the twenty-four-hour video jukebox the channel had offered during its early years, MTV created an original cycle of scripted reality shows, including *Laguna Beach*, *The Hills*, *The City*, *Catfish*, and *Jersey Shore*, which were aimed at predominantly white youth audiences. In *Millennials Killed the Video Star* Amanda Ann Klein examines the historical, cultural, and industrial factors leading to MTV's shift away from music videos to reality programming in the early 2000s and 2010s. Drawing on interviews with industry workers from programs such as *The Real World* and *Teen Mom*, Klein demonstrates how MTV generated a coherent discourse on youth and identity by intentionally leveraging stereotypes about race, ethnicity, gender, and class. Klein explores how this production cycle, which showcased a variety of ways of being in the world, has played a role in identity construction in contemporary youth culture—ultimately shaping the ways in which Millennial audiences of the 2000s thought about, talked about, and embraced a variety of identities.

**Teach with Magic** Kevin Roughton, 2021-05 *Learn from the Engagement Masters* Education is a battle for attention. Whether you are a teacher trying to reach a classroom full of students or a parent trying to prepare your child for the world to come, getting our audience to just listen can be a real challenge. When students have access to personalized entertainment sitting in their pockets, anything that doesn't jump out and grab their attention right away is easily drowned out. But there is a place where even today all those modern distractions melt away--Disneyland. When you're there, you're not only in a different world, you're in Walt Disney's world. Whether you are Peter Pan flying over London in Fantasyland or a rebel fighter struggling against the First Order in *Galaxy's Edge*, you are 100% engaged. Sights, sounds and even smells ensure that your brain is locked into the experience. If we can bring those techniques into our teaching, we can create engaging experiences for our students, grab their attention, and boost their learning. You'll improve your teaching and create a place students want to visit. In this book we'll learn from the world's greatest engagement masters--the Disney

Imagineers. Through narrative visits to attractions throughout Disneyland and Disney California Adventure, you'll experience a visit to the park as we share memories and see how the Imagineers make it all work. We'll be guided by Imagineering icon Marty Sklar's Mickey's 10 Commandments of Theme Park Design as we turn our classrooms into the most engaging places on Earth!

*EDrenaline Rush* John Meehan, 2019-06-16 What if going to school captured the thrills and excitement of a theme park? Just imagine what your classroom would be like if the activities inside elicited the same sense of fun and exhilaration as a roller coaster! How much more engaged would your students be if your curriculum were filled with the same mystery and mastery they found in an escape room full of puzzles and surprising twists? School should be fun! In *EDrenaline Rush*, John Meehan pulls back the curtain on what it takes to create thrilling learning experiences in your classroom. Packed with lesson planning tips, instructional design ideas, and plug-and-play teaching resources, *EDrenaline Rush* will challenge you to think differently and equip you to push your pedagogy to incredible limits. Create classrooms where students willingly step outside of their comfort zones and boldly dare to attempt the impossible. Packed with practical tips and great writing that will have you coming back for more of his dynamic, rigorous approach to classroom teaching. --Alexis Wiggins, teacher and author of *The Best Class You Never Taught This* is a must-buy and should be a must-implement for anyone who wants to create positive change in their schools. --Michael Matera, teacher and author of *eXPlore Like a Pirate Every classroom can be filled with 'student-centered adrenaline, '* and after reading *EDrenaline Rush* you will be motivated to make it happen. --Scott Rocco, EdD, Hamilton Township (NJ) School District Superintendent and co-author of *140 Twitter Tips for Educators* and *Hacking Google for Education* *EDrenaline Rush* is the ultimate surprise and delight! --Monica Cornetti, CEO of Sententia Gamification, GamiCon Gamemaster

*little scratch* Rebecca Watson, 2020-08-11 Extraordinary--THE NEW YORKER In the formally innovative tradition of *Grief Is the Thing with Feathers* and *Ducks*, Newburyport comes a dazzlingly original, shot-in-the-arm of a debut that reveals a young woman's every thought over the course of one deceptively ordinary day. She wakes up, goes to work. Watches the clock and checks her phone. But underneath this monotony there's something else going on: something under her skin. Relayed in interweaving columns that chart the feedback loop of memory, the senses, and modern distractions with wit and precision, our narrator becomes increasingly anxious as the day moves on: Is she overusing the heart emoji? Isn't drinking eight glasses of water a day supposed to fix everything? Why is the etiquette of the women's bathroom so fraught? How does she define rape? And why can't she

stop scratching? Fiercely moving and slyly profound, little scratch is a defiantly playful look at how our minds function in--and survive--the darkest moments.

*Computational Thinking* Karl Beecher,2017-08-11 Computational thinking (CT) is a timeless, transferable skill that enables you to think more clearly and logically, as well as a way to solve specific problems. With this book you'll learn to apply computational thinking in the context of software development to give you a head start on the road to becoming an experienced and effective programmer.

*Things We Don't Talk about* Pandora Owl,2019-01-27 Things we don't talk about is a collection of words, thoughts and poetry about love, anxiety, depression and overall mental health. It can get a little too raw for some and a little too real for others.

*The Boy with Big, Big Feelings* Britney Winn Lee,2019-08-20 Meet a boy with feelings so big that they glow from his cheeks, spill out of his eyes, and jump up and down on his chest. When a loud truck drives by, he cries. When he hears a joke, he bursts with joy. When his loved ones are having a hard day, he feels their emotions as if they were his own. The boy tries to cope by stuffing down his feelings, but with a little help and artistic inspiration, the boy realizes his feelings are something to be celebrated. Written by debut picture book author Britney Winn Lee and boldly illustrated by Jacob Souva, *The Boy with Big, Big Feelings* is relatable for any child, but especially for children experiencing anxiety and extreme emotions, or who have been diagnosed with autism or as a Highly Sensitive Person.
