Calorimetry In High Energy Physics - Proceedings Of The 7th International Conference Elliot Cheu, John P Rutherford, Teresa Embry, Richard Wigmans, 1998-09-22 This volume covers all aspects of particle detection using calorimetric techniques. The emphasis is on methods currently employed in existing detectors, with some articles devoted to techniques under development.

Technology and Events Vanessa Martin, Luiz Cazarre, 2016-10-04 Explores the use of technology to improve results on all kinds of events from initial planning stages right through to post event debriefing. This book provides all the solutions and tips on how to maximize the participation of your audience, cut costs and have better revenues from your events.

Knowledge Science, Engineering and Management Gerard Memmi, Baijian Yang, Linghe Kong, Tianwei Zhang, Meikang Qiu, 2022-07-19 The three-volume sets constitute the refereed proceedings of the 15th International Conference on Knowledge Science, Engineering and Management, KSEM 2022, held in Singapore, during August 6-8, 2022. The 169 full papers presented in these proceedings were carefully reviewed and selected from 498 submissions. The papers are organized in the following topical sections: Volume I: Knowledge Science with Learning and AI (KSLA) Volume II: Knowledge Engineering Research and Applications (KERA) Volume III: Knowledge Management with Optimization and Security (KMOS)

Event Success Alon Alroy, Eran Ben-Shushan, Boaz Katz, 2022-03-29 Make events the most powerful marketing tool you have In *Event Success: Maximizing the Business Impact of Physical, Virtual, and Hybrid Experiences*, Alon Alroy, Eran Ben-Shushan, and Boaz Katz of Bizzabo draw on the knowledge they've gained powering events for companies like Amazon, Salesforce, and Uber to deliver an end-to-end playbook for readers wanting to maximize their organization's return on events. *Event Success* will help you unlock the full potential of your events and make them your most important marketing channel. You'll learn how to create elevated experiences in any format that drive strategic business goals, including: How to measure event success with surveys, data, analytics, and key KPIs How to integrate events into a strategic, end-to-end marketing plan How to collect, analyze, and funnel event data to other teams to drive business growth What events are successful, what the data says about them, and real-life examples from SAP, the Financial Times, IBM, and other leading brands that capture the imagination of their audiences through events *Event Success* is ideal for marketers, event professionals, and anyone responsible for creating buzz, driving new sales, and building thought leadership with in-person, hybrid, or virtual events. It's also an invaluable resource for maximizing your organization's "RoE"—or Return on Event—with measurable increases in sales.

Recent Trends in Data Type Specification Michel Bidoit, Christine Choppy, 1993-01-29 The algebraic specification of abstract data types has been a flourishing research topic in computer science since 1974. The main goal of this work is to evolve theoretical foundations and a methodology to support the design and formal development of reliable software. This volume gives the proceedings of the Eighth Workshop on Specification of Abstract Data Types, held jointly with the Third COMPASS workshop near Paris in August 1991. The main topics covered by the joint workshop are: - specification languages and program development - algebraic specification of concurrency - theorem proving - object-oriented specifications - order-sorted algebras - abstract implementation and behavioral semantics. The volume contains four invited surveys and twelve contributed papers, all of which underwent a careful refereeing process.

Mobile and Ubiquitous Systems: Computing, Networking and Services Takahiro Hara, Hirozumi Yamaguchi, 2022-02-08 This book constitutes the refereed post-conference proceedings of the 18th International Conference on Mobile and Ubiquitous Systems: Computing, Networking and Services, MobiQuitous 2021, which was held in November 2021. The conference was held virtually due to the COVID-19 pandemic. The 37 full papers were carefully reviewed and selected from 79 submissions and present discussions, interaction and exchange of experiences that will designate future

research efforts and directions. Topics addressed by the conference include systems, applications, social networks, middleware, networking, sensing, data management, data processing and services, all with special focus on mobile and ubiquitous computing.

Kant and the Metaphysics of Causality Eric Watkins, 2005 A book about Kant's views on causality as understood in their proper historical context.

Business Process Management Mathias Weske, Marco Montali, Ingo Weber, Jan vom Brocke, 2018-08-31 This book constitutes the proceedings of the 16th International Conference on Business Process Management, BPM 2018, held in Sydney, Australia, in September 2018. The 27 papers presented in this volume were carefully reviewed and selected from 140 submissions. They were organized in topical sections named: reflections on BPM; concepts and methods in business process modeling and analysis; foundations of process discovery; alignments and conformance checking; process model analysis and machine learning; digital process innovation; and method analysis and selection.

Temporal Databases: Research and Practice Opher Etzion, 1998-05-13 This is an introductory text to the science of neurobiology, describing animal nervous systems, what they consist of, how they work, and how they are studied. Unlike many other neurobiology texts, considerable discussion is given to both human and non-human nervous systems. Written in an easy-to-read style, it will be useful for both biology and medical students. It provides the opportunity for self-testing at the end of each chapter, with objectives and questions. A CD-ROM entitled 'The Human Brain' (ISBN 3-540-14666-0) has been produced to accompany this text, and can be purchased either separately or together with the book (ISBN 3-540-63778-8).

Reinventing Live Denzil Rankine, Marco Giberti, 2020-12-18 Forget the traditional one-off, in-person event. Welcome to a new world, where event organizers no longer see themselves as pure organizers; rather their role is to facilitate - business, connections, education and advocacy. Events are fast-becoming catalysts for building communities and nurturing customer relationships 'all year round' - with the use of event technology at its core. The authors Denzil Rankine and Marco Giberti have seen it all in their 30 years of consulting, operating and investing across the global exhibitions and events industry. Based on dozens of their interviews with senior executives, entrepreneurs and investors this book is packed full of practical case studies that will equip readers with new strategies, tools and insights they can apply back into their day-to-day roles. This book is a must-read for C-Level management, marketing and event professionals, or anyone looking to participate in the events industry.

The 21st Century Meeting and Event Technologies Seungwon "Shawn" Lee, Dessislava Boshnakova, Joe Goldblatt, 2017-03-03 Here is the first book to specifically and comprehensively address the rapid changes and advances in technology in the planning, management, and marketing of meetings and events. The multigenerational trio of authors, including Joe Goldblatt and two of his former students, Seungwon Shawn Lee and Dessislava Boshnakova, cover the most important aspects of using technology for today's meetings and events, such as How to harness the power of social media How to use crowdsourcing effectively How to choose appropriate room layout design software How to manage and use guest-generated content How to measure and evaluate your success How to choose meeting registration software How to promote your meeting with blogs, websites, podcasts, and more How to hold virtual meetings and events How to use search engine optimization to advantage The area of meeting and event technology is a fast-growing component of the meetings, incentives, conventions and exhibition (MICE) industry. With a foreword by Corbin Ball, an internationally renowned speaker, consultant and writer in the meetings and events technology field, The 21st Century Meeting and Event Technologies will be an essential resource for hospitality students and business professionals. Risk Assessment and Decision Analysis with Bayesian Networks Norman Fenton, Martin Neil, 2018-09-03 Since the first edition of this book published, Bayesian networks have become even more important for applications in a vast array of fields. This second edition includes new material on influence diagrams, learning from data, value of information, cybersecurity, debunking bad statistics, and much more. Focusing on practical real-world problem-solving and model building, as opposed to algorithms and theory, it explains how to incorporate knowledge with data to develop and use (Bayesian) causal models of risk that provide more powerful insights and better decision making than is possible from purely data-driven solutions. Features Provides all tools necessary to build and run realistic Bayesian network models Supplies extensive example models based on real risk assessment problems in a wide range of application domains provided; for example, finance, safety, systems reliability, law, forensics, cybersecurity and more Introduces all necessary mathematics, probability, and statistics as needed Establishes the basics of probability, risk, and building and using Bayesian network models, before going into the detailed applications A dedicated website contains exercises and worked solutions for all chapters along with numerous other resources. The AgenaRisk software contains a model library with executable versions of all of the models in the book. Lecture slides are freely available to accredited academic teachers adopting the book on their course.

Risk Management for Events Julia Rutherford Silvers, William O'Toole, 2020-12-27 Risk Management for Events is a comprehensive and practical guide that supports academic and professional development programs to prepare individuals for entering or advancement in the international events industry. Events of all types are produced every day for all manner of purposes, attracting all sorts of people. Creating and managing the environment in which these people will gather carries with it awesome responsibilities — legal, ethical, and financial. To provide a safe and secure setting and to operate in a manner that ensures that the hosting organizations or individuals achieve their objectives in a proper and profitable way, event risk management must be fully integrated into all event plans and throughout the event management process. This new edition has been revised and updated to include: New case studies and examples from a wide range of international destinations and different types of events. Updated statistics and data throughout. New content on emergent risk, on-site decision-making, terrorism, and public health, including the COVID-19 pandemic, and corruption within events. Updated online material, including a case study archive and weblinks to useful resources. This will be an invaluable resource for all those studying events management.

Events - Future, Trends, Perspectives Kim Werner, Ding Ye, 2020-05-11 Events - future, trends, perspectives provides insights into many of the recent developments within the diverse event industry. International scholars and experts with backgrounds in multiple related fields have taken up exciting research topics and offer perspectives, thoughts and views on a number of current and future issues and challenges. The topics are as diverse as the industry itself and include discussions on gender and diversity, disruptive technologies, sustainability, psychological effects, the co-creation of experiences, the future of event education and many more. Vivid case studies and best practice examples are used to illustrate current and future developments and to spark discussion and debate amongst scholars, practitioners and students alike. The Corona crisis (Covid-19) is having a massive impact on the events industry. Due to the editorial deadline of this book in February 2020, this topic could not be considered in this edition. Supersymmetry And Unification Of Fundamental Interactions (Susy 93) - Proceedings Of The International Workshop Pran Nath, 1993-11-22 The recent high precision results from the LEP supercollider at CERN appear favorable for supergravity unification of the electroweak and the strong forces. The proceedings of the SUSY 93 Workshop focus on further precise predictions of unification which may be observed in the laboratory. In addition, the proceedings cover a wide range of other topics in supersymmetry, supergravity, particle physics, string theory and cosmology and their interconnections. They include both theoretical and experimental papers, hence presenting a complete and comprehensive picture of this important subject.

Integrated Formal Methods Jim Davies, Jeremy Gibbons, 2007-06-22 This book constitutes the refereed proceedings of the 6th International Conference on Integrated Formal Methods, IFM 2007, held in Oxford, UK. It addresses all aspects of formal methods integration, including of a process of analysis or design application of formal methods to analysis or design, extension of one method based upon the inclusion of ideas or concepts from others, and semantic integration or practical application.

Events MISmanagement Tim Brown, Phil Higson, Lindsey Gaston, 2022-05-11 A unique text that looks at events from a very different perspective – that of how and why events fail and what can be learnt from this in both a practical and academic perspective. It provides a case study approach to the event planning process with the cases illustrating how core planning theory and concepts fails to emerge in practice and why.

Green Mobile Networks Nirwan Ansari, Tao Han, 2017-03-22 Green communications is a very hot topic. As mobile networks evolve in terms of higher rates/throughput, a consequent impact on operating costs is due to (aggregate) network energy consumption. As such, design on 4G networks and beyond have increasingly started to focus on ‘energy efficiency’ or so-called ‘green’ networks. Many techniques and solutions have been proposed to enhance the energy efficiency of mobile networks, yet no book has provided an in-depth analysis of the energy consumption issues in mobile networks nor has detailed theories, tools and solutions for solving the energy efficiency problems. This book presents the techniques and solutions for enhancing energy efficiency of future mobile networks, and consists of three major parts. The first part presents a general description of mobile network evolution in terms of both capacity and energy efficiency. The second part discusses the advanced techniques to green mobile networks. The third part discusses the solutions that enhance mobile network energy efficiency as well as provides future directions. Whilst the reader is expected to have basic knowledge of wireless communications, the authors present a brief introduction of the evolution of mobile networks, providing the knowledge base for understanding the content of the book. In addition, complicated network problems are illustrated using simple examples. This will help the reader understand the concept and intuition of various techniques and solutions. Incorporates the latest research results from both academia and industry, providing an up-to-date overview of existing technologies and solutions on making mobile networks greener

Consists of three sections with a gradually increasing technical depth on green mobile networks, providing the reader with a systematic view of the research area, and helping those with different technical backgrounds to better understand the content Covers existing enabling technologies for green mobile networking, including an innovative discussion of state-of-the-art solutions and algorithms
