Uncovering Value Added in Trade Yuqing Xing, 2015-07-13 Value chain trade has challenged economic implications of conventional trade statistics and transformed bilateral trade relationships into multilaterals. Conventional trade statistics exaggerate trade volumes and bilateral trade imbalances. It is imperative to measure trade in value-added and examine trade relations in the context of global value chains. This book is a collection of research papers on new approaches to measure trade in value added and the role of global value chains in modern international trade. It introduces the input output method for measuring trade and a direct approach for measuring the domestic value added of the People's Republic of China — the center of global assembly. In addition, it shows how to analyze trade relations in the context of global value chains. Contents: Introduction (Yuqing Xing) Implications of Global Value Chains for Trade Statistics and Trade Policy (Christophe Degain and Andreas Maurer) OECD Inter-Country Input-Output Model and Policy Implications (Norihiko Yamano) Estimating the Upper Limits of Value Added in the People's Republic of China's Processing Exports (Yuqing Xing) An Alternative Measurement for International Fragmentation of the Production Process: An International Input-Output Approach (Satoshi Inomata) Share of Imports and Commodities in Consumption and Investment in the United States (Galina Hale and Bart Hobijn) Domestic Value Chains in the People's Republic of China and Their Linkages with the Global Economy (Bo Meng) The Fox-Apple Partnership in the Global Value Chain: How Did Foreign Direct Investment and Contract Manufacturing Reshape the Landscape of the Electronics Industry? (Guoyong Liang) Readership: Advance postgraduate students and researchers in the field of international economics, particularly those studying global value chains. Key Features: This is the first book to systematically introduce the input-output method for measuring trade in value-added

and a direct approach to measure the domestic value-added of China's exports Chapters are based on innovative approaches to analyze trade relations under global value chains Contributors are leading scholars in global value chains research and study. The authors are from WTO, OECD, ADBI, UNCTAD, the US Fed, JETRO-IDE and Peking University — a great combination and representation of international organizations and academic institutions Keywords: Trade; Global Value Chains; Production Networks; Input-output Method; Trade Statistics; Trade Measurement; Trade in Value-Added; Domestic Value-Added; Production Fragmentation; Global Assembly; Trade Relations; Foreign Direct Investment; Manufacturing

High Hopes Mark Goldman, 1984-06-30 In 1901 Buffalo was the national symbol of the country's optimism, pride, and braggadocio. Toward the close of the century, it epitomizes the sense of economic and demographic crisis prevalent in American industrial cities. High Hopes analyzes and interprets the historical forces—external and internal—that have shaped New York's second largest city. It examines the historical shifts that have served as a catalyst in Buffalo's growth, charting the city's evolution from a small frontier community through its development as a major commercial center and its emergence and eventual decline as a significant industrial metropolis. Mark Goldman

looks at the detailed patterns of local daily life from the settlement of the village in the early nineteenth century to the tragedy of Love Canal. In the process, he covers a wide range of topics, including work, ethnicity, family and community life, class structure, and values and beliefs. By bringing to bear on the events and developments that have shaped Buffalo a broad range of subjects and ideas, Goldman helps readers to understand the vast array of complex forces at work in the historical development of all American cities.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and

that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.
