Guido Englich, Burkhard Remmers

Revue Semestrielle Des Publications Mathématiques ,1913

Entre mémoire et pouvoir Antoine Borrut,2010-11-11 Dans une perspective d'histoire de la mémoire et d'histoire des sens, cet ouvrage offre une nouvelle approche de l'espace syrien du 2e/8e siècle, mettant en lumière les projets historiographiques omeyyades et abbassides et leurs pratiques du pouvoir. In a perspective of history of memory and history of the meanings, this book offers a fresh approach of the 2nd/8th century Syrian space, revealing Umayyad and Abbasid historiographical projects, as well as their practices of power.

Differential Geometry I. M. James,2014-05-16 The Mathematical Works of J. H. C. Whitehead, Volume 1:

Differential Geometry contains all of Whitehead's published work on differential geometry, along with some papers on algebras. Most of these were written in the period 1929-1937, but a few later articles are included. The book begins with a list of Whitehead's works, in chronological order of writing as well as a biographical note by M. H. A. Newman and Barbara Whitehead, and a mathematical appreciation by John Milnor. This is followed by separate chapters on topics such as linear connections; a method of obtaining normal representations for a projective connection; representation of projective spaces; convex regions in the geometry of paths; locally homogeneous spaces in differential geometry; and the decomposition of an infinitesimal group. Also included are chapters on locally homogeneous spaces in differential geometry; Maurer's equations; linear associative algebras; an expression of Hopf's invariant as an integral; and normalizers of transformation groups.

Experimental Sociology of Architecture Guy Ankerl,2013-03-12

BELGIUM Major Manufacturers Directory ,

Differential Geometry R.W. Sharpe,2000-11-21 Cartan geometries were the first examples of connections on a principal bundle. They seem to be almost unknown these days, in spite of the great beauty and conceptual power they confer on geometry. The aim of the present book is to fill the gap in the literature on differential geometry by the missing notion of Cartan connections. Although the author had in mind a book accessible to graduate students, potential readers would also include working differential geometers who would like to know more about what Cartan did, which was to give a notion of espaces généralisés (= Cartan geometries) generalizing homogeneous spaces (= Klein geometries) in the same way that Riemannian geometry generalizes Euclidean geometry. In addition, physicists will be interested to see the fully satisfying way in which their gauge theory can be truly regarded as geometry.

Images in Mobile Communication Corinne Martin,Thilo von Pape,2011-10-03 This volume provides an original perspective on mobile communication, focusing on the emerging deployment of images in mobile phone usage: photography, video, mobile television, mobile internet, etc. Deeply embedded in our audiovisual culture, images possess the undeniable power to reshape the future of the mobile phone as an "individual mass medium". In this collection, European researchers in media and communication studies, sociology, anthropology and political science present empirical and conceptual work on a wide range of issues, including cultural change, new forms of sociability on individual and societal levels, tactics and strategies of users and producers, and finally, representations and imaginaries of the mobile phone in other established media. This book is written for researchers and students of sociology, communication studies and cultural studies as well as for practitioners of interactive media and online communication.

Bulletins Et Mémoires de la Société Médicale Des Hôpitaux de Paris ,1900

Manuel d'aménagement des espaces de conférence et de communication Guido Englich,Burkhard Remmers,2013-03-04

Englich and Remmers provide a comprehensive, analytical, and programmatic introduction to face-to-face communication in the work world. Against the backdrop of globalization, with its dynamic transformations of office environments and worldwide digital networks, they analyze the strategic significance of the various communication processes for organizational and corporate development. They show how the motives and aims of communication, the organizational forms and procedures appropriate in a given case, the size and arrangement of spaces, the required capabilities of furniture and furnishings, and modern communications and media technology all condition and influence one another. Their integrated and user-oriented approach to analysis and planning enables architects, interior designers, and facility managers to foster communication processes, structure them sensibly, and avoid unnecessary friction and needless follow-up costs, all through proper planning.

Hypotheses and Perspectives in the History and Philosophy of Science Raffaele Pisano,Joseph Agassi,Daria Drozdova,2017-11-23 To commemorate the 50th anniversary of his passing (in 2014), this special book features studies on Alexandre Koyré (1892–1964), one of the most influential historians of science of the 20th century, who re-evaluated prevalent thinking on the history and philosophy of science. In particular, it explores Koyré's intellectual matrix and heritage within interdisciplinary fields of historical, epistemological and philosophical scientific thought. Koyré is rightly noted as both a versatile historian on the birth and development of modern science and for his interest in philosophical questions on the nature of scientific knowledge. In the 1940s and 1950s his activities in the United States established a crucial bridge between the European historical tradition of science studies and the American academic environments, and an entire generation of historians of science grew up under his direct influence. The book brings together contributions from leading experts in the field, and offers much-needed insights into the subject from historical, nature of science, and philosophical perspectives. It provides an absorbing and revealing read for historians, philosophers and scientists alike.

Internet : changer l'espace, changer la société Boris Beaud,2012 Internet change notre rapport au temps, mais il transforme également en profondeur notre rapport à l'espace. Aujourd'hui, internet n'est plus seulement un réseau informatique : c'est devenu un espace commun qui occupe une place croissante dans nos pratiques et se généralise à l'ensemble de notre existence. Facebook, Google, Youtube, les sites de vente en ligne et l'économie numérique sont devenus des éléments de notre quotidien. Or, comme pour chaque espace, il est essentiel pour nos sociétés d'organiser et de le partager équitablement Internet. De nombreuses questions se posent alors : qui organise cet espace, ? Qui crée internet ? Y-a-t-il une gouvernance d'internet ? Une régulation d'internet ? A-t-il une limite que l'on peut définir ? Peut-on le réguler, en bloquer l'accès comme on ferme une frontière ? En quoi un tel espace change la société dans son ensemble ? Dans cet ouvrage, Boris Beaud, géographe expert de la dimension spatiale de la télécommunication, démontre que nous devons cesser de considérer Internet comme un monde virtuel et qu'il faut l'aborder comme un espace réel. Grâce à cette approche innovante, il apporte une réponse claire à tous les enjeux d'Internet. Il analyse en profondeur les problématiques posées par l'hybridation de ce nouvel espace avec les territoires, telles que les questions de gouvernance, d'économie, de transaction, de droit, de propriété, de valeur ou de responsabilité. Cet ouvrage apporte un éclairage inédit qui rend les enjeux

d'Internet plus lisibles, pour pouvoir en saisir toutes les opportunités et en maîtriser les dérives. Il fournit des clés pour agir individuellement et collectivement afin que, face à Internet, notre société puisse faire les bons choix et évite le mur vers lequel nous risquons d'aller à grands pas. Sommaire Introduction De quoi Internet est-il l'espace ? Chapitre I Internet est un espace1. De l'espace à la coexistence2- Internet fait gagner de l'espace-temps3- De quoi Internet est-il la virtualité ? Chapitre II Se donner un espace commun1- Les hauts lieux de synchronisation2- Les vertiges de l'hypercentralité3- Géographie de Chrome Chapitre III Nouvel espace, nouvelle société1- Quel est le prix de la gratuité ?2- La capacité distribuée3- La vulnérabilité généralisée4- L'hybridation de l'espace

Mathematical Works: Differential geometry John Henry Constantine Whitehead,1962

Revue Semestrielle Des Publications Mathematiques ,1903

Architecture Francis D. K. Ching,2012-07-16 A superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated *Architecture: Form, Space, and Order* has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment.? Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, *Architecture: Form, Space, and Order* encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.

La planète des esprits Philippe Quéau,2000 Une réflexion, par le philosophe et fondateur du salon Imagina sur les nouvelles images, sur la réalité virtuelle, ses liens avec la réalité réelle, ses implications sur la conception de l'espace, du corps, du visage et sur la notion de bien commun. Il en déduit l'urgence d'une réforme du droit et des lois régissant les nations dans divers domaines pour préserver et exalter l'altérité.

Side@Ways: Mobile Margins and the Dynamics of Communication in Africa Mirjam de Bruijn,Inge Brinkman,Francis Nyamnjoh,2013 Marginality does not mean isolation. In Africa where people are permanently on the move in search, inter alia, of a 'better elsewhere', marginality means disconnection to obvious possibilities and the invisibility of the myriad connections that make life possible for the ordinarily sidestepped. This book is about the workings of networks of the mobile in Africa, a continent usually associated with the 'global shadows' of the world. How do changes in the possibilities for communication, with the recent hype of mobile technology, influence the social and economic dynamics in Africa's mobile margins? To what extent is the freedom associated with new Information and Communication Technologies reality or disillusion for people dwelling in the margins? Are ordinary Africans increasingly Side@Ways? How social are these emergent Side@Ways? Contributions to answering these and related questions are harvested from ethnographic insights by team members of the WOTRO funded 'Mobile Africa revisited' research programme hosted by the African Studies Centre, Leiden, The Netherlands.

Dictionar Technic Poliglot ,1967

L'éclair et le tonnerre, promenades entre l'espace et le temps Bernard Guy (géologue).),2004 Lorsque nous découvrons le monde, l'espace et le temps ne nous sont pas désignés comme tels et nous ne disposons ni de règles ni d'horloges indépendantes de lui. C'est au sein des phénomènes que nous choisissons des points matériels décrétés immobiles entre eux, qui nous permettent de penser et de repérer l'espace, et des points matériels décrétés mobiles par rapport aux premiers, qui nous permettent de penser et de repérer le temps. Ces deux décrets sont interdépendants et contiennent une part irréductible d'arbitraire et de limitation. Ils manifestent un lien fondamental entre les concepts de temps et d'espace, exprimant la signification profonde de la théorie de la relativité. Ce livre regroupe sur cette théorie un ensemble d'essais ouverts à la discussion.
