Mobilities in India Bhaswati Mondal, Gopa Samanta, 2021-07-26 This book presents commuting as a new paradigm in mobility studies in the context of global south. It delves into suburban train commuting in Eastern India. The book interprets commuting not only as a means to attend work but also as a process producing kinetic event-space infused with different mobile practices, which is not determined by their locational fixity, rather can be cognized. It analyses the role of suburban train commuting in the metropolitan expansion of Kolkata, and the transformation of rural space into urban. The significant contribution of the book lies in explaining commuters' experiencescape and the production of spatial fluidity in time capsule through commuting. It also explores the subjective reality of gendered commuting. The book uses a trans-disciplinary research design, blending quantitative and ethnographic research methods. The area selected for the empirical research is the Howrah-Bardhaman Main Railway Line (108 km), the first suburban railway line in Eastern India. Commuters originating from three adjacent districts of Purba Bardhaman, Hooghly and Howrah took part in this research. Besides the commuters, non-commuting passengers and hawkers in the train were also interviewed to understand the diverse perceptions of the process of commuting. This book may be considered as a reference book for mobility studies, transport studies, urban geography and regional planning.

Gray Hat Python Justin Seitz,2009-04-15 Python is fast becoming the programming language of choice for hackers, reverse engineers, and software testers because it's easy to write quickly, and it has the low-level support and libraries that make hackers happy. But until now, there has been no real manual on how to use Python for a variety of hacking tasks. You had to dig through forum posts and man pages, endlessly tweaking your own code to get everything working. Not anymore. Gray Hat Python explains the concepts behind hacking tools and techniques like debuggers, trojans, fuzzers, and emulators. But author Justin Seitz goes beyond theory, showing you how to harness existing Python-based security tools—and how to build your own when the pre-built ones won't cut it. You'll learn how to: –Automate tedious reversing and security tasks –Design and program your own debugger –Learn how to fuzz Windows drivers and create powerful fuzzers from scratch –Have fun with code and library injection, soft and hard hooking techniques, and other software trickery –Sniff secure traffic out of an encrypted web browser session –Use

PyDBG, Immunity Debugger, Sulley, IDAPython, PyEMU, and more The world's best hackers are using Python to do their handiwork. Shouldn't you?

*Emu* Claire Saxby,2015-04-28 Did you know it's the emu father who protects the chicks? Follow a doting dad as he keeps his brood safe—from when they're granite-green eggs until they're all grown up. In the open eucalyptus forest of Australia, an emu as tall as a human settles down on his nest to warm and protect the eggs left by his mate. When they hatch, the chicks will be ten times bigger than domestic chicken hatchlings and covered in chocolate-and-cream stripes to provide camouflage in the grasslands. This unusual family sticks together until the hatchlings grow up, facing dangers that include eagles and dingoes. Ornithologically inclined youngsters will delight in this visually striking chronicle full of fun emu facts.

Dynamic Interaction of Train-Bridge Systems in High-Speed Railways He Xia,Nan Zhang,Weiwei Guo,2017-10-27 This book presents both the fundamental theory and numerical calculations and field experiments used in a range of practical engineering projects. It not only provides theoretical formulations and various solutions, but also offers concrete methods to extend the life of existing bridge structures and presents a guide to the rational design of new bridges, such as high-speed railway bridges and long-span bridges. Further, it offers a reference resource for solving vehicle–structure dynamic interaction problems in the research on and design of all types of highways, railways and other transport structures.

**Shaping the New Europe** M. Landesmann,D. Rosati,2004-04-30 This volume brings together contributions on the major economic policy issues which have opened up as a result of the immanent process of European Union Enlargement. The issues analyzed range from modelling and analyzing the costs and benefits of enlargement, to challenges for macroeconomic policy both at the EU level and in the new member countries to the state of affairs in the new member countries with respect to sectoral policy reforms such as those undertaken in the financial sector and in competition policy, and the impact of enlargement on Europe's trade policy agenda.

**On Your Mark!** Bob Parks,2018-07-24 Hall of Fame Coach Bob Parks' personal account of 34 years of Coaching EMU Track and Cross Country. Eastern Michigan University's legendary track and cross country coach Bob Parks tells it as it happened, year by year: the meets, the victories, the defeats, and the drama that comes with the territory, all written by the coach who guided EMU's storied Division I Track and Cross Country program for over 33 years. In

his 34 years at the helm of the EMU track and field program, Bob Parks led the Hurons to 31 Mid-American conference titles in track and cross country, 13 MAC invitational titles, and nine NAIA/Division II titles. He had 286 MAC and Central Collegiate Champions, 31 NAIA/NCAA Champions, and earned 26 MAC Coach of the Year honors and eight NCAA Regional Coach of the Year honors. His runners also made their mark on the ultimate international track stage, the Olympic Games, where 10 of his athletes made 16 appearances in the Olympics. Former EMU great Hasely Crawford won the Gold Medal in the 100-meter dash at the 1976 Olympics for Trinidad-Tobago, and former Eastern standout Earl Jones won the Bronze Medal in the 800-meter run for the United States in the 1984 Olympics. On Your Mark follows EMU's renowned program from 1967 to 2000--the Olympic athletes it helped produce, the friendships it forged, the lives it changed. Coach Parks holds nothing back in this in-depth, insider's look at an extraordinary career.

Principles of Railway Location and Design Sirong Yi, 2017-10-25 Principles of Railway Location and Design examines classification and classing methods of railway networks and expresses theories and methods of railway

route selection and design. Railway networks represent modal transfer, which significantly alleviates traffic congestion and pollution. The book introduces capacity enhancing methods for existing railways and implementation plans and technical conditions for improving existing passenger railways, building new high speed railways and developing heavy haul railways. The book covers ten areas of unfavorable geological conditions including slide areas, debris flow areas and earthquake areas. Practical solutions with detailed presentations have been provided. This valuable reference book summarizes and extracts the high speed railway route selection design. The book covers basic principles and methods by referring to research data of high speed railway technology in China and other countries, as well as engineering practice data. Provides classification and classing methods of railway networks, integrated with principles and methods of railway route selection and design. Describes enhancing methods for existing railways, and an implementation plan for existing passenger railways, new high speed railways and heavy haul railways. Presents route selection principles and methods for regions with bad geological conditions, including landslide, debris flow and earthquake.
