Energias renováveis José Goldemberg (coordenador),Francisco Carlos Paletta (coordenador),2012-01-01 Esta obra tem por base a 1ª Conferência de Energias Renováveis para o Ensino de Engenharia, realizada pela Faculdade de Engenharia e pelo Centro de Estudos de Energia e Sustentabilidade da Fundação Armando Alvarez Pentenado FAAP em outubro de 2009, com o objetivo de promover o debate, fomentar o conhecimento tecnológico e apoiar a inovação no uso e no potencial das energias renováveis. Nas palavras do Professor José Goldemberg, energias renováveis representam hoje apenas 13% do consumo mundial de energia; combustíveis fósseis 80% e energia nuclear 7%. Carvão, petróleo e gás foram a base energética do desenvolvimento tecnológico do século XX mas criaram os problemas com os quais nos defrontamos hoje: exaustão das reservas, problemas geopolíticos e poluição. Energias renováveis não criam esses problemas e estão crescendo, no seu conjunto, mas rapidamente do que o consumo de combustíveis fósseis: elas são a energia do futuro. Especialistas brasileiros nos respectivos assuntos discutem neste livro temas como biomassa, energia fotovoltaica, pequenas centrais hidroelétricas, energia eólica, energia solar térmica e uso energético de hidrogênio.

Energy Democracies for Sustainable Futures Majia Nadesan,Martin J. Pasqualetti,Jennifer Keahey,2022-09-29 *Energy Democracies for Sustainable Futures* explores how our dominant carbon and nuclear energy assemblages shape conceptions of participation, risk, and in/securities, and how they might be reengineered to deliver justice and democratic participation in transitioning energy systems. Chapters assess the economies, geographies and politics of current and future energy landscapes, exposing how dominant assemblages (composed of technologies, strategies, knowledge and authorities) change our understanding of security and risk, and how they these shared understandings are often enacted uncritically in policy. Contributors address integral relationships across the production and government of material and human energies and the opportunities for sustainable and democratic governance. In addition, the book explores how interest groups advance idealized energy futures and energy imaginaries. The work delves into the role that states, market organizations and civil society play in envisioned energy change. It assesses how risks and security are formulated in relation to economics, politics, ecology, and human health. It concludes by integrating the relationships between alternative energies and governance strategies, including issues of centralization and decentralization, suggesting approaches to engineer democracy into decision-making about energy assemblages. Explores descriptive and normative relationships between energy and democracy Reviews how changing energy demand and governance threaten democracies and democratic institutions Identifies what participative energy transformations look like when paired with energy security Reviews what happens to social, economic and political infrastructures in the process of achieving sustainable and democratic transitions

O sol vai voltar amanhã Instituto de Energia da Puc-Rio,Eloi Fernández y Fernández (coordenador),2020-12-18 Este livro é resultado de um projeto de pesquisa de desenvolvimento (P&D) executado pela PUC-Rio em cooperação com a Petrogal Brasil, tendo como seu principal objetivo informar sobre o cenário do setor de energia fotovoltaica

(ESFV) no Brasil, além de aprimorar e qualificar o debate para diferentes setores da sociedade e do mercado de energia solar. A parte 1: Inovação, ciência e tecnologia da energia fotovoltaica no Brasil – o que já temos e o que teremos, traz discussões relevantes a respeito das tecnologias da energia fotovoltaica. O capítulo 1 trata dos principais usos da ESFV, o capítulo 2 discute questões referentes à Solarimetria e o capítulo 3 discute o estado da arte de painéis solares. Finalmente, no capítulo 4 sintetiza as principais discussões atuais sobre armazenamento desse tipo de energia. A parte 2: Energia fotovoltaica no Brasil: impactos ambientais, socioeconômicos, regulatório, traz um panorama interessante sobre esse debate no Brasil, dividindo-se da seguinte forma: o capítulo 5 e 6 discutem os impactos ambientais da energia solar fotovoltaica, chamando a atenção para uso de tecnologias como o Silício e filmes finos. No capítulo 7, o trabalho se desdobra em duas frentes, a primeira analisa a evolução dos indicadores socioeconômicos dos municípios que estão ao redor das usinas de geração centralizada no Brasil e a segunda, desenvolve um estudo de caso para explicar os processos decisórios locais que foram influentes e decisivos na construção das políticas de ESFV no Brasil. O capítulo 8 analisa, a partir de entrevistas com diferentes atores estratégicos da cadeia produtiva e do estudo da literatura do tema, alguns impactos sociais na geração distribuída no Brasil. Os capítulos 9, 10 e 11 se dedicam a desenvolver um panorama sobre questões regulatórias e econômicas no âmbito da geração centralizada, distribuída e dos sistemas isolados no Brasil. Finalmente, o capítulo 12 concentra seu foco em informações sobre as principais regulações de diversos países a respeito da ESFV. A última parte, cujo título é Encadeamento produtivo da energia fotovoltaica no Brasil fecha este trabalho de pesquisa trazendo questões fundamentais sobre a cadeia produtiva da ESFV no Brasil. O capítulo 13 traz, de maneira inédita, um mapa do encadeamento produtivo deste setor com os principais atores envolvidos. Por fim, é abordada a questão dos requisitos técnicos com recomendações de inovações ao longo do encadeamento produtivo. O sol vai voltar amanhã: um espectro de análises sobre a energia fotovoltaica é uma coletânea e um esforço de diferentes pesquisadores que cumpre, portanto, uma importante função, que é levar ao conhecimento de todos uma discussão essencial atualmente, o que envolve olhar a natureza como parceira das instituições e dos atores sociais.

Impactos da Agregação da Energia Solar Fotovoltaica sobre as Despesas com Energia Elétrica Gustavo Xavier de Andrade Pinto, Helena Flávia Napolini, Ricardo Rüther, 2019-11-12 Este livro apresenta uma metodologia para avaliar os impactos da agregação da geração solar fotovoltaica sobre as despesas com energia elétrica de unidades consumidoras (UCs) de médio/grande porte, atendidas com fornecimento em tensão igual ou superior a 2,3 kV ou ainda para UCs alimentadas por sistemas subterrâneos atendidas com fornecimento em tensão menor do que 2,3 kV, enquadradas no Grupo A – Subgrupo A4. A metodologia desenvolvida possibilita levantar perfis de demanda e de consumo de energia elétrica da UC, analisar a adequação de seu contrato de energia elétrica vigente, projetar a geração solar fotovoltaica a ser conectada à sua rede elétrica, definir a modalidade de contratação da energia que proporciona menor despesa anual com energia elétrica após a inserção da geração solar fotovoltaica na UC e analisar os impactos proporcionados pela agregação da geração solar fotovoltaica sobre suas despesas com energia elétrica. Apesar de a metodologia desenvolvida apresentar caráter geral, sua aplicação foca em avaliar os impactos da agregação da geração solar fotovoltaica sobre as despesas com energia elétrica da UC Cidade Universitária (alimentada em 13,8 kV), localizada no campus Trindade da Universidade Federal de Santa Catarina em Florianópolis – SC. O texto é destinado aos estudantes da área de conversão fotovoltaica da energia solar e aos pesquisadores e profissionais envolvidos com energias renováveis, uso racional de energia e gestão da energia, bem como ao público interessado nas aplicações da energia solar.

Balancing the Protection of Foreign Investors and States Responses in the Post-Pandemic World Yulia Levashova, Pascale Accaoui Lorfing, 2022-05-11 The COVID-19 pandemic has brought the debate on reform of the international investment agreement regime to the fore with renewed force. In this important and timely book, top professionals in the field collectively offer an in-depth investigation of the measures that States have taken, or failed to take, to deal with the pandemic's consequences and whether these actions or inactions can be construed as investment arbitration risks. In an extensive overview of the impact of COVID-19 on States and investors - including perspectives from UNCTAD, the European Union, the United States, Russia, India, South Korea and the African Union - this comprehensive guide on State defences and investor protection mechanisms tackles such aspects of the debate as the following as affected by the pandemic: treatment of investors in times of pandemic and in the post-pandemic world; sufficient contribution to the economic development of the host State; disparities in bargaining power; and use of 'pandemic power' to accord preferential treatment. The final part of the book is dedicated to analysing case studies from around the world in the context of the pandemic and investor-State disputes. Understanding the way public health emergencies can shape international investment law is key to building a sustainable, stable investment environment. As the first detailed study of the post-pandemic development of investment law, this matchless collection takes a giant step toward reconciling the interests of foreign investors and sovereign States at various stages of economic development. With practical recommendations for both States and investors, it will be of immeasurable assistance to practitioners, policymakers, and academics in anticipating and dealing not only with COVID-related measures but also with similar future contingencies.

Future of US-Mexico Relations Tony Payan, Alfonso Lopez de la Osa Escribano, Jesus Velasco, 2020-04-30 The editors of this collection of sixteen articles argue the relationship between the United States and Mexico is at its most tenuous in recent memory. Each article explores the future of US-Mexico relations, focusing on relevant topics such as trade, water, drugs, health, immigration, environmental issues and security. Employing a strategic foresight methodology, the authors use past trends and identify pivotal drivers to predict, based on indicators, at least three possible outcomes for the next few decades: a baseline or continuity scenario, an optimistic version and a pessimistic one. They also articulate the implications each forecast has for both nations. Most

chapters are co-written by a scholar from the United States and another from Mexico. While acknowledging it is impossible to predict the future, they nonetheless describe what could occur. Ultimately, the authors of the articles in this fascinating volume make recommendations to achieve a peaceful, integrated and prosperous North America that will drive the world economy. The book is required reading for anyone interested in the binational relationship and the well-being of citizens in both countries.
