Enrichment Units in Math Dianne Draz, Judy Leimbach, 2021-09-03 Go beyond the regular curriculum with these units to challenge your more able intermediate grade math students. With their ease of use, clear instruction, and motivating topics, these are the perfect enrichment activities for the regular math curriculum. This book contains four units that are structured so that students can easily develop an understanding of the topics on their own. The four topics are: permutations and combinations, tessellations, line drawings, and graphing. Each unit provides sequential activities that allow students to work through these motivating topics, whether they are working by themselves, in a small group, or in a whole-class setting. The units lend themselves easily to a math center arrangement with each student having an individual folder and checklist to record his or her progress. While they were designed to provide added challenge for students who have mastered the regular curriculum, some of the units can be used as supplements for whole-class instruction. The emphasis in these units is on promoting thinking, developing perseverance, expanding students' view of mathematics, enjoying a challenge, and keeping math students actively involved and enthused about math. This book will help you provide students with opportunities to explore mathematical ideas in ways that promote their intellectual growth and expand their views of mathematics. This is one of a three-book series. The other books cover the following topics: Enrichment Units in Math Book 1—attribute pattern blocks, tangrams, sets and Venn diagrams, and ancient Egyptian numbers; and Enrichment Units in Math Book 3—probability, topology, magic squares, and number characteristics. For other math units to extend the math curriculum and

provide opportunities to work independently, see Math Extension Units Book 1 and Book 2. Grades 4-6

Enrichment in the Law of Unjust Enrichment and Restitution Andrew

Lodder, 2012-07-06 Enrichment is key to understanding the law of unjust enrichment and restitution. This book provides a comprehensive analysis of the concept of enrichment and its implications for restitutionary awards. Dr Lodder argues that enrichment may be characterised either factually or legally, and explores the consequences of that distinction. In factual enrichment cases, the measure of enrichment is the objective value received. This is the basis of many awards of money had and received, quantum meruit, quantum valebat and money paid. In legal enrichment cases, the benefit is the acquisition of a specific right or the release of a specific obligation. The remedy is restitution of that right or reinstatement of that obligation. It is demonstrated that specific restitution of the defendant's legal enrichment is often the basis for resulting trusts, rescission, rectification and subrogation. This book has profound implications for understanding restitutionary awards and the relationship between the enrichment inquiry and other aspects of the law of unjust enrichment, including the 'at the expense of' inquiry and the defence of change of position.

Unjustified Enrichment Stephen Swann, Christian von Bar, 2010-03-12 Unjustified enrichment is one of the three main non-contractual obligations dealt with in the DCFR. In recent years unjustified enrichment has been one of the most intellectually animated areas of private law. In an area of law whose territory is still partially uncharted and whose boundaries are contested, this volume of Principles of European Law will be invaluable for

academic analysis of the law and its development by the courts. During the drafting process, comparative material from over 25 different EU jurisdictions has been taken into account. The work therefore is not only a presentation of a future model for European rules to come but provides also a fairly detailed indication of the present legal situation in the Member States.

Rethinking Unjust Enrichment Warren Swain, Sagi Peari, 2023-11-11 This interdisciplinary volume brings together scholars from across the globe to challenge the dominant position of unjust enrichment and suggest more satisfactory alternatives. *Rethinking Unjust Enrichment* includes a broad range of voices from the UK, US, Australia, Canada, China, Singapore, Germany, Ireland, New Zealand, Hong Kong, and South America. The book includes voices of sceptics who think that the current unjust enrichment doctrine must be seriously qualified and others who think that it should be eliminated altogether. The contributions cast doubt on the various parameters of unjust enrichment from an analytical standpoint, representing four interrelated perspectives: history, sociology, doctrine, and theory. The four-limb structure of the book provides readers with a clear understanding of the current problems of unjust enrichment at the deepest levels of its history, sociological forces, doctrinal fallacies, and normative deficiencies. This treatment of the subject serves as the basis for a comprehensive reform across jurisdictions. Comprehensive and multi-faceted, *Rethinking Unjust Enrichment* is interesting to both sceptics and supporters of the unjust enrichment. It facilitates a critical and constructive dialogue between the two.

Pitel,2004-04-20 This book is a collection of articles based on Understanding Unjust Enrichment,a symposium held at the University of Western Ontario in January 2003. The articles, written from the perspective of English, Australian, Canadian, German and Jewish law, deal with numerous theoretical and practical issues that surround restitution and unjust enrichment. The articles outline recent developments across the Commonwealth, explain the unjust enrichment principle and its component parts, and address discrete issues such as tracing, choice of law, disgorgement damages for breach of contract, and the use of unjust enrichment in the cohabitation context. The contributors are Kit Barker, Peter Benson, Jeffrey Berryman, Michael Bryan, Andrew Burrows, Robert Chambers, Gerald Fridman, Peter Jaffey, Dennis Klimchuk, Thomas Krebs, John McCamus, Mitchell McInnes, Stephen Pitel, Stephen Waddams and Ernest Weinrib.

Defences in Unjust Enrichment Andrew Dyson,James Goudkamp,Frederick Wilmot-Smith,2016-01-14 This book is the second in a series of essay collections on defences in private law. It addresses defences to liability arising in unjust enrichment. The essays are written from a range of perspectives and methodologies. Some are doctrinal, others are theoretical, and several offer comparative insights. The most important defence in this area of the law, change of position, is addressed in detail, but many other defences are treated too, as well as the interrelations between these defences within the law of unjust enrichment. The essays offer novel claims and ways of looking at problems in this challenging area of legal study.

Unjust Enrichment in South African Law Helen Scott, 2014-07-18
Conventional thinking teaches that the absence of liability - in particular contractual invalidity - is itself the reason for the restitution of transfers in the South African law of unjustified enrichment. However, this book argues that while the absence of a relationship of indebtedness is a necessary condition for restitution in such cases, it is not a sufficient condition. The book takes as its focus those instances in which the invalidity thesis is strongest, namely, those traditionally classified as instances of the *condictio indebiti*, the claim to recover undue transfers. It seeks to demonstrate that in all such instances it is necessary for the plaintiff to show not only the absence of his liability to transfer but also a specific reason for restitution, such as mistake, compulsion or incapacity. Furthermore, this book explores the reasons for the rise of unjust factors in South African law, attributing this development in part to the influence of the Roman-Dutch *restitutio in integrum*, an extraordinary, equitable remedy that has historically operated independently of the established enrichment remedies of the civilian tradition, and which even now remains imperfectly integrated into the substantive law of enrichment. Finally, the book seeks to defend in principled terms the mixed approach to enrichment by transfer (an approach based both on unjust factors and on the absence of a legal ground) which

appears to characterise modern South African law. It advocates the rationalisation of the causes of action comprised within the *condictio indebiti*, many of which are subject to additional historically-determined requirements, in light of this mixed analysis.

Unjust Enrichment Peter Birks, 2005-01-13 This new edition of *Unjust Enrichment* by the editor of the Clarendon Law Series, is a fully updated, clear and concise account of the law of unjust enrichment. It attempts to move away from the use of obscure terminology inherited from the past. This text is the first book to insist on the switch from restitution to unjust enrichment, from response to event. It organises modern law around five simple questions: Was the defendant enriched? If so, was it at the claimant's expense? If so, was it unjust? The fourth question is then what kind of right the claimant has, and the fifth is whether the defendant has any defences. This second edition was revised and updated by Peter Birks before his death from cancer on 6 July 2004 at the age of 62. It represents the final thinking of the world's leading authority on the subject.

Sediments in the Tema Harbour (Ghana) Benjamin O. Botwe, 2018-07-11 Sediment pollution and accumulation in harbours are major environmental issues and studies that advance their solutions are essential for harbour sustainability. This book provides the first comprehensive assessment of chemical pollution in sediments and sediment accumulation rates in the tropical Tema Harbour (Ghana). This book contributes to improving our ability to use an integrated approach involving sediment chemistry and bioassays in one comprehensive assessment of the contamination state of a tropical

coastal environment. Whole-sediment toxicity bioassays using the amphipod *Corophium volutator* and the polychaete *Hediste diversicolor* as bioindicators were combined with data on concentrations of total metal and metal binding forms, radionuclides, organochlorine pesticides and polycyclic aromatic hydrocarbons in bottom sediments as well as total metal concentrations in settling silt-clay particles collected by sediment traps to characterise the hazard, risk and impact of sediments from the tropical coastal Tema Harbour.

Physical Separation and Enrichment Saeed Farrokhpay, 2020-04-01 This book includes 12 papers from around the world on topics related to physical separation and enrichment in mineral processing. Physical separation is commonly used in the mineral industry to separate valuable minerals from gangues using differences in their physical properties. Physical separation methods have several advantages over other mineral processing techniques due to their high efficiency, low capital and operating costs, no additional chemicals required, and consequently, lower environmental hazard. They can be applied to the ores from mines or tailings, or in the recycling stage for scavenging the desired elements.

Unjust Enrichment Philip Davenport, Christina Harris, 1997 Barely 10 years old and growing rapidly, the doctrine of unjust enrichment offers splendid rewards to those who understand it and grave dangers to those who do not. This short book explains clearly and concisely the uses and dangers of the doctrine. Davenport, author of the very successful *Construction Claims*, and Harris draw primarily upon examples in construction law, where

unjust enrichment has had its greatest impact, while pointing out that the principles in their book are of general application. They also note that the recency of the doctrine means that there are as yet only a handful of Australian cases so that academic opinion and international caselaw play a vital role; hence, extensive footnotes and a five-page bibliography.

Digital Libraries: Universal and Ubiquitous Access to Information George Buchanan, Masood Masoodian, Sally Jo Cunningham, 2008-11-14 This book constitutes the refereed proceedings of the 11th International Conference on Asian Digital Libraries (ICADL 2008) held in Bali, Indonesia, in December 2008. The objective of this conference series is to provide a forum for presentation of high-quality research in the field of digital libraries. ICADL 2008 provided an opportunity for digital libraries researchers and practitioners in the Asia Pacific area and beyond to gather to explore ideas, exchange and share experiences, and further build the research network in this region. ICADL 2008 was a truly international event, with presenters from 21 countries. A total of 63 papers were accepted for inclusion in the proceedings: 30 full papers, 20 short papers, and extended abstracts of 13 posters. Submissions were subject to a rigorous, blind peer-review process. The research topics cover the spectrum of digital libraries, including multimedia digital libraries, usability and evaluation, information retrieval, ontologies, social tagging, metadata issues, multi- and cross-language retrieval, digital preservation, scholarly publishing and communities, and more. Additionally, three tutorials were offered in association with the conference by Andreas Rauber (Vienna University of Technology), David Bainbridge (University of Waikato), and George Buchanan (Swansea University).

Application of Bioinformatics in Cancers Chad Brenner,2019-11-20 This collection of 25 research papers comprised of 22 original articles and 3 reviews is brought together from international leaders in bioinformatics and biostatistics. The collection highlights recent computational advances that improve the ability to analyze highly complex data sets to identify factors critical to cancer biology. Novel deep learning algorithms represent an emerging and highly valuable approach for collecting, characterizing and predicting clinical outcomes data. The collection highlights several of these approaches that are likely to become the foundation of research and clinical practice in the future. In fact, many of these technologies reveal new insights about basic cancer mechanisms by integrating data sets and structures that were previously immiscible. Accordingly, the series presented here bring forward a wide range of artificial intelligence approaches and statistical methods that can be applied to imaging and genomics data sets to identify previously unrecognized features that are critical for cancer. Our hope is that these articles will serve as a foundation for future research as the field of cancer biology transitions to integrating electronic health record, imaging, genomics and other complex datasets in order to develop new strategies that improve the overall health of individual patients.

Canine Enrichment Shay Kelly,2019-08-21 If your dog could choose a book for you to read it would surely be this one. Behaviorist, Shay Kelly shows you how to become your dog's best friend by providing simple, fun activities to spark their mind and enrich their

life. A lack of mental stimulation is a leading contributory factor in dog behavioural problems. Ensuring that our dog's needs are met is the first step in avoiding and rectifying problematic behaviour. Shay's practical approach and behaviour knowledge combine in this critically acclaimed book, to deliver practical, kind, and scientific advice. ~ What Dr Susan Friedman says about the book: I am so happy to have Shay Kelly's book, Canine Enrichment to recommend to all animal caregivers. As I often say, animals are built to behave, not to be still; and, arranging the environment to facilitate meaningful behavior, that is, behavior that leads to strong positive reinforcers, is as necessary to behavioral well being as healthy food is to physical health. With this book, Mr. Kelly gives practical examples and ignites the imagination to result in endless possibilities to improve the lives of the learners in our care.~What Sara Sokol says about the book: Canine Enrichment: the book your dog needs you to read is essential reading for any dog guardian who wants to provide their dog with the most satisfying, fun, and fulfilled life possible. Mr Kelly inspires and motivates the reader while educating them on the importance of providing enrichment to their canine companions. The result is a dog/human team who is physically, mentally, and emotionally fulfilled and behaviorally at their best. As a dog trainer and behavior specialist, I am thrilled to have this book as a reference for my clients and provide a copy to all of my new clients.
