Stakeholder Theory Maria Bonnafeous-Boucher, Jacob Dahl Rendtorff, 2016-11-08 This book provides an academic introduction to, and presentation and defence of stakeholder theory as a model for the strategic management of businesses and corporations, as well as of public organizations and institutions. The concept of the stakeholder is generally applied to parties that affect or are affected by the activities of private or public organizations. Distinct from shareholders, stakeholders are those individuals, entities or communities that have a connection with the activities of a corporation, a firm or an organization. The notion of the stakeholder is intimately linked to a conception of the business firm as an entity founded on negotiated governance, in which the maximization of value for the shareholder is not the ultimate criterion. In this model, issues and interests that are not directly associated with shareholders and investors, but which go beyond capital to encompass the concerns of civil society, are considered to be of central importance. This book provides a broad overview of stakeholder theory, presenting it as an ethical approach to strategic management that is both pragmatic and applicable to developing democratic practices within corporations, while at the same time suggesting ways in which elements of a social contract can be elaborated within the context of globalization.

The Weakness of God John D. Caputo, 2006-04-27 The author of *What Would Jesus Deconstruct?* makes “a bold attempt to reconfigure the terms of debate around the topic of divine omnipotence” (Choice). Applying an ever more radical hermeneutics—including Husserlian and Heideggerian phenomenology, Derridian deconstruction, and feminism—John D. Caputo breaks down the name of God in this irrepressible book. Instead of looking at God as merely a name, Caputo views it as an event, or what the name conjures or promises in the future. For Caputo, the event exposes God as weak, unstable, and barely functional. While this view of God flies in the face of most religions and philosophies, it also puts up a serious challenge to fundamental tenets of theology and ontology. Along the way, Caputo’s readings of the New Testament, especially of Paul’s view of the Kingdom of God, help to support the “weak force” theory. This penetrating work cuts to the core of issues and questions—What is the nature of God? What is the nature of being? What is the relationship between God and being? What is the meaning of forgiveness, faith, piety, or transcendence?—that define the terrain of contemporary philosophy of religion. “Caputo comes out of the closet as a theologian in this work.” —Catherine Keller, Drew University “Caputo has a gift for explaining Continental philosophy’s jargon succinctly and accurately, and despite technical and foreign terms, this book will engage upper-level undergraduates. Includes scriptural and general indexes . . . Highly recommended.” —Choice

Surrealism and Cinema Michael Richardson, 2006-03-01 Surrealism has long been recognised as having made a major contribution to film theory and practice, and many contemporary film-makers acknowledge its influence. Most of the critical literature, however, focuses either on the 1920s or the work of Buuel. The aim of this book is to open up a broader picture of surrealism's contribution to the conceptualisation and making of film. Tracing the work of Luis Buuel, Jacques Prvert, Nelly Kaplan, Walerian Borowczyk, Jan vankmajer, Raul Ruiz and Alejandro Jodorowsky, *Surrealism and Cinema* charts the history of surrealist film-making in both Europe and Hollywood from the 1920s to

the present day. At once a critical introduction and a provocative re-evaluation, Surrealism and Cinema is essential reading for anyone interested in surrealist ideas and art and the history of film.

The Oldowan Kathy Diane Schick,Nicholas Patrick Toth,2006 The earliest traces of proto-human technology emerged over 2.5 million years ago on the African continent. Called the Oldowan after the famous site of Olduvai Gorge in Tanzania, these technologies herald a major evolutionary shift in the human lineage. The Oldowan: Case Studies into the Earliest Stone Age provides a critical look at early archaeological sites and their evidence. This volume also shows how a range of probing, multidisciplinary, experimental investigations - including experimental tool-making, comparative studies of ape technologies, biomechanical analysis, and PET studies of brain activity - help us evaluate this tantalizing prehistoric evidence and appreciate its relevance to human evolution.

Toni Morrison Box Set Toni Morrison,2019-10-29 A box set of Toni Morrison's principal works, featuring *The Bluest Eye* (her first novel), *Beloved* (Pulitzer Prize winner), and *Song of Solomon* (National Book Critics Award winner). Staring unflinchingly into the abyss of slavery, *Beloved* transforms history into a story as powerful as *Exodus* and as intimate as a lullaby. This spellbinding novel tells the story of Sethe, a former slave who escapes

to Ohio, but eighteen years later is still not free. In The New York Times bestselling novel, *The Bluest Eye*, Pecola Breedlove, a young black girl, prays every day for beauty and yearns for normalcy, for the blond hair and blue eyes, that she believes will allow her to finally fit in. Yet as her dream grows more fervent, her life slowly starts to disintegrate in the face of adversity and strife. With *Song of Solomon*, Morrison transfigures the coming-of-age story as she follows Milkman Dead from his rustbelt city to the place of his family's origins, introducing an entire cast of strivers and seeresses, liars and assassins, the inhabitants of a fully realized black world. This beautifully designed slipcase will make the perfect holiday and perennial gift.

Development's Displacements Peter Vandergeest, Pablo Idahosa, Pablo S. Bose, 2010-10-01 As multilateral agencies, social movements, and state authorities worldwide struggle to cope with the effects of large-scale development projects, the problem of displacement remains unresolved. This volume seeks to address displacement as a broad and multilayered phenomenon. A series of illustrative case studies drawn from around the globe provide causal accounts of why and how displacement occurs, what its effects on communities, ecosystems, and economies look like, and the normative or ethical positions held by key actors involved. Contributors offer economic, political, and cultural analyses, as well as extensive ethnographic field research, to present a picture of displacement that illustrates the depth and the breadth of the issue.
