Used in over 400 schools that acquired bulk licenses and personally bought by high school and college students, these apps were listed multiple times as top language arts apps and featured several times in the App Store and other education publications. These iPad and iPhone apps brought critical thinking-based essay writing via mobile devices to students who were never before systematically taught this type of writing.The content from these popular writing apps has been consolidated, re-edited and improved to place more emphasis on the analytical and critical thinking approach that our proprietary content brings to learning how to write well. We also added new services, such as a monthly essay writing instructional digest that keeps students engaged in the writing process. See www.patreon.com/think2write for details.Essay writing is a very effective and practical way to develop higher-order thinking skills because to write a truly fluid, organized essay one has to think critically to write well. Hence, our new name, Think2Write, which describes how we teach students how to write - that is, we first teach students how to analyze and think critically about what they are going to write, before they even pen their first word. The best writers are astute thinkers first, then, as thinkers, they choose their words and become writers.Learning this approach to writing has other benefits far beyond writing essays. By actively incorporating the fundamentals of analytical and critical thinking into the writing process, Think2Write students strengthen their ability to absorb and properly utilize other learned information.Think2Write is the one Kindle eBook every student who writes essays should have on their mobile devices!

Who Said the Mechanics of Essay Writing Can't Be Fun? Francis A. Andrew,2018-10-04 This book is essentially a sequel to Francis A. Andrew's earlier book, "Who Said English Grammar Was Boring?" The "sequel" begins by devoting a few chapters to some grammar points and continues with explanations and examples of twenty three essay types. As well as example essays, each unit provides reading passages which are unrelated to the essay type. The reason for this is to encourage students to read widely and thus to see reading and writing as interconnected and inter-related skills.

Play/Write Douglas Eyman,Andréa D. Davis,2016-04-06 lay/Write: Digital Rhetoric, Writing, Games is an edited collection of essays that examines the relationship between games and writing — examining how writing functions both within games and the networks of activity that surround games and gameplay. The collection is organized based on the primary location and function of the game-writing relationship, examining writing about games (games as objects of critique and sites of rhetorical action), ancillary and instructional writing that takes place around games, the writing that takes place within the game, using games as persuasive forms of communication (writing through games), and writing that goes into the production of games. While not every chapter focuses exclusively on pedagogy, the collection includes many selections that consider the possibilities of using computer games in writing instruction. However, it also provides a bridge between academic views of games as contexts for writing and industry approaches to the writing process in game design, as well as an examination of a variety of game-related genres that could be used in composition courses.

Computer Assisted Writing Instruction in Journalism and Professional Education Frederick Williams,1989-03-13 This incisive study examines the uses of computers and telecommunications in the teaching of writing in the fields of journalism and education. The research, based on the results of a questionnaire submitted to college journalism and communication programs in the United States, focuses on the current and projected use of computers and deals with such innovations as the use of online information services (newswires and archives, encyclopedias, statistical source), computer resident reference aids (thesaurus, dictionaries, style books), networking for instructor and student convenience, and software offering a variety of assists (spelling and grammar checks, readability analyses, stylistic assessments, minor editing suggestion, simulation of research for story writing, and instructor assistance in grading). In addition, the author concludes that desktop publishing will be the next technology-based expansion

of communications curricula, in light of the recent availability of page design layout with provisions for type fonts, graphics, and bidirectional justification. It is often said that the software industry will mature as developers improve in knowledge of their markets; Computer Assisted Writing Instruction in Journalism and Professional Education describes that market and concludes that computer assisted writing instruction is an integral part of professional writing programs with many applications yet to come. It will be of primary value to educators planning, managing, or teaching in computer assisted writing laboratories concentrating on professional training. It will also be immensely useful to educators developing beginning level writing laboratories, and those individuals and companies developing software for writing instruction or textbooks for computer-based courses.
