Environmental Tracking for Public Health Surveillance Stanley

A. Morain, Amelia M. Budge, 2012-09-25 Satellite imagery and data are widely used in public health surveillance to provide early warning of disease outbreaks and for averting pandemics. Convergence of these technologies began in the 1970s and has gained wide acceptance in the 21st Century. *Environmental Tracking for Public Health Surveillance* focuses on the expanding use of satellite sensor imagery and long-term spectral measurements for assessing and modelling Earth's environments in context of public health surveillance. It addresses vector-borne, air-borne, water-borne, and zoonotic diseases, and explores analytical methods for forecasting environmental conditions and their potential for consequent disease outbreaks. Infectious and contagious diseases are of particular interest in this volume because once parasite-vector-human host pathways are triggered by favourable biological circumstances, pandemic diseases can spread to global scale in a matter of hours. The chapters advance readers through three sets of material. Part I reviews the 1970-2012 history of satellite Earth-science surveillance technology that led to linking natural environments to human diseases, and more generally to public health applications. Part II describes specific infectious and contagious diseases and the threat of emerging and re-emerging diseases. Part III explores the kinds of satellite data, modelling, and electronic information systems being developed to expedite health intercessions and responses at local to regional and global scales of reference. Equally important are the extensive reference sections for chapters in Parts II and III. For readers interested in tracking the development of Earth-science technology, these constitute a thorough entrée to both the health and environmental literature. The chapters are written jointly

by experts in both the health and Earth-science technologies. Each chapter is accompanied by an extensive list of citations to provide background and validation of the current state-of-the-art for a variety of high-interest human diseases and associated health and well-being issues. The importance of day-to-day weather patterns, the impacts of severe weather events and longer-term climate cycles form the basis for developing information systems that meet goals and expectations of national and international health monitoring bodies. Environmental Tracking for Public Health Surveillance provides a state-of-the-art overview on how environmental tracking data from satellite, airborne, and ground-based sensors are being integrated into appropriate geophysical and spatial information system models to enhance public health surveillance and decision-making from local to global levels, and is intended primarily for a cross-disciplinary professional audience consisting of public health decision-makers, spatial data analysts, modelers, Earth observation specialists, and medical researchers.

Understanding the Spillovers and Transboundary Impacts of Public Policies Implementing the 2030 Agenda for More Resilient Societies OECD, Joint Research Centre - European

Commission, 2021-04-08 The multidimensional and intergenerational nature of the 2030 Agenda for Sustainable Development and the Sustainable Development Goals (SDGs) calls for integrated policies. Progress made in a particular social, economic or environmental area or individual goal may generate synergies and trade-offs across dimensions (spillover effects), and steps taken in one country could have positive or negative impacts beyond national borders (transboundary effects).

The Expendables Jeff Rubin, 2022-02-01 NATIONAL

BESTSELLER A Globe and Mail Favourite Book of 2020 From the #1 bestselling author of *Why Your World Is About to Get a Whole Lot Smaller*, a provocative, far-reaching account of how the middle class got stuck with the bill for globalization, and how the blowback—from Brexit to Trump to populist Europe—will change the developed world. Real wages in North America have not risen since the 1970s. Union membership has collapsed. Full-time employment is beginning to look like a quaint idea from the distant past. If it seems that the middle class is in retreat around the developed world, it is. Former CIBC World Markets Chief Economist Jeff Rubin argues that all this was foreseeable back when Canada, the United States and Mexico first started talking free trade. Growing global inequality is a problem of our own making, he says. And solving it won't be easy if we draw on the same ideas about capital and labour, right and left, that led us to this cliff. Articulating a vision that dovetails with the ideas of both Naomi Klein and Donald Trump, *The Expendables* is an exhilaratingly fresh perspective that is at once humane and irascible, fearless and rigorous, and most importantly, timely. GDP is growing, the stock market is up and unemployment is down, but the surprise of the book is that even the good news is good for only one percent of us.

World Congress on Medical Physics and Biomedical Engineering, June 7-12, 2015, Toronto, Canada David A. Jaffray, 2015-07-13 This book presents the proceedings of the IUPESM World Biomedical Engineering and Medical Physics, a tri-annual high-level policy meeting dedicated exclusively to furthering the role of biomedical engineering and medical physics in medicine. The book offers papers about emerging issues related to the development and sustainability of the role and impact of medical physicists and biomedical engineers in

medicine and healthcare. It provides a unique and important forum to secure a coordinated, multileveled global response to the need, demand and importance of creating and supporting strong academic and clinical teams of biomedical engineers and medical physicists for the benefit of human health.

Single Molecule Tools, Part B: Super-Resolution, Particle Tracking, Multiparameter, and Force Based Methods ,2010-07-09

Single molecule tools have begun to revolutionize the molecular sciences, from biophysics to chemistry to cell biology. They hold the promise to be able to directly observe previously unseen molecular heterogeneities, quantitatively dissect complex reaction kinetics, ultimately miniaturize enzyme assays, image components of spatially distributed samples, probe the mechanical properties of single molecules in their native environment, and just look at the thing as anticipated by the visionary Richard Feynman already half a century ago. Single Molecule Tools, Part B: Super-Resolution, Particle Tracking, Multiparameter, and Force Based Methods captures a snapshot of this vibrant, rapidly expanding field, presenting articles from pioneers in the field intended to guide both the newcomer and the expert through the intricacies of getting single molecule tools. Includes time-tested core methods and new innovations applicable to any researcher employing single molecule tools. Methods included are useful to both established researchers and newcomers to the field. Relevant background and reference information given for procedures can be used as a guide to developing protocols in a number of disciplines

The Disinformation Age Eric Cheyfitz, 2017-02-10

The Disinformation Age, beginning in the present and going back to the American colonial period, constructs an original historical explanation for the current political crisis and the reasons the two major political parties cannot address it effectively. Commentators inside and outside academia have described this crisis with various terms — income inequality, the disappearance of the middle-class, the collapse of the two-party system, and the emergence of a corporate oligarchy. While this book uses such terminology, it uniquely provides a unifying explanation for the current state of the union by analyzing the seismic rupture of political rhetoric from political reality used within discussion of these issues. In advancing this analysis, the book provides a term for this rupture, Disinformation, which it defines not as planned propaganda but as the inevitable failure of the language of American Exceptionalism to correspond to actual history, even as the two major political parties continue to deploy this language. Further, in its final chapter this book provides a way out of this political cul-de-sac, what it terms the limits of capitalism's imagination, by thinking from a different place that is located in the theory and practice of the Indigenous peoples of the Americas.

Tyranny, Inc. Sohrab Ahmari, 2023-08-15 The inside story of how our political class enabled an era of unaccountable corporate might that left ordinary Americans isolated and powerless—and how we can fight back—from the acclaimed author of *The Unbroken Thread* “In *Tyranny, Inc.*, Sohrab Ahmari, one of the leading thinkers of our time, alerts us to one of the greatest threats to freedom.”—Michael Lind, author of *The New Class War* and *Hell to Pay* Over the past two generations, U.S. leaders deregulated big business on the faith that

it would yield a better economy and a freer society. But the opposite happened. Americans lost stable, well-paying jobs, Wall Street dominated industry to the detriment of the middle class and local communities, and corporations began to subject us to total surveillance, even dictating what we are, and aren't, allowed to think. The corporate titans and mega-donors who aligned themselves with this vision knew exactly what they were getting: perfect conditions for what Sohrab Ahmari calls "private tyranny". Drawing on original reporting and a growing chorus of experts who are sounding the alarm, Ahmari chronicles how private tyranny has eroded America's productive economy and the liberties we take for granted—from employment agreements that gag whistleblowers, to Big Finance's takeover of local fire departments, to the rigging of corporate bankruptcy to deny justice to workers and consumers—illuminating how these and other developments have left millions feeling that our livelihoods are insecure. And he shows how ordinary Americans can fight back, by restoring the economic democracy that empowered and uplifted millions of working-class people in the twentieth century. Provocative, original, and cutting across partisan lines, *Tyranny, Inc.* is a revelatory read on the most important political story of our time.

Tracking the Money United States. Congress. House. Committee

on Oversight and Government Reform,2010

Tracking the Neolithic House in Europe Daniela Hofmann,Jessica Smyth,2012-12-09 The Neolithic period is noted primarily for the change from hunter-gatherer societies to agriculture, domestication and sedentism. This change has been studied in the past by archaeologists observing the movements of plants, animals and people. But has not been examined by looking at the domestic architecture of the time. Along with tracking the movement of sedentism, Neolithic houses are also able to show researchers the beginnings of cultural identity, group representation through the construction and decoration of these structures. Additionally as agriculture moved west and north in this era, the architecture and material culture shows this change and its significance. Chapters are arranged chronologically so that authors can address differences and similarities of their region to neighboring ones. To ensure continuity, authors have framed the chapters around the following considerations: construction materials and architectural characteristics; how houses facilitated or perpetua

Rural Communities Cornelia Butler Flora,2018-03-05

Communities in rural America are a complex mixture of peoples and cultures, ranging from miners who have been laid off in West Virginia, to Laotian immigrants relocating in Kansas to work at a beef processing plant, to entrepreneurs drawing up plans for a world-class ski resort in California's Sierra Nevada. *Rural Communities: Legacy and Change* uses its unique Community Capitals framework to examine how America's diverse rural communities use their various capitals (natural, cultural, human, social, political, financial, and built) to address the modern challenges that face them. Each chapter opens with a case study of a community facing a particular challenge, and is followed by a comprehensive discussion of sociological concepts to be

applied to understanding the case. This narrative, topical approach makes the book accessible and engaging for undergraduate students, while its integrative approach provides them with a framework for understanding rural society based on the concepts and explanations of social science. This fifth edition is updated throughout with 2013 census data and features new and expanded coverage of health and health care, food systems and alternatives, the effects of neoliberalism and globalization on rural communities, as well as an expanded resource and activity section at the end of each chapter.

Are data available for tracking progress on nutrition policies, programs, and outcomes in Pakistan? Neupane, Sumanta, Jangid, Manita, Scott, Samuel, Nguyen, Phuong Hong, Kim, Sunny S., Murira, Zivai, Torlesse, Harriet, Menon, Purnima, 2021-07-15 The World Health Organization (WHO) and other global nutrition and health agencies recommend nutrition actions throughout the life-course to address malnutrition in all its forms. In this report, we examined how Pakistan's nutrition policies and programs addressed recommended nutrition actions, nutrition outcomes, and the determinants of these outcomes. We reviewed population-based surveys and administrative data systems to assess the availability of data on nutrition actions and on indicators of determinants and outcomes. Our policy review identified a total of 53 recommended evidence-based nutrition actions, of which 51 were applicable to Pakistan; of those, 47 were addressed in nutrition policies and programs. Nutrition actions not included in current policies and programs were: daily iron and folic acid (IFA) supplementation and deworming during preconception; and food supplementation for complementary feeding, and daily IFA supplementation during early childhood. The Pakistan Multi-Sectoral Nutrition Strategy (PMNS) (2018–2025) was found to recognize and address all the key determinants of nutrition; it also expressed an intent to address all the Sustainable Development Goal (SDG) nutrition targets for maternal, infant, and young child nutrition. Targets for noncommunicable diseases (NCDs) were not currently set in the national strategies. Our data review found that, out of 47 actions that policies and programs addressed, population-based surveys contained data on 26 actions and administrative data sources contained data on 22

actions. Neither surveys nor administrative sources contained data on any actions aimed at adolescence, on energy and protein dietary supplements, on various types of counseling, on birth preparedness during pregnancy, or on optimal timing (delayed) of umbilical cord clamping; they also did not contain data on indicators related to newborn care, IFA supplementation around delivery and in the postpartum period, or counseling after growth monitoring during early childhood. The data gaps in population-based surveys on nutrition actions during early childhood were compensated for by the data on these nutrition actions that was available from administrative sources. Neither of the population-based surveys contained data on nutrition actions during early childhood such as breastfeeding counseling, counseling on appropriate complementary feeding, growth monitoring, and identification and management of severe acute malnutrition (SAM), or management of moderate acute malnutrition (MAM); administrative data sources, however, contained data on these actions. Population-based surveys contained data on most of the indicators on immediate and underlying determinants of undernutrition, but administrative data sources lacked data on indicators of immediate determinants. Population-based surveys contained data on all outcome indicators. In conclusion, Pakistan's policy landscape for nutrition is robust, but there is limited consideration of targets for NCDs. The gaps in data availability for tracking progress on nutrition are much greater than are the gaps in policies and programs for addressing the recommended actions. Future population-based surveys and future modifications of other data systems should aim to fill the identified data gaps for nutrition actions.
