### **Entrepreneurship in India Alexander**

Newman,Andrea North-Samardzic,Madhura Bedarkar,Yogesh Brahmankar,2021-09-30 The economic liberalization in India over the last three decades has

provided a wealth of opportunity for entrepreneurs looking to start and expand their businesses. Since the economy opened up in the 1990s, entrepreneurial activity in the private sector has been largely responsible for the strong economic growth experienced in the country. India is presently the world's third largest source of start-ups, and was ranked the second most entrepreneurial country in the world in the recent Global Entrepreneurship Monitor (GEM) report, ahead of large economic powerhouses such as the United States, China and the UK. Entrepreneurship in India looks at the dynamic and changing nature of entrepreneurship in India. The book examines the history of entrepreneurship in India, different entrepreneurship models adopted, the entrepreneurial ecosystem and looks at the future of entrepreneurship in the country. This book will benefit businesspeople, policy makers and researchers looking to understand more about entrepreneurship in India, and offers guidance to foreign businesses looking to engage with entrepreneurs in India.

**Recasting India** Hindol Sengupta, 2014-11-18 Twenty years after India opened its economy, it faces severe economic problems, including staggering income inequality. A third of its citizens still lack adequate food, education, and basic medical services, while Mumbai businessman Mukesh Ambani lives in the most expensive home in the world, which cost over a billion dollars to build. Despite the fact that India now has a Mars mission, there are still more mobile phones than toilets in the country. In most places, such a disparity would have the locals pounding at the gates. So why no Arab Spring for India? Hindol Sengupta, senior editor of Fortune India, argues that the only thing holding it back is the explosion of local entrepreneurship across the country. While these operations are a far cry from the giant companies owned by India's ruling

billionaires, they are drastically changing its politics, upending the old caste system, and creating a middle India full of unprecedented opportunity. Like Gazalla Amin whose flourishing horticulture business in the heart of Kashmir has given her the title 'lavender queen.' Or Sunil Zode, who stole the first shoes he ever wore and now drives a Mercedes, thanks to his thriving pesticide business. Sengupta shows that the true potential of India is even larger than the world perceives, since the economic miracle unfolding in its small towns and villages is not reflected in its stock markets. Recasting India reveals an India rarely seen by the larger world—the millions of ordinary, enterprising people who are redefining the world's largest democracy.

*Indian Women as Entrepreneurs* Payal

Kumar, 2016-06-22 This unique edited collection explores the ways in which entrepreneurship acts to shape self-identity for Indian women and validate their identities in a patriarchal society. Differing from existing literature which focuses on the antecedents of entrepreneurship for women and their performing outcomes, *Indian Women as Entrepreneurs* questions whether entrepreneurship is simply about exploiting a business opportunity for profitability. Asserting that both work and societal environments have an impact on an entrepreneur's self-identity, this book demonstrates ways in which self-concept influences the entrepreneur's relationship with their work in terms of motivation, effort and performance. Building on *Unveiling Women's Leadership*, this book provides an original and important contribution to the literature on entrepreneurial Indian women.

India Land of a Billion Entrepreneurs Upendra

Kachru, 2011 Stories of accomplishments of several inventors and entrepreneurs of all times and diverse

backgrounds, complete with facts and figures, make this book interesting for general readers and of special value to young professionals as well as management students.

**Entrepreneurship Development in India** Debasish Biswas, Chanchal Dey, 2021-05-09 Entrepreneurship development is a major area of focus today as it has huge potential in creating jobs and self-employability and thus contributing to economic development. India, in the last few years in particular, has seen exponential growth of start-ups and new-age entrepreneurs. Both the Central and State Governments have been taking proactive steps towards the development of entrepreneurship in the country. The Government has launched various schemes and programmes to attract investors and create a healthy ecosystem for entrepreneurship. India is one of the largest homes of start-ups in the world and has been highly successful in bringing significant amounts of Foreign Direct Investment (FDI). Moreover, the Government is taking active steps in removal of the bureaucratic hurdles and bottlenecks, so that entrepreneurship development is encouraged. In order to promote the culture of entrepreneurship development, the subject has been made part of the curriculum at both undergraduate and postgraduate levels across disciplines. This book is a sincere attempt to build the fundamentals of the subject amongst students alongside motivating them to become future entrepreneurs. It will be of interest to researchers, academics, and students in the fields of business administration, management, and entrepreneurship.

**Start-up Sutra** Rohit Prasad, 2013-02-10 If you have ever dared to dream big, this book will change your life. Through the true stories of two people ? Abhishek and Abhinav Sinha, founders of the IT organization, Eko ? who braved the rough road, Start-up Sutra presents

entrepreneurship in its essence ? not a checklist to be crossed, but a passion to be lived. Bringing to life the daily dramas, the struggles in the trenches, the battles with inner demons and impossible external odds that need to be overcome on the journey to achievement, this inspiring, multi-layered story enumerates the five qualities that every entrepreneur must possess: courage, resilience, the capacity for creative action, dispassion, and faith in the intent of the universe.

Billions of Entrepreneurs Tarun Khanna, 2008-02-01  
China and India are home to one-third of the world's population. And they're undergoing social and economic revolutions that are capturing the best minds--and money--of Western business. In *Billions of Entrepreneurs*, Tarun Khanna examines the entrepreneurial forces driving China's and India's trajectories of development. He shows where these trajectories overlap and complement one another--and where they diverge and compete. He also reveals how Western companies can participate in this development. Through intriguing comparisons, the author probes important differences between China and India in areas such as information and transparency, the roles of capital markets and talent, public and private property rights, social constraints on market forces, attitudes toward expatriates abroad and foreigners at home, entrepreneurial and corporate opportunities, and the importance of urban and rural communities. He explains how these differences will influence China's and India's future development, what the two countries can learn from each other, and how they will ultimately reshape business, politics, and society in the world around them. Engaging and incisive, this book is a critical resource for anyone working in China or India or planning to do business in these two countries.

*Boom Country?* Alan Rosling, 2017-05-20 In *Boom*

Country?, Alan Rosling, entrepreneur and strategic advisor in India for over 35 years, explores an unmistakable and profound change that is underway in the Indian business landscape. A fresh wave of enterprise and start-ups; rapid advancements in technology; government reform; and recently developed pools of risk capital, he holds, are contributing increasingly to a massive expansion in new business ? all of it underpinned by a deep social change, a willingness to `do things differently?, especially among the young. Drawing upon his own experiences and more than 100 interviews with Indian entrepreneurs ? representing traditional leading business houses (Tata, Mahindra and Godrej), established first-generation entrepreneurs (Sunil Mittal, Kishore Biyani and Narayana Murthy, among others) and new-generation start-ups (including Sachin Bansal, Bhavish Aggarwal and Vijay Shekhar Sharma) ? as well as forces of the government, Rosling provides an incisive and in-depth analysis of the opportunities and challenges, both traditional and contemporary, of doing business in India. Yet, the growing uncertainty of global trends and India?s own record of under-performing despite its massive potential, lead him to one vital question: Can the current upsurge in entrepreneurial activity ? imperfect and early as it may be ? really reshape India?s economy and propel it towards becoming a true boom country for new enterprise?

**Entrepreneurship Development in India** Anshuja Tiwari, 2007

The Indian Entrepreneur Bruno Dorin, 2003 Drawing a sociological profile of the Indian entrepreneur is an ambitious and tricky task. India is a world of diversities, and the same is true in its corporate world. Some great Indian businessmen developed world-wide activities, while others confined themselves to the local market. They may be deeply attached to the traditions of their religious or caste community, whereas others are very westernised and have been so for generations. They may be heirs to an hundred-year old family business, or self-made men whose affairs flourished within a few years. They may have studied in prestigious business schools, or given up their studies rather early. In order to have an overview of these various universes, and also to provide a practical guide of key names and concepts, this book focuses on three different levels; the socio-cultural world (family, community and value-concepts in India), the politics of business (history and strategy of five Indian industrial empires) and the employer in his enterprise (international leather shoemakers in the southern state of Tamil Nadu). Published in association with Centre de Sciences Humaines, New Delhi.

### Entrepreneurship and Rural Women in India Jitendra

Ahirrao,2013 In India, entrepreneurship has assumed prime importance - both in research and in action - for accelerating economic growth. An entrepreneur is a critical factor who strives to reorient the national strategies and bring out the desired changes in the development pattern. Contrary to the earlier belief that entrepreneurs are a special breed and are born with special traits, entrepreneurship can be cultivated through proper training and financial support. An entrepreneur is a catalyst who can mobilize different resources and put them to effective use. In any nation, women constitute the backbone a country's prosperity. However, the role played by rural women in

India's economic development has not been assigned sufficient importance. Women face gender-specific barriers in access to education, health, and employment. As well, women have little control over assets. Women are often under-paid or unpaid for their work. Their contribution to society and the economy are often ignored. This book examines at the role of women entrepreneurship in India's rural areas. The book shows that encouraging women to set up small enterprises - particularly in rural areas - is an effective method to promote their welfare, development, and empowerment.

**Indian Entrepreneurship** Jay Mitra, 2020-12-15 This book provides cutting-edge insights into factors, issues and instruments that foster entrepreneurship and innovation in its various guises ,in India - the fastest growing economy in the world today. India's future is predicated upon the capabilities of its people and organisations to identify and develop new products, services, types of organization and new forms of economic and social engagement with producers, consumers, institutions, and her citizens. The book addresses four critical factors - people, technology, organisations and society. It evaluates how Indian entrepreneurs utilise their range of key skills and entrepreneurial competencies in local and transnational environments. It explores how software and technological development, and the reorganisation of the public research infrastructure, are leading to a transformation of our organisations and our capacity to develop new ones. Further, it examines the role of socially-unity-driven entrepreneurship and community-based innovation centred round the arts and culture in urban and rural settings, in promoting socially oriented transformation. The book aims to offer a small but rich portfolio of India's unique entrepreneurial capabilities.
