Advances in Emerging Trends and Technologies Miguel Botto-Tobar, Omar S. Gómez, Raúl Rosero Miranda, Angela Díaz Cadena, 2020-12-18 This book constitutes the proceedings of the 2nd International Conference on Advances in Emerging Trends and Technologies (ICAETT 2020), held in Riobamba, Ecuador, on 26–30 October 2019, proudly organized by Facultad de Informática y Electrónica (FIE) at Escuela Superior Politécnica de Chimborazo and supported by GDEON. ICAETT 2020 brings together top researchers and practitioners working in different domains of computer science to share their expertise and to discuss future developments and potential collaborations. Presenting high-quality, peer-reviewed papers, the book discusses the following topics:
Communicationse-Government and e-Participation
e-Learning
Electronic
Intelligent Systems
Machine Vision
Security
Technology Trends

100 Books that Changed the World Scott Christianson, Colin Salter, 2018-10-26 A chronological survey of the world's most influential books. Many books have become classics, must-reads or overnight publishing sensations, but how many can genuinely claim to have changed the way we see and think? In *100 Books that Changed the World*, authors Scott Christianson and Colin Salter bring together an exceptional collection of truly groundbreaking books – from scriptures that founded religions, to scientific treatises that challenged beliefs, to novels that kick-started literary genres. This elegantly designed book offers a chronological survey of the most important books from around the globe, from the earliest illuminated manuscripts to the age of the ebook publication. Entries include: *The Iliad and The Odyssey*, Homer (750 BC), *Gutenberg Bible* (1450s), *The Quran* (AD 609–632), *On the Revolutions of the Heavenly Spheres*, Nicolaus Copernicus (1543), *Shakespeare's First Folio* (1623), *Philosophiae Naturalis Principia Mathematica*, Isaac Newton (1687), *The Wealth of Nations*, Adam Smith (1776), *The Vindication of the Rights of Woman*, Mary Wollstonecraft (1792), *On the Origin of Species*, Charles Darwin (1859), *Das Kapital*, Karl Marx (1867), *The Interpretation of Dreams*, Sigmund Freud (1899), *The Diary of a Young Girl*, Anne Frank (1947), *Quotations from Chairman Mao Tse-tung* (1964), *A Brief History of Time*, Stephen Hawking (1988).

The Man of the Crowd Scott Peeples, 2020-10-20 We tend to think of Edgar Allan Poe as a loner, living in a world of his own imagination and detached from his physical environment. Poe might seem like a *Nowhere Man*, but of course he was always somewhere - just not at the same address for very long. *The Man of the Crowd* chronicles Poe's rootless life, focusing on the American cities where he lived the longest: Richmond, Baltimore, Philadelphia, and New York. The Poe who emerges in *The Man of the Crowd* is a man whose outlook and career were shaped by his physical environments - mostly urban and almost entirely American. His career was tied closely to the rise of American magazines, so he lived in the cities that produced them and wrote not just stories and poems but journalism and editorials with an urban magazine-reading public in mind. For years he witnessed urban slavery up close, living and working within a few blocks of slave jails and auction houses in Richmond. In Philadelphia, he saw an orderly, expanding city struggling to contain its own violent propensities. And at a time when suburbs were just beginning to offer an alternative to crowded city dwellings, Poe tried living

cheaply on the then-rural Upper West Side of Manhattan and, later, in what is now the Bronx. Though Poe rarely provided local color in his fiction, his urban mysteries and claustrophobic tales of troubled minds and abused bodies reflect his experience living among soldiers, slaves, and immigrants--

Innovation Ecosystems Eunika Mercier-Laurent, 2013-02-07 With innovation fast becoming omnipresent and part of strategic matters, there is a growing need to understand how to jumpstart the innovation process. This book introduces the concept of e-co-innovation, which fosters the successful transition from idea to reality and ultimate value. It provides a global and system overview of the subject and presents various aspects of innovation from different angles and perspectives, leading to an understanding of all ecosystem components, their metamorphoses, cross-influences and possible impacts on the balanced development of people, businesses, regions and countries.

Governance of Urban Sustainability Transitions Derk Loorbach, Julia M. Wittmayer, Hideaki Shiroyama, Junichi Fujino, Satoru Mizuguchi, 2018-04-25 Reading this book will lead to new insights compelling to an international audience into how cities address the sustainability challenges they face. They do this by not repeating old patterns but by searching for new and innovative methods and instruments based on shared principles of a transitions approach. The book describes the quest of cities on two continents to accelerate and stimulate such a transition to sustainability. The aim of the book is twofold: to provide insights into how cities are addressing this challenge conceptually and practically, and to learn from a comparison of governance strategies in Europe and Asia. The book is informed by transition thinking as it was developed in the last decade in Europe and as it is increasingly being applied in Asia. The analytical framework is based on principles of transition management, which draws on insights from complexity science, sociology, and governance theories. Only recently this approach has been adapted to the urban context, and this book is an opportunity to share these experiences with a wider audience. For scholars this work offers a presentation of recent state-of-the-art theoretical developments in transition governance applied to the context of cities. For urban planners, professionals, and practitioners it offers a framework for understanding ongoing developments as well as methods and instruments for dealing with them. The content is potentially appealing to post-graduate and graduate students of environmental management, policy studies, and urban studies programs.

Identity and Status in the Translational Professions Rakefet Sela-Sheffy, Miriam Shlesinger, 2011 This volume contributes to the emerging research on the social formation of translators and interpreters as specific occupational groups. Despite the rising academic interest in sociological perspectives in Translation Studies, relatively little research has so far been devoted to translators' social background, status struggles and sense of self. The articles assembled here zoom in on the "groups of individuals" who perform the complex translating and/or interpreting tasks, thereby creating their own space of cultural production. Cutting across varied translatorial and geographical arenas, they reflect a view of the interrelatedness between the macro-level question of professional status and micro-level aspects of practitioners' identity. Addressing central theoretical issues relating to translators' habitus and role perception, as well as methodological

challenges of using qualitative and quantitative measures, this endeavor also contributes to the critical discourse on translators' agency and ethics and to questions of reformulating their social role. The contributions to this volume were originally published in *Translation and Interpreting Studies* 4:2 (2009) and 5:1 (2010).

Ensure Public Participation World Health Organization, 1979

Collaboration and Co-creation Gaurav Bhalla, 2010-11-02 Today's consumers are more knowledgeable, networked, and vocal. For them consumption is not merely an act of buying products and services, but an expression of their creative potential. Consequently, they are demanding a say and a voice in how companies conceive, develop, and deliver value to them. It is not surprising, therefore, to hear that a large number of companies are transforming how they innovate—not only in terms of developing new products and services, but in how they are created, delivered, and supported to customers. Open Innovation thinking, where companies collaborate with suppliers, distributors, and customers to co-create unique value, is fast replacing traditional thinking that viewed innovation as a proprietary activity and marketing as a static, one-way broadcast. However, while there is significant advocacy and buy-in for collaborating with customers, there is little guidance for companies on how to undertake the journey from applause and appreciation to execution. Only reading about others' success stories – Nike, Hallmark, P&G, Mozilla, etc. – is not sufficient for helping a company develop a blueprint for themselves. In *Customer Driven Innovation*, strategy and branding consultant Gaurav Bhalla presents a concrete framework to help companies systematically and effectively design and implement collaborative innovation programs with their customers that can be applied in both business-to-business and business-to-consumer contexts. The authors describe how today's technologies allow companies to create dynamic dialogues with their customers through shared networks, virtual marketing techniques, and blogs to develop deeper relationships that reinforce brand loyalty and ultimately drive growth. They challenge traditional approaches to market research that measure customer satisfaction from a rear-window perspective, and help companies and their customers look forward instead. P>

Advanced Customization in Architectural Design and Construction Roberto Naboni, Ingrid Paoletti, 2014-12-04 This book presents the state of the art in advanced customization within the sector of architectural design and construction, explaining important new technologies that are boosting design, product and process innovation and identifying the challenges to be confronted as we move toward a mass customization construction industry. Advanced machinery and software integration are discussed, as well as an overview of the manufacturing techniques offered through digital methods that are acquiring particular significance within the field of digital architecture. CNC machining, Robotic Fabrication, and Additive Manufacturing processes are all clearly explained, highlighting their ability to produce personalized architectural forms and unique construction components. Cutting-edge case studies in digitally fabricated architectural realizations are described and, looking towards the future, a new model of 100% customized architecture for design and construction is presented. The book is an excellent guide to the profound revolution taking place within the fields of architectural design and construction, characterized by computational tools, advanced fabrication means and custom-made high-performance architecture.

Competitive Advantage in SMEs Oswald Jones, Fiona Tilley, 2003-04-02 Focusing on how small- and medium-sized enterprises (SMEs) can improve their performance and create and sustain long-term competitive advantage, this text draws upon empirical evidence to illustrate how SMEs can become more innovative through the introduction of new products and services.

Ethics in Higher Education Maureen E. Squires, 2020 Higher education serves many purposes, one of which is to prepare college and university students with the knowledge, skills and dispositions necessary for employment. Some would argue that this is the primary and even sole purpose of collegiate education. However, many also contend that university education is intended to broaden students' minds and enable them to question, investigate and think critically in order to be productive and engaged citizens. Regardless of the lens through which higher education is viewed, within any of these purposes is the need for ethical practices in teaching, learning, student engagement, and overall operational structures. Truly, in every facet of university life, ethical practices exist. If institutions of higher education are the places where, in part, the global future is shaped, then it is imperative that these same organizations be the exemplars of ethical practices. The Practice of Ethics in Higher Education includes chapters that explore and examine topics such as teaching of ethics, ethical practices on campus, ethics of clinical practices, ethics and leadership in the academy, ethics in hiring practices at colleges/universities, ethics and campus-sponsored research, as well as other topics relevant to higher education. In addition to drawing attention to the successes and challenges regarding ethical practices in higher education, this book aims to encourage future research initiatives and collaborations.

Catálogo florístico de Navarra Mikel Lorda López, 2013-12-15 Catálogo florístico de Navarra es la primera obra moderna de su género que cubre el territorio de la Comunidad Foral de Navarra. El catálogo viene estructurado por orden alfabético de familias, y dentro de cada una de ellas, se aplica idéntico criterio al género y a las especies/subespecies. En esta obra se enumeran un total de 3073 taxones de flora vascular, de los que 2796 se consideran propios de la flora navarra actual. De cada uno se da el nombre científico aceptado y sus sinónimos; su estatus de presencia en este territorio; origen y ecología; hábitats de importancia comunitaria en los que se puede encontrar -cuando se trata de un taxon característico-; distribución general, en comarcas geográficas y biogeográficas (regiones Alpina, Atlántica y Mediterránea), en este último caso asignando un índice de frecuencia/abundancia; estatus legal de conservación cuando existe; observaciones de índole taxonómica o nomenclatural, errores de citas, localidades relevantes, presencia en el Catálogo español de especies exóticas invasoras, etc.

Science and Technology Parks and Regional Economic Development Sara Amoroso, Albert N. Link, Mike Wright, 2019-12-11 This book is the first collection of scholarly writings on science and technology parks (STPs) that has an international perspective. It explores concrete ways to systematically collect information on public and private organizations related to their support of and activities in STPs, including incubation to start-up and scale-up, and collaborations with centers of knowledge creation. Rather than perpetuate the qualitative assessment of successful practices, the focus of this book is to present quantitative and qualitative evidence of the impact

of STPs on regional development and to raise awareness on the importance of systematic data collection and analysis. Only through a systematic collection of data on fiscal identification numbers of companies, universities, and university spin-offs will it be possible to conduct current and especially future analyses on the impact of STPs on entrepreneurship, effectiveness of technology transfer, and regional economic development. To this extent, the synergistic views of academics, representatives from STPs, and policy experts are crucial.

A Guide to Open Innovation and Crowdsourcing Paul Sloane, 2011-02-03 Open innovation and crowd sourcing are the hottest topics in strategy and management today. The concept of capturing ideas in a hub of collaboration, together with the outsourcing of tasks to a large group of people or community is a revolution that is rapidly changing our culture. A Guide to Open Innovation and Crowdsourcing explains how to use the power of the internet to build and innovate in order to introduce a consumer democracy that has never existed before. If a business fails to embrace it, it is at risk of being left behind. Written by an international team of eminent thinkers, writers and practitioners in the field, A Guide to Open Innovation and Crowdsourcing covers the definition of open innovation, how to manage virtual teams and co-create with customers, how to overcome legal and IP issues and common mistakes and pitfalls to avoid. With corporate case studies and best practice advice, A Guide to Open Innovation and Crowd Sourcing is a vital read for anyone who wants to find innovative products and services from outside their organizations, make them work and overcome the practical difficulties that lie in the way.

Women in Water Quality Deborah Jean O'Bannon, 2019-06-29 This volume captures the impact of women's research on the public health and environmental engineering profession. The volume is written as a scholarly text to demonstrate that women compete successfully in the field, dating back to 1873. Each authors' chapter includes a section on her contribution to the field and a biography written for a general audience. This volume also includes a significant representation of early women's contributions, highlighting their rich history in the profession. The book covers topics such as drinking water and health, biologically-active compounds, wastewater management, and biofilms. This volume should be of interest to academics, researchers, consulting engineering offices, and engineering societies while also inspiring young women to persist in STEM studies and aspire to academic careers. Features a blend of innovations and contributions made by women in water quality engineering, as well as their path to success, including challenges in their journeys Presents an opportunity to learn about the breadth and depth of the field of water quality Includes a history of women in water quality engineering as well as research in current issues such as urban water quality, biologically-active compounds, and biofilms

Twelve Blocks Jonathan Miller, 2016-11-11 Science Fiction/ Fantasy/ Alien
Territorial Development and Action Research James Karlsen, Miren Larrea, 2016-03-16 Territorial Development and Action Research examines the role of action research within fields such as territorial development and innovation. Most researchers analyse these fields from the outside, developing a theoretical understanding of what should be done, but not of how to do it. Based on their own experience of territorial development processes from the inside out, James Karlsen and Miren Larrea argue that filling the

gap regarding social relations in the innovation process makes it possible for researchers to engage in the processes taking place in the territory, thereby revealing how to make things work. This book will help researchers face the pressure to engage and play a useful role in the development of their host regions. It will help policy makers to continuously learn and redefine policy approaches and bring about collaboration through networks, programs and projects where researchers and practitioners in regional, local and urban development work together to construct territorial development. Readers will acquire a better understanding of micro-territorial development processes and the roles played by individuals and coalitions in endogenous development processes.

SEO Warrior John I Jerkovic, 2009-11-09 How can you make it easier for people to find your website? And how can you convert casual visitors into active users? SEO Warrior shows you how it's done through a collection of tried and true techniques, hacks, and best practices. Learn the nuts and bolts of search engine optimization (SEO) theory, the importance of keyword strategy, and how to avoid and remedy search engine traps. You'll also learn about search engine marketing (SEM) practices, such as Google AdWords, and how you can use social networking to increase your visibility.
