Uncovering the Logic of English: A Common-Sense Solution to America's Literacy Crisis Denise Eide, 2011-01-27 English is so illogical! It is generally believed that English is a language of exceptions. For many, learning to spell and read is frustrating. For some, it is impossible... especially for the 29% of Americans who are functionally illiterate. But what if the problem is not the language itself, but the rules we were taught? What if we could see the complexity of English as a powerful tool rather than a hindrance? --Denise Eide *Uncovering the Logic of English* challenges the notion that English is illogical by systematically explaining English spelling and answering questions like Why is there a silent final E in have, large, and house? and Why is discussion spelled with -sion rather than -tion? With easy-to-read examples and anecdotes, this book describes: - the phonograms and spelling rules which explain 98% of English words - how English words are formed and how this knowledge can revolutionize vocabulary development - how understanding the reasons behind English spelling prevents students from needing to guess The author's inspiring commentary makes a compelling case that understanding the logic of English could transform literacy education and help solve America's literacy crisis. Thorough and

filled with the latest linguistic and reading research, Uncovering the Logic of English demonstrates why this systematic approach should be as foundational to our education as $1+1=2$.

A tool for teaching English: Podcasts Emil Müllner, 2012-02-21

Seminar paper from the year 2009 in the subject English - Pedagogy, Didactics, Literature Studies, grade: Sehr gut, Educational academy of the federation Steiermarks, course: Akademielehrgang Englisch, language: English, abstract: The goal of this thesis is to gain numerous techniques for integrating podcasts and podcasting into teaching and learning, especially in the subject English. This work is also written for colleagues who want to make a valuable contribution to teaching foreign languages and who have the courage to organize activities combined with innovative technology for our students. Within the pages of this paper, they will find everything they need to know to get started in podcasting. I would be glad, if others use this work or even expand it, so that an active exchange of ideas can take place. At the beginning of this paper I am going to explain what a podcast is and why it is becoming such a popular medium. Next, the thesis gives a short historical overview, shows directories to browse for podcasts and how to create such an audio recording (software,

hardware and recording equipment). Then various techniques for publishing and distributing podcasts are explored. The paper also presents free podcast hosting sites and gives tips about copyright law and how it applies to podcasting. Practical file management strategies, including using iTunes to organize audio files, are also discussed. After building a solid technical foundation, the thesis turns to the way in which podcasting can be used at school. This chapter introduces the reader to a variety of podcasting lessons that can motivate the students.

Slow American English Podcast Workbook Karren Tolliver, 2017-12-22 This workbook is a supplement to the Slow American English podcast but it can also be used alone for reading/writing lessons. The podcast is written, recorded and produced by Karren Doll Tolliver, a CELTA-certified ESL instructor. In the course of her work, Karren recognized the need for students to practice listening skills without the pressure of real-life

conversation with native speakers. Thus, the Slow American English podcast was born. Karren reads each podcast slowly so that learners of American English can practice listening skills. She also reads the same transcript at a more natural speed for more advanced students. Exercises in this workbook reinforce listening, speaking and writing skills. This workbook can be used without the recordings as reading/writing lessons. Each chapter -corresponds to a podcast episode and natural-speed recording -is designed for both self-study and teacher-led instruction -includes a transcript of each podcast, suitable for reading practice -contains three exercises vocabulary-definition matching multiple choice quiz discussion questions -is arranged in worksheet form, with spaces provided for answers; no need for a separate answer sheet.

Grammar Nonsense and What To Do about It Hugh

Dellar, Andrew Walkley, Do you hate teaching some aspects of grammar? Do you ever feel frustrated that your students just don't get it? Well, in Grammar Nonsense, Andrew Walkley and Hugh Dellar argue that you shouldn't really blame yourself. The fault lies largely with the way grammar rules and methods have been passed down through training and published material and become established as the way of doing things: a straightjacket that we need to escape from. Through an entertaining series of rants and meditations on all things grammatical, from the use of the word grammar to the horror of teaching verb patterns, they aim to pull apart rules which we give without thinking and to question approaches to practice that are seen as a must. Along the way, you'll not only learn how published materials get written and about ideas such as the transformation fallacy and grammar olives, but you'll also get plenty of practical suggestions as to what to do about all this nonsense.

Design Solutions for Adaptive Hypermedia Listening Software

Turel, Vehbi, 2021-06-18 Adaptive hypermedia listening software enables materials writers to combine and deliver a wide range of digital elements on the same digital computer platform more efficiently. Such a combination and delivery provides a multidimensional, multi-sensory digital environment in which rich, efficient, instant, comprehensible, optimum, and meaningful input and feedback can be presented effectively and efficiently.

Moreover, language learners' attention can be drawn to forms and meanings in input. Such aspects correspond with different theories and hypotheses of language learning and teaching. This presents users/learners with an environment that is easy to use, tension-free, and optimal during self-study. However, to be able to design

and develop cost effective and professional adaptive hypermedia listening software, there are certain scientific educational findings and implications that need to be implemented at every single stage. To have access to such vital findings is not so easy, and research must address this area. Design Solutions for Adaptive Hypermedia Listening Software explores how to design and create technically and pedagogically sound and efficient interactive adaptive hypermedia listening software for language learners in any language. The chapters will cover learner strategy tools, the effectiveness of this technology, best practices in adaptive hypermedia listening software, and the benefits and challenges of this technology for language learning. It is ideal for companies, institutions, teachers, policymakers, academicians, researchers, advanced-level students, technology developers, and decision-making pertinent government officials interested in designing and developing multimedia listening environments for language learners.

The Power of Reading Stephen D. Krashen, 2004-08-19

Continuing the case for free voluntary reading set out in the book's 1993 first edition, this new, updated, and much-looked-for second edition explores new research done on the topic in the last ten years as well as looking anew at some of the original research reviewed. Krashen also explores research surrounding the role of school and public libraries and the research indicating the necessity of a print-rich environment that provides light reading (comics, teen romances, magazines) as well as the best in literature to assist in educating children to read with understanding and in second language acquisition. He looks at the research surrounding reading incentive/rewards programs and specifically at the research on AR (Accelerated Reader) and other electronic reading products.
