Think Green, Take Action Daniel A. Kriesberg,2010-08-16 This book provides an annotated bibliography of age-appropriate literature and activities, showing children the importance of environmental issues and teaching them the skills to take action. In past years, teaching children about conservation and environmental issues might have been an optional side topic to complement an earth science curriculum, but in today's educational climate, being green is a subject with great relevance and importance. This book combines a wide variety of techniques to help students understand environmental issues and gain the skills needed to take action. The children's literature and classroom activities suggested in Think Green, Take Action: Books and Activities for Kids are appropriate for elementary school students from grades three through seven, covering three major environmental issues: endangered species, resource depletion, and pollution. After students have a grasp of the causes of these environmental problems, the final chapter presents ways to take easy action that can create ripples of change across the world. Educators in museums and nature centers, home-schooled children, and their parents comprise an appropriate secondary audience for this instructive text.

Pragmatism John R. Shook,2022-07-04 Designed to fill a large gap in American philosophy scholarship, this bibliography covers the first four decades of the pragmatic movement. It references most of the philosophical works by the twelve major figures of pragmatism: Charles S. Peirce, William James, John Dewey, George H. Mead, F.C.S. Schiller, Giovanni Papini, Giovanni Vailati, Guiseppe Prezzolini, Mario Calderoni, A.W. Moore, John E. Boodin, and C.I. Lewis. It also includes writings of dozens of minor pragmatic writers, along with those by commentators and critics of pragmatism. It encompasses literature not only concerning pragmatism as an alliance of philosophical theories of meaning, inquiry, belief, knowledge, logic, truth, ontology, value, and morality, but also as an intellectual and cultural force impacting art, literature, education, the social and natural sciences, religion, and politics. This bibliography contains 2,794 main entries and more than 2,000 additional references, organized by year of publication. 2,101 of the references include annotation. Its international scope is focused on writings in English, French, German, and Italian, though many other languages are

also represented. Peter H. Hare contributed the Guest Preface. The introduction contains an historical orientation to pragmatism and guides to recent studies of pragmatic figures. This work is extensively cross-referenced, and it has exhaustive and lengthy author and subject indexes.

**Thinking about Addiction** Craig Hanson,George Ainslie,2009 What is addiction? Why do some people become addicted while others do not? Is the addict rational? In this book, Craig Hanson attempts to answer these questions and more. Using insights from the beginnings of philosophy to contemporary behavioral economics, Hanson attempts to assess the variety of ways in which we can and cannot, understand addiction. Special consideration is given to a challenging (and controversial) proposal dubbed “hyperbolic discounting.” Hanson proposes some modifications to the hyperbolic discounting view that permit it to explain not only addiction, but also a variety of psychological maladies, such as self-deception.
