Technology, Outsourcing & Transforming HR Graeme Martin, 2008-02-22 This book examines the progress made in e-enabling the HR function and the relationship with outsourcing. The editors will review and analyse recent developments in the application of outsourcing and ICT to the HR function and its overall contribution to organizational aims. This text aims to fill the gap in current literature, by providing accessible guidance on how to tackle the e-enablement of the function and on the factors associated with successful outsourcing. There is no single text that adequately deals with this increasingly important problem and which has been recognised by the CIPD as a key area of research for their forward programme. The contributors all have leading-edge knowledge and practical

experience and aim to provide practical guidance for organizations and HR professionals.

Operations Management and Sustainability Luitzen de Boer, Poul Houman Andersen, 2018-09-03
This edited book presents cutting edge international research in operations management sustainability and topical research themes. As the sustainability agenda gains greater prominence and momentum throughout society, business actors and stakeholders are increasingly concerned with the impact of current business operations. There is a growing need for OM research and practice which reflects these concerns. Based on demands from industry and society at large, universities and schools now develop academic programs which are meant to serve this need – yet there is no clear and manifest research program concerning OM and sustainability. This book is of use to both researchers orientating themselves in this new and exciting field and educators seeking inspiration to develop new courses.
