Application Performance Management (APM) in the Digital Enterprise Rick Sturm,Carol

Pollard,Julie Craig,2017-02-11 Application Performance Management (APM) in the Digital Enterprise enables IT professionals to be more successful in managing their company's applications. It explores the fundamentals of application management, examines how the latest technological trends impact

application management, and provides best practices for responding to these changes. The recent surge in the use of containers as a way to simplify management and deploy applications has created new challenges, and the convergence of containerization, cloud, mobile, virtualization, analytics, and automation is reshaping the requirements for application management. This book serves as a guide for understanding these dramatic changes and how they impact the management of applications, showing how to create a management strategy, define the underlying processes and standards, and how to select the appropriate tools to enable management processes. Offers a complete framework for implementing effective application management using clear tips and solutions for those responsible for application management. Draws upon primary research to give technologists a current understanding of the latest technologies and processes needed to more effectively manage large-scale applications. Includes real-world case studies and business justifications that support application management investments.

Adopting Information Systems Perspectives from Small Organizations Özgün Imre, 2017-12-08

Why do organizations adopt information systems? Is it just because of financial reasons, of concerns for efficiency? Or is it due to external pressures, such as competitor pressure, that an organization adopts an information system? And, how does the adoption take place? Is it a linear process, or is the process one of conflicts? Does a specific person govern this process, or do we have multiple parties involved? What happens if these conflicts occur among those involved? How does the organization move on and achieve a successful information system adoption? By investigating two organizations, one international academic journal and one South American manufacturing company, this thesis aims to investigate the whys and hows of information system adoption, and aims to contribute to the discourse on information system adoptions in small organizations – an often underrepresented segment in information system adoption literature. By adopting different theoretical lenses throughout the five research papers included, this body of work suggests that even when seemingly simple, information system adoptions can become rather complex. The cases reveal that the role of information systems and issues related to information system adoptions are often not well thought-out in the early days of the organization. The actors' understandings of adoption and consequences mature and the information systems become more intertwined. Common use of stakeholder theory introduces general stakeholders and their interaction with the focal organization. The cases reveal that

the adoption process involves multiple actors, even within what would initially appear as a stakeholder, and that those actors can be in conflict with each other. These conflicts often lead to negotiations, and the cases reveal that these negotiations are opportunities of learning; the actors engage with the information system and with each other, gaining new knowledge about the issues at hand. The dissertation argues that there are various social worlds in information system adoptions, and various factors – ranging from organizational structure to social norms – that often affect why and how the organization undergoes an adoption process. The multiple power relations and divergent interests of stakeholders in these adoption processes, and how information systems affect other parts of the organization, reinforce the need for a well thought-out, flexible and reflexive approach to information system adoptions.

Wild Wonders of Europe Staffan Widstrand, Peter Cairns, Florian Möllers, Bridget Wijnberg, 2010-10
Presents an astonishing view of the continent's flora and fauna and reveals the wildlife and landscapes of all 48 European countries. With a focus on conservation and reintroducing vulnerable species to their natural habitats, the accompanying texts express hope for the future of European biodiversity.

ZAG Marty Neumeier, 2006-09-20 When everybody zigs, zag, says Marty Neumeier in this fresh view of brand strategy. ZAG follows the ultra-clear whiteboard overview style of the author's first book, THE BRAND GAP, but drills deeper into the question of how brands can harness the power of differentiation. The author argues that in an extremely cluttered marketplace, traditional differentiation is no longer enough—today companies need “radical differentiation” to create lasting value for their shareholders and customers. In an entertaining 3-hour read you'll learn: - why me-too brands are doomed to fail - how to read customer feedback on new products and messages - the 17 steps for designing “difference” into your brand - how to turn your brand's “onliness” into a “trueline” to drive synergy - the secrets of naming products, services, and companies - the four deadly dangers faced by brand portfolios - how to “stretch” your brand without breaking it - how to succeed at all three stages of the competition cycle From the back cover: In an age of me-too products and instant communications, keeping up with the competition is no longer a winning strategy. Today you have to out-position, out-maneuver, and out-design the competition. The new rule? When everybody zigs, zag. In his first book, THE BRAND GAP, Neumeier showed companies how to bridge the distance between business strategy and design. In ZAG, he illustrates the number-one strategy of high-performance brands—radical differentiation. ZAG is an AIGA Design Press book, published under Peachpit's New Riders imprint in partnership with AIGA. For a quick peek inside ZAG, go to www.zagbook.com.

Make Your Art No Matter What Beth Pickens, 2021-04-06 The Artist's Way for the 21st century—from esteemed creative counselor Beth Pickens. If you are an artist, you need to make your art. That's not an overstatement—it's a fact; if you stop doing your creative work, your quality of life is diminished. But what do you do when life gets in the way? In this down-to-earth handbook, experienced artist coach Beth Pickens offers practical advice for developing a lasting and meaningful artistic practice in the face of life's inevitable obstacles and distractions. This thoughtful volume suggests creative ways to address the challenges all artists must overcome—from making decisions about time, money, and education, to grappling with isolation, fear, and anxiety. No matter where you are in your art-making journey, this book will motivate and inspire you. Because not only do you need your art—the world needs it, too. • **EXPERT ADVICE:** Beth Pickens is an experienced and passionate arts advocate with extensive insight into working through creative obstacles. She has spent the last decade advising artists on everything from financial strategy to coping with grief. • **PRACTICAL AND POSITIVE:** This book is both a love letter to art and artists and a hands-on guide to approaching the thorniest problems those artists might face. Pickens offers a warm reminder that you are not alone,

that what you do matters, and that someone out there wants you to succeed. • TIMELESS TOPIC: Like a trusted advisor, this book is an invaluable resource jam-packed with strategies for building a successful creative practice. From mixing business and friendship to marketing yourself on social media, this book can help. And it will—again and again. Perfect for: • Visual artists and makers • Writers, musicians, filmmakers, and other creatives • Art and design school graduates and grad-gift givers

System Identification Lennart Ljung, 1998-12-29 The field's leading text, now completely updated. Modeling dynamical systems — theory, methodology, and applications. Lennart Ljung's *System Identification: Theory for the User* is a complete, coherent description of the theory, methodology, and practice of System Identification. This completely revised Second Edition introduces subspace methods, methods that utilize frequency domain data, and general non-linear black box methods, including neural networks and neuro-fuzzy modeling. The book contains many new computer-based examples designed for Ljung's market-leading software, System Identification Toolbox for MATLAB. Ljung combines careful mathematics, a practical understanding of real-world applications, and extensive exercises. He introduces both black-box and tailor-made models of linear as well as non-linear systems, and he describes principles, properties, and algorithms for a variety of identification techniques: Nonparametric time-domain and frequency-domain methods. Parameter estimation methods in a general prediction error setting. Frequency domain data and frequency domain interpretations. Asymptotic analysis of parameter estimates. Linear regressions, iterative search methods, and other ways to compute estimates. Recursive (adaptive) estimation techniques. Ljung also presents detailed coverage of the key issues that can make or break system identification projects, such as defining objectives, designing experiments, controlling the bias distribution of transfer-function estimates, and carefully validating the resulting models. The first edition of *System Identification* has been the field's most widely cited reference for over a decade. This new edition will be the new text of choice for anyone concerned with system identification theory and practice.

The JHipster Mini-Book Matt Raible, 2016-11-25 The things you need to do to set up a new software project can be daunting. First, you have to select the back-end framework to create your API, choose your database, set up security, and choose your build tool. Then you have to choose the tools to create your front end: select a UI framework, configure a build tool, set up Sass processing, configure your browser to auto-refresh when you make changes, and configure the client and server so they work in unison. If you're building a new application using Spring Boot and Angular, you can

save days by using JHipster. JHipster generates a complete and modern web app, unifying: - A high-performance and robust Java stack on the server side with Spring Boot - A sleek, modern, mobile-first front-end with Angular and Bootstrap - A robust microservice architecture with the JHipster Registry, Netflix OSS, the ELK stack, and Docker - A powerful workflow to build your application with Yeoman, Webpack, and Maven/Gradle

The Re-Birth of the Company Town Matevz Straus, Razvan Zamfira, 2016-10-25 Clusters, technopoles, milieus of innovation, science parks, company towns, corporate campuses and all other silicon-things are based on one simple idea - the idea of agglomeration effects. The core belief behind this approach is that physical and social proximity of companies coupled with institutional influence - generates spillover effects that are a source of new innovation and value creation. The current book explores the ever-changing relationship between businesses, society and space, documents the historical, present and coming examples of corporate landscapes, and envisions a future, in which innovative and socially-responsible companies will create inspiring, lively and socially-just urban environments.

Exploring C2 Capability and Effectiveness in Challenging Situations Magdalena Granåsen, 2019-05-27 Modern societies are affected by various threats and hazards, including natural disasters, cyber-attacks, extreme weather events and inter-state conflicts. Managing these challenging situations requires immediate actions, suspension of ordinary procedures, decision making under uncertainty and coordinated action. In other words, challenging situations put high demands on the command and control (C2) capability. To strengthen the capability of C2, it is vital to identify the prerequisites for effective coordination and direction within the domain of interest. This thesis explores C2 capability and effectiveness in three domains: interorganizational crisis management, military command and control, and cyber defence operations. The thesis aims to answer three research questions: (1) What constitutes C2 capability? (2) What constitutes C2 effectiveness? and (3) How can C2 effectiveness be assessed? The work was carried out as two case studies and one systematic literature review. The main contributions of the thesis are the identification of perspectives of C2 capability in challenging situations and an overview of approaches to C2 effectiveness assessment. Based on the results of the three studies, six recurring perspectives of capability in the domains studied were identified: interaction (collaboration), direction and coordination, relationships, situation awareness, resilience and preparedness. In the domains there are differences concerning which perspectives that are most emphasized in order obtain C2 capability. C2 effectiveness is defined as

the extent to which a C2 system is successful in achieving its intended result. The thesis discusses the interconnectedness of performance and effectiveness measures, and concludes that there is not a united view on the difference between measures of effectiveness and measures of performance. Different approaches to effectiveness assessment were identified, where assessment may be conducted based on one specific issue, in relation to a defined goal for a C2 function or using a more exploratory approach.

User Story Mapping Jeff Patton, Peter Economy, 2014-09-05 User story mapping is a valuable tool for software development, once you understand why and how to use it. This insightful book examines how this often misunderstood technique can help your team stay focused on users and their needs without getting lost in the enthusiasm for individual product features. Author Jeff Patton shows you how changeable story maps enable your team to hold better conversations about the project throughout the development process. Your team will learn to come away with a shared understanding of what you're attempting to build and why. Get a high-level view of story mapping, with an exercise to learn key concepts quickly Understand how stories really work, and how they come to life in Agile and Lean projects Dive into a story's lifecycle, starting with opportunities and moving deeper into discovery Prepare your stories, pay attention while they're built, and learn from those you convert to working software

Agile Multi-Project Management Ulla Sebestyén, 2017-05-29

Assessing Command and Control Effectiveness Mr Peter Berggren, Dr Staffan Nählinder, Dr Erland Svensson, 2014-07-28 Assessing Command and Control Effectiveness: Dealing with a Changing World offers a description of the current state of Command and Control (C2) research in imperfect settings, showing how a research process should assess, analyse and communicate results to the development cycle of methods, work, manning and C2-technology. Special attention is given to the development of C2 research methods to meet the current and coming needs. The authors also look forward towards a

future where effective assessment of C2 abilities are even more crucial, for instance in agile organisations.

How to Ikigai Tim Tamashiro, 2019-01-31 Live Your Best Life Ancient, time-tested wisdom:

Okinawa, Japan is a tiny, tiny island south of the Japanese mainland where people live their life's purpose every day. How is it possible for so many to live each day in such meaningful ways? The Okinawan concept of Ikigai. How to Ikigai describes the lifestyle choices that have led to an island full of fulfilled, long-living people. Magical reality come to life: Examples of ikigai in action are often magical. Take David Michiels. David stuttered severely well into his adulthood. In clinical terms, his stutter was difficult to treat. But David started to work in a liquor store. Before long, his focus turned to one specific section of the sales floor: the scotch section. As he spent more of his days learning about scotch, he began to share his knowledge with customers. Eventually, David noticed that his stutter vanished when he talked to anyone about scotch. Over time, David's passion led to a new life. Today, he is a renowned whiskey expert, traveling the world tasting and purchasing whiskey on behalf of his employer. He feels his life is meaningful because of ikigai. A humble look at happiness: Bringing together an exploration of joy not unlike that of The Book of Joy by the Dalai Lama and Archbishop Desmond Tutu, a look inward reminiscent of The Untethered Soul by Michael A. Singer, and deep truths like those explored by Singer in The Surrender Experiment, How to Ikigai describes the concept of Ikigai with clarity and meaning. How to Ikigai explains a simple but abstract map for living a meaningful life. After reading this book, you will understand how to implement Ikigai's four directions in your own life: • Do what you love • Do what you're good at • Do what the world needs • Do what you can be rewarded for

Project Leadership Timothy J. Kloppenborg PhD, PMP, Arthur Shriberg EdD, Jayashree

Venkatraman MS, MBA, 2003-01-01 This book traces the development of project leadership as fundamental to completing projects effectively, delineates the leadership tasks that must be accomplished at each step of a project's life, and helps the reader develop wisdom in making decisions both by learning the ramifications of certain decisions and by seeing how those decisions are made in an example project.
