Modeling Cost and Performance for Military Enlistment Bert F. Green, Anne S. Mavor, Committee on Military Enlistment Standards, 1994-01-15 This book describes a cost/performance trade-off model useful for illustrating the effects of budget decisions on the quality of expected performance in the military enlisted force. The model links recruit quality to job performance on the one hand and personnel costs on the other. Understanding these linkages provides a clear rationale, based on performance and cost differences, for choosing applicants for military service. The book examines trends in the quality of military personnel from the beginning of the All-Volunteer Force in 1974 to the year 2000 and beyond. It discusses technical issues associated with the development of the various components of both cost and performance linkages and presents applications of the fully developed model.

**Military Recruiting Outlook** Bruce R. Orvis, Narayan Sastry, Laurie L. McDonald, 1996 This report describes recruiting trends through early 1995, focusing on changes in youth enlistment propensity and the Army's ability to convert the potential supply of recruits into actual enlistments. Using updated survey data and methods of analyzing propensity, it concludes that the potential supply of recruits remains higher in FY95 than it was during 1989, when recruiting results were good. However, the latest survey results indicate some downturn in youth interest in military service. When that downturn is coupled with the large increase in accession requirements during FY96 and FY97, the ratio of supply to demand for high-quality enlistees could fall short of its predrawdown levels. Furthermore, survey data show a drop in the rate at which potential high-quality recruits discuss

military service with key influencers (such as family and friends) and fewer contacts between recruiters and high school students (perhaps due to cuts in numbers of recruiters, their reduced presence in high schools, or a shift in focus from current students to graduates). Taken together, these results suggest future difficulties in meeting accession goals, which should be countered by increases in recruiting resources such as advertising, educational benefits, and recruiters.

**The American Enlisted Man** Charles C. Moskos, 1970

**Invisible Women** Margaret C. Harrell, 2001-01-30 Military manpower policy is often crafted by policymakers without an in-depth understanding of the life experiences and views of junior enlisted

personnel. It is plausible to expect that some policymakers attribute the attitudes and experiences of these young soldiers to such features as youth or lack of an advanced education and may thus believethemselves able to empathize with this population group by recalling their own parallel life experiences. However, this approach oversimplifies the life experiences of these families and neglects the reality that most policymakers and professional managers have never experienced the compendium of problems these couples face, such as youth, lack of education, financial difficulties, emotional and physical distance from extended family, and invisibility in a large bureaucracy. At the center of this book are the personal stories of three junior enlisted spouses, told in their own voices and selected to emphasize the dilemmas numerous enlisted families face. The stories provide insight into the experiences and attitudes of other junior enlisted families. Those interested or involved in the military, or those who live a military lifestyle--at any pay grade--will find these stories both useful and engaging.

**Manual of Navy Enlisted Manpower and Personnel Classifications and Occupational Standards** United States. Bureau of Naval Personnel, 1949

**Air Force Enlisted Force Management** Michael Schiefer, 2007 A fundamental goal of the Air Force personnel system is to ensure that the manpower inventory, by Air Force specialty code and grade, matches requirements. However, there are structural obstacles that impede achieving this goal. The three major independently managed systems the Air Force uses to determine manpower strength currently tend to function in isolation. Because the current organizational structure lacks broad coordinating and control mechanisms, actions taken to control one system often adversely affect another. The authors lay the foundation for a discussion of policy changes that would better synchronize these systems. They propose a methodology that would marginally modify grade

authorizations within skill levels to make it possible to better achieve manpower targets. Each specialty would retain the same number of authorizations within each skill level, and the aggregate solution would maintain the same total number of enlisted authorizations by grade. This would help the manpower community follow the policy of equal selection opportunity while also taking personnel management system capabilities into account.

*Assessing Fitness for Military Enlistment* National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Youth Population and Military Recruitment: Physical, Medical, and Mental Health Standards, 2006-02-27 The U.S. Department of Defense (DoD) faces short-term and long-term challenges in selecting and recruiting an enlisted force to meet personnel requirements associated with diverse and changing missions. The DoD has established standards for aptitudes/abilities, medical conditions, and physical fitness to be used in selecting recruits who are most likely to succeed in their jobs and complete the first term of service (generally 36 months). In 1999, the Committee on the Youth Population and Military Recruitment was established by the National Research Council (NRC) in response to a request from the DoD. One focus of the committee's work was to examine trends in the youth population relative to the needs of the military and the standards used to screen applicants to meet these needs. When the committee began its work in 1999, the Army, the Navy, and the Air Force had recently experienced recruiting shortfalls. By the early 2000s, all the Services were meeting their goals; however, in the first half of calendar year 2005, both the Army and the Marine Corps experienced recruiting difficulties and, in some months, shortfalls. When recruiting goals are not being met, scientific guidance is needed to inform policy decisions regarding the advisability of lowering standards and the impact of any change on training time and cost, job

performance, attrition, and the health of the force. Assessing Fitness for Military Enlistment examines the current physical, medical, and mental health standards for military enlistment in light of (1) trends in the physical condition of the youth population; (2) medical advances for treating certain conditions, as well as knowledge of the typical course of chronic conditions as young people reach adulthood; (3) the role of basic training in physical conditioning; (4) the physical demands and working conditions of various jobs in today's military services; and (5) the measures that are used by the Services to characterize an individual's physical condition. The focus is on the enlistment of 18- to 24-year-olds and their first term of service.

**Forty Miles a Day on Beans and Hay** Don Rickey,2012-11-28 The enlisted men in the United States Army during the Indian Wars (1866-91) need no longer be mere shadows behind their historically well-documented commanding officers. As member of the regular army, these men formed an important segment of our usually slighted national military continuum and, through their labors, combats, and endurance, created the framework of law and order within which settlement and

development become possible. We should know more about the common soldier in our military past, and here he is. The rank and file regular, then as now, was psychologically as well as physically isolated from most of his fellow Americans. The people were tired of the military and its connotations after four years of civil war. They arrayed their army between themselves and the Indians, paid its soldiers their pittance, and went about the business of mushrooming the nation's economy. Because few enlisted men were literarily inclined, many barely able to scribble their names, most previous writings about them have been what officers and others had to say. To find out what the average soldier of the post-Civil War frontier thought, Don Rickey, Jr., asked over three hundred living veterans to supply information about their army experiences by answering questionnaires and writing personal accounts. Many of them who had survived to the mid-1950's contributed much more through additional correspondence and personal interviews. Whether the soldier is speaking for himself or through the author in his role as commentator-historian, this is the first documented account of the mass personality of the rank and file during the Indian Wars, and is only incidentally a history of those campaigns.

*Enlisted Soldier's Guide* Thomas Gills, 2017 Updated edition of the essential guide for enlisted soldiers in the U.S. Army This military reference guide, completely revised for the current army, is targeted at young men and women who have enlisted in the U.S. Army or are thinking about doing so. The book is a must-have resource for a successful career or tour as an American soldier and covers duties and responsibilities, promotion and career opportunities, real-world issues, customs and traditions, uniforms and insignia, pay and benefits, physical fitness, and personal and family matters.

web backward difference approximation the secant line passes the points  $x_1$   $y_1$  and  $x_0$   $y_0$   $f(x_0)$  backward differences are useful for approximating the derivatives if the data values are available in the past but not in the future such as secant methods for root finding and control problems

web jul 26 2022 the backward euler method is derived from the simple backward difference expression for the derivative  $y' = \frac{y_n - y_{n-1}}{h}$  the backward euler method is an iterative method which starts at an initial point and walks the solution forward using the iteration  $y_{n+1} = h f(t_n, y_n)$
