*Contemporary Switzerland* H. Kriesi,P. Farago,M. Kohli,M. Zarin-Nejadan,2005-06-06 This volume presents the major findings involved in a large scale research programme to describe and analyse the transformation of contemporary Swiss society. The contributions focus on three key areas: the Swiss way of life, the Swiss labour market and the country's political institutions. The chapters give an idea of current trends in Swiss society, each one framing their argument in a comparative perspective.

*Components and Instruments for Distributed Control Systems* Z. Binder,R. Perret,2014-05-17 Components and Instruments for Distributed Control Systems provides a conceptual framework for organizing the elements of the distributed system for integration of the many diverse information processing, decision-making, and control functions that are involved in a total plant control. With the

enormous progress in micro-electronics that has taken place over the past years, intelligent instruments can now be created that integrate processing once reserved for calculators. This book notes that the development of distributed micro-computing systems is linked to this progress, and their use in industry and in service areas is becoming more and more widespread. This text also emphasizes that great progress has also been made in the design of sensors and other components in the automatic control chain. This book is a useful reference for students and individuals studying instrument development and its use in distributed control.

**Nokia Smartphone Hacks** Michael Juntao Yuan, 2005 Nokia's smartphones pack a powerful computer into a very small space. Unlike your desktop or laptop, your smallest computer can be connected to the Internet all the time, and can interact with the world around it through its camera, voice recognition, and its traditional phone keypad. Nokia smartphones combine these features with impressive storage options and a host of networking protocols that make this smallest computer the only thing a road warrior truly needs. If you're still cracking open your laptop or pining for your desktop

while you're on the road, you haven't begun to unlock your Nokia's full potential. Nokia Smartphone Hacks is dedicated to tricking out your smartphone and finding all the capabilities lurking under the surface. Learn how to: Unlock your phone so that you can use it with any carrier Avoid and recover from malicious mobile software Watch DVD movies on the phone Use the phone as a remote control Use the phone as a data modem for your notebook Check your email and browse the web Post to your weblog from your phone Record phone conversations Choose mobile service plans Transfer files between the phone and your computer Whether you want to use your smartphone as your lifeline while you're on the road, or you're just looking for a way to make the most of the time you spend waiting in lines, you'll find all the user-friendly tips, tools, and tricks you need to become massively productive with your Nokia smartphone. With Nokia Smartphone Hacks, you'll unleash the full power of that computer that's sitting in your pocket, purse, or backpack.

Artificial Intelligence in Design '91 J. S. Gero, 2014-05-23 Artificial Intelligence in Design '91 is a collection of 47 papers from the First International Conference on Artificial Intelligence in Design held

at Edinburgh in June 1991. The papers in this book are grouped into 13 headings, starting with a background of AI design systems and to which extent AI that results from being used as planning tool be applied to quality-oriented design processes in architecture. A constraint-driven approach to object-oriented design is also shown on real-world objects. The use of CADSYN in the structural design of buildings is examined, along with design-dependent knowledge and design-independent knowledge. Discussions on empowering designers with integrated design environments are given whereby design objects may be retrieved from catalogues without requiring users to form queries. Mention is given to automated adjustment of parameter values frequently used in computer routine applications. The book also introduces the Computer Aided Design (CAD) as applied to architecture. Design representation using data models, non-monotonic reasoning in design, and the cognitive aspects of design using empirical studies are discussed. Topics of the industrial applications of AI in design, such as the needed steps to develop a successful AI-based tool, and a review of the Castlemain Project and telecommunication distribution networks follow. This book is suitable for programmers, computer

science students, and architects and engineers who use computers in their line of work.

**Social Computing and Social Media: Design, User Experience and Impact** Gabriele

Meiselwitz,2022-06-16 This two-volume set LNCS 13315 and 13316 constitutes the refereed proceedings of the 14th International Conference on Social Computing and Social Media, SCSM 2022, held as part of the 24rd International Conference, HCI International 2022, which took place in June-July 2022. Due to COVID-19 pandemic the conference was held virtually. The total of 1276 papers and 275 posters included in the 40 HCII 2022 proceedings volumes was carefully reviewed and selected from 5583 submissions. The papers of SCSM 2022, Part I, are organized in topical sections named: design and user experience in social media and social live streaming; text analysis and AI in social media; social media impact on society and business.

**Pushed Out** Ryanne Pilgeram,2021-05-11 What happens to rural communities when their traditional economic base collapses? When new money comes in, who gets left behind? *Pushed Out* offers a rich portrait of Dover, Idaho, whose transformation from “thriving timber mill town” to “economically depressed small town” to “trendy second-home location” over the past four decades embodies the story and challenges of many other rural communities. Sociologist Ryanne Pilgeram explores the structural forces driving rural gentrification and examines how social and environmental inequality are written onto these landscapes. Based on in-depth interviews and archival data, she grounds this highly readable ethnography in a long view of the region that takes account of geological history, settler colonialism, and histories of power and exploitation within capitalism. Pilgeram’s analysis reveals the processes and mechanisms that make such communities vulnerable to gentrification and points the way to a radical justice that prioritizes the economic, social, and

environmental sustainability necessary to restore these communities.

Crafting the Witch Heidi Breuer,2009-05-05 This book analyzes the gendered transformation of magical figures occurring in Arthurian romance in England from the twelfth to the sixteenth centuries. In the earlier texts, magic is predominantly a masculine pursuit, garnering its user prestige and power, but in the later texts, magic becomes a primarily feminine activity, one that marks its user as wicked and heretical. This project explores both the literary and the social motivations for this transformation, seeking an answer to the question, 'why did the witch become wicked?' Heidi Breuer traverses both the medieval and early modern periods and considers the way in which the representation of literary witches interacted with the culture at large, ultimately arguing that a series of economic crises in the fourteenth century created a labour shortage met by women. As women moved into the previously male-dominated economy, literary backlash came in the form of the witch, and social backlash

followed soon after in the form of Renaissance witch-hunting. The witch figure serves a similar function in modern American culture because late-industrial capitalism challenges gender conventions in similar ways as the economic crises of the medieval period.

**Courtly Literature** International Courtly Literature Society. Congress,1990-01-01 The International

Courtly Literature Society aims to promote the study of courtly literature, primarily, but not exclusively, of medieval Europe. The 45 articles selected here from the papers presented at the 5th Congress center around three themes: rhetoric and courtly literature, the audience of courtly literature, and courtly literature in a comparative perspective. There are contributions by specialists in Old French Literature on such diverse topics as Adenet le Roi, Rene d'Anjou, Le Bel Inconnu, and 15th-century prose chronicles; by Provençalists on the eternal topic of courtly love; by Anglicists on Chaucer, Henryson, Malory, and others; by Germanists on Heinrich von Morungen, der Schwanritter, and Walther von der Vogelweide; by Hispanists on La Celestina and the Historia Troiana; there are also articles on Italian, Dutch, and Scandinavian literature, and two relating to Persian and Arabic courtly texts.
