Ralph Waldo Emerson: Essays and Lectures (LOA #15) Ralph Waldo Emerson,1983-11-15 Our most eloquent champion of individualism, Emerson acknowledges at the same time the countervailing pressures of society in American life. Even as he extols what he called “the great and crescive self,” he dramatizes and records its vicissitudes. Here are all the indispensable and most renowned works, including “The American Scholar” (“our intellectual Declaration of Independence,” as Oliver Wendell Holmes called it), “The Divinity School Address,” considered atheistic by many of his listeners, the summons to “Self-Reliance,” along with the more embattled realizations of “Circles” and, especially, “Experience.” Here, too, are his wide-ranging portraits of Montaigne, Shakespeare, and other “representative men,” and his astute observations on the habits, lives, and prospects of the English and American people. This volume includes Emerson’s well-known Nature; Addresses, and Lectures (1849), his Essays: First Series (1841) and Essays: Second Series (1844), plus Representative Men (1850), English Traits (1856), and his later book of essays, The Conduct of Life (1860). These are the works that established Emerson’s colossal reputation in America and found him admirers abroad as diverse as Carlyle, Nietzsche, and Proust. The reasons for Emerson’s influence and durability will be obvious to any reader who follows the exhilarating, exploratory movements of his mind in this uniquely full gathering of his work. Not merely another selection of his essays, this volume includes all his major books in their rich entirety. No other volume conveys so comprehensively the exhilaration and exploratory energy of perhaps America’s greatest writer. LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation’s literary heritage by publishing, and keeping permanently in print, America’s best and most significant writing. The Library of America series includes more than 300 volumes to date, authoritative editions that average 1,000 pages in length, feature cloth covers, sewn bindings, and ribbon markers, and are printed on premium acid-free paper that will last for centuries.

In Search of a Better World Karl Popper,2012-12-06 'I want to begin by declaring that I regard scientific knowledge as the most important kind of knowledge we have', writes Sir Karl Popper in the opening essay of this book, which collects his meditations on the real improvements science has wrought in society, in politics and in the arts in the course of the twentieth century. His subjects range from the beginnings of scientific speculation in classical Greece to the destructive effects of twentieth century totalitarianism, from major figures of the Enlightenment such as Kant and Voltaire to the role of science and self-criticism in the arts. The essays offer striking new insights into the mind of one of the greatest twentieth century philosophers.

Ralph Waldo Emerson wrote most of his important essays as lectures and speeches first, then revised them for print. His most famous collections of essays are contained in this volume and they were originally published in the 1840's 1841.
