WhatsApp Amelia Johns,Ariadna Matamoros-Fernández,Emma Baulch,2023-11-28 In the 2010s, as chat apps became a primary mode of communication for many people across the world, WhatsApp quickly outpaced rival messaging apps and developed into a platform. In this book, the authors provide a comprehensive account of WhatsApp's global growth. Charting WhatsApp's evolution from its founding in 2009 to the present day, they argue that WhatsApp has been transformed from a simple, 'gimmickless' app into a global communication platform. Understanding this development can shed light on the trajectory of Meta's industrial development, and how digital economies and social media landscapes are evolving with the rise of 'superapps'. This book explores how WhatsApp's unique characteristics mediate new kinds of social and commercial transactions; how they pose new opportunities and challenges for platform regulation, civic participation and democracy; and how they give rise to new kinds of digital literacy as WhatsApp becomes integrated into everyday digital cultures across the globe. Accessibly written, this book is an essential resource for students and scholars of digital media, cultural studies, and media and communications.

Interactional Humor Béatrice Priego-Valverde,2023-12-04 The central question explored in this volume is: How is humor multimodally produced, perceived, responded to, and negotiated? To this end, it offers a panorama of linguistic research on multimodal and interactional humor, based on different theoretical frameworks, corpora, and methodologies. Humor is considered as an activity that is interactionally achieved, regardless of whether the interaction in which it is embedded is face-to-face, computer-mediated, with a human or a robot, oral or written. The aim is to analyze both the linguistic resources of the participants (such as their lexicon, prosody, gestures, gazes, or smiles) and the semiotic resources that social networks and instant messaging platforms offer them (such as memes, gifs, or emojis).

Digital Phenotyping and Mobile Sensing Christian Montag,Harald Baumeister,2022-07-22 This book offers a snapshot of cutting-edge applications of digital phenotyping and mobile sensing for studying human behavior and planning innovative e-healthcare interventions. The respective chapters, written by authoritative researchers, cover both theoretical perspectives and good scientific and professional practices related to the use and development of these technologies. They share novel insights into established applications of mobile sensing, such as predicting personality or mental and behavioral health on the basis of smartphone usage patterns, and highlight emerging trends, such as the use of machine learning, big data and deep learning approaches, and the combination of mobile sensing with AI and expert systems. Important issues relating to privacy and ethics are analyzed, together with selected case studies. This thoroughly revised and extended second edition provides researchers and professionals with extensive information on the latest developments in the field of digital phenotyping and mobile sensing. It gives a special emphasis to trends in diagnostics systems and AI applications, suggesting important future directions for research in public health and social sciences.

Emoji Speak Jieun Kiaer,2023-05-18 Providing an in-depth discussion of emoji use in a global context, this volume presents the use of emoji as a hugely important facet of computer-mediated communication, leading author Jieun Kiaer to coin the term 'emoji speak'. Exploring why and how emojis are born, and the different ways in which people use them, this book highlights the diversity of emoji speak. Presenting the results of empirical investigations with participants of British, Belgian, Chinese, French, Japanese, Jordanian, Korean, Singaporean, and Spanish backgrounds, it raises important questions around the complexity of emoji use. Though emojis have become ubiquitous, their interpretation can be more challenging. What is humorous in one region, for example, might be considered inappropriate or insulting in another. Whilst emoji use can speed up our communication, we might also question whether they convey our emotions sufficiently. Moreover, far from belonging to the youth, people of all ages now use emoji speak, prompting Kiaer to consider the future of our communication in an increasingly digital world.

Language, Corpora, and Technology in Applied Linguistics Muhammad Afzaal,Swaleha Bano Naqvi,Geng Qiang,2023-11-27 As culture and society has become more digitalized, especially when computer science and digital technologies have entered a new era in the twenty-first century, translation studies began to utilize a wide range of tools to enhance its reading of texts and contexts, without which translation both as a practice and as a theorization could barely persist. It has become more apparent that two extreme poles between macro and micro visions have formed the diversified terrains of translation studies. On the one hand, technologies like NLP, topic modeling, network analysis and data visualization make distant reading become possible, thus allowing us to have a paradigmatic view of how human's ideas, beliefs, values, knowledge and even emotions have spread in some patterns across cultural, geographical and language divides in world history. On the other hand, corpus methods, such as the use of keywords, collocates and

concordance lines changed the way by which texts were closely read from linear to vertical. With microscope like corpus tools, we could go deeper into the texture for perception of nuanced meaning. While considering a fact that translation is seldom mono modal in conveying meaning, we have to reconceptualize context as a multimodal environment where audio, visual and other resources interact to convey and make meaning. With regard to the fast development of digital technology, translation studies take an active role in gaining an enhanced capability in promoting transformation. Complexity has been favored in terms of theoretical framework and methodology. New questions are asked; old ones revisited with novel tools; but more areas wait to be cultivated and more questions to be approached by combining quantitative and qualitative methods. We could ask if digital technologies would bring new innovation to study of translation history, a heavily-walled land for traditional humanists who tend to repeat “so-what” to question the less significance of data-driven studies. The idea of high-quality machine translation has become so realistic in today’s market that translation educators have to face the shock wave it brought to translation learners and practitioners and rethink the relation between human translators and algorithms. Machine-translation-assisted communication could help remove boundaries for better communication; but at the same time, it also creates conflicts and leads to confrontation. Thus understood, it is imperative to give a concerned attention to digital translation studies, that is, to study translation by resorting to and drawing on the digital technologies. This Research Topic is intended to promote current directions and new developments in cross-disciplinary critical discourse research. We welcome papers which, from a critical-analytical perspective, deal with contemporary social, scientific, political, economic, or professional discourses and genres. Papers addressing the highlighted topics are especially welcome. In giving weight to these topics, we wish to call to attention some of the most pressing problems currently facing the world.
