I Said Yes to Everything Lee Grant, 2015-06-30 “Lee Grant has lived her life and practiced her craft with reckless abandon, bravery, honesty, and ultimately brutal clarity.”—Tony Award-winner Frank Langella Already a celebrated Broadway star and Vogue “It Girl,” Lee Grant was just twenty-four when she was nominated for an Academy Award for Detective Story. A year later, her name landed on the Hollywood blacklist, destroying her career and her marriage. Grant spent twelve years fighting the Communist witch hunts and rebuilt her life on her own terms: first stop, a starring role on Peyton Place. Set amid the 1950s New York theater scene and the starstudded parties of 1970s Malibu, *I Said Yes to Everything* will delight film and theatre buffs as well as the beloved star’s myriad fans.

Mobile TV: Customizing Content and Experience Aaron Marcus, Anxo Cereijo Roibás, Riccardo Sala, 2009-12-01
Developing usable, useful, and appealing solutions for the customer or user experience requires customization according to specific users' needs amidst frequently changing physical and social environments. Complex design problems like these require interdisciplinary perspectives that cover software functionality, human interaction and communication experiences, and perceived value. After defining and summarizing current research and development, this book focuses on Mobile TV experience in everyday life, innovative conceptual and participatory design methods, contextual analysis methods, social context for interactive multimedia systems, advanced interaction with mobile digital content, and future trends for the wide range of products and services that will be offered in the decade to come. The Editors have carefully balanced the theoretical and empirical approaches providing a valuable insight into principles and methods, as well as actionable guidelines and recommendations

for all those interested in exploring how to achieve the core objectives of usability, usefulness, and social appeal of this new mobile-video technology. The book answers many questions, and raises some new ones that only future technology development and deployment in mobile human-computer interaction and communication can answer.

African Americans in the Media Today: M-Z Sam G.

Riley, 2007 The history of African Americans in the news media is a relatively recent story of firsts. Consider Dorothy Gilliam, who in 1961 became the first black woman reporter hired by The Washington Post, or Bob Herbert, who in 1993 became the first black columnist at The New York Times, or even Mark Whitaker, who in 1998 became the first black editor of one of America's three major newsweeklies, Newsweek. These are just a few of the trailblazers who overcame obstacles to rise to the highest echelons of the media world. Prior to the 1960s, however, African Americans working for the predominantly white media were few and far between. After the subsiding of the dramatic civil rights demonstrations that shook most of America out of complacent acceptance of the status quo, the hiring of African-American news people slowed for a time before accelerating in the 1970, gaining real speed in the 1980s and 1990s. By the dawning of the new millennium, African Americans in the news media had achieved a sort of critical mass. This two-volume biographical encyclopedia chronicles the success stories and considerable strides made by over 240 African American media figures from newspapers, magazines, radio, television, and the Internet. The most influential and often groundbreaking reporters, columnists, editors, publishers, broadcasters, and even talk show hosts are all included here. Each in-depth biography discusses the individual's achievements and struggles along with more personal and career information. Numerous primary source documents-including newspaper and magazine articles, columns, and radio and

television transcripts-give readers first-hand accounts from the newsrooms. Unlike other reference works currently available, this timely encyclopedia emphasizes those African Americans who are currently working in the news media. Among the featured: BLBob Herbert, syndicated columnist, The New York Times BLRichard D. Parsons, CEO, Time Warner BLLeonard Pitts, syndicated columnist, Tribune Media Services BLClarence Page, syndicated columnist, Chicago Tribune BLStanley Crouch, columnist, New York Daily News BL Derrick Johnson, columnist, The Boston Globe BLEd Bradley, correspondent, 60 Minutes on CBS BL Lester Holt, anchor and show host, MSNBC BLCharlayne Hunter-Gault, foreign correspondent, NPR BLGwen Ifill, correspondent and moderator, PBS BLRobert L. Johnson, founder of Black Entertainment Television BLByron Pitts, national correspondent, CBS news BLAlfred Edmond, editor-in-chief, Black Enterprise Magazine BLMark Whitaker, editor, Newsweek BLLinda Johnson-Rice, publisher, Johnson Publishing Company BLKevin Blackstone, sports columnist, The Dallas Morning News BLRobin Roberts, sportscaster, anchor, ABC and ESPN BLOprah Winfrey, show host, ABC actress, producer, magazine publisher BLMichelle Norris, host of All Things Considered on NPR. A timeline, comprehensive introduction, numerous photos, and an extensive bibliography of print and electronic sources for further reading are included, making this encyclopedia a valuable reference for teachers and students interested in understanding the impact and significance of African Americans in the news media today.

Heritage, Contested Sites, and Borders of Memory in the Asia Pacific ,2023-10-09 Contests over heritage in Asia are intensifying and reflect the growing prominence of political and social disputes over historical narratives shaping heritage sites and practices, and the meanings attached to them. These contests emphasize that heritage is a means of narrating the past that demarcates, constitutes, produces, and polices political and social borders in the present. In its spaces, varied intersections of actors, networks, and scales of governance interact, negotiate and compete, resulting in heritage sites that are cut through by borders of memory. This volume, edited by Edward Boyle and Steven Ivings, and with contributions from scholars across the humanities, history, social sciences, and Asian studies, interrogates how particular actors and narratives make heritage and how borders of memory shape the sites they produce.

Live Music in America Elsie Irwin Sweeney Professor of Music Steve Waksman, Steve Waksman, 2022-09-13 When the Swedish concert singer Jenny Lind toured the U.S. in 1850, she became the prototype for the modern pop star. Meanwhile, her manager, P.T. Barnum, became the prototype for another figure of enduring significance: the pop culture impresario. Starting with Lind's fabled U.S. tour and winding all the way into the twenty-first century, *Live Music in America* surveys the ongoing impact and changing conditions of live music performance in the U.S. It covers a range of historic performances, from the Fisk Jubilee Singers expanding the sphere of African American music in the 1870s, to Benny Goodman bringing swing to Carnegie Hall in 1938, to 1952's Moondog Coronation Ball in Cleveland - arguably the first rock and roll concert - to Beyoncé's boundary-shattering performance at the 2018 Coachella festival. More than that, the book details the roles played by performers, audiences, media commentators, and a variety of live music producers (promoters, agents, sound and stage technicians) in shaping what live music means and how it has evolved. *Live Music in America* connects what occurs behind the scenes to what takes place on stage to highlight the ways in which live music is very deliberately produced and does not just spontaneously materialize. Along the way, author Steve Waksman uses previously unstudied archival materials to shed new light on the origins of jazz, the emergence of rock 'n' roll, and the rise of the modern music festival.

Hackers Steven Levy, 2010-05-19 This 25th anniversary edition of Steven Levy's classic book traces the exploits of the computer revolution's original hackers -- those brilliant and

eccentric nerds from the late 1950s through the early '80s who took risks, bent the rules, and pushed the world in a radical new direction. With updated material from noteworthy hackers such as Bill Gates, Mark Zuckerberg, Richard Stallman, and Steve Wozniak, *Hackers* is a fascinating story that begins in early computer research labs and leads to the first home computers. Levy profiles the imaginative brainiacs who found clever and unorthodox solutions to computer engineering problems. They had a shared sense of values, known as the hacker ethic, that still thrives today. *Hackers* captures a seminal period in recent history when underground activities blazed a trail for today's digital world, from MIT students finagling access to clunky computer-card machines to the DIY culture that spawned the Altair and the Apple II.
