The Dyscalculia Solution Jane Emerson,Patricia Babbie,2014-12-08 This new book by authors Jane Emerson and Patricia Babbie follows on from their award winning book, the Dyscalculia Assessment. Once careful assessment has identified the particular numeracy difficulties your pupils may have, the Dyscalculia Solution provides a practical teaching guide for addressing and solving those difficulties. The Dyscalculia Solution includes step-by-step instructions on how to teach pupils to use whole numbers by talking and reasoning about them, and communicating their thinking in a verbal, diagrammatic and written form. The book includes scripts to emphasise the importance of using the correct language to develop numerical thinking, as well as teaching objectives, activities and games which are important for fostering a positive attitude to numeracy. Each new concept builds on previous understanding so that new facts are derived by reasoning from known facts. The Dyscalculia Solution is ideal for use with primary school children, but can easily be adapted for older students, and is invaluable for SENCOs, TAs, educational psychologists and mainstream teachers, keen to support students with numeracy difficulties in their class. Accompanying materials in both print and electronic formats to support busy teachers by providing lesson plans and worksheets are available with this book.

Real Estate Development Matrix Daniel B Kohlhepp,Kimberly J. Kohlhepp,2018-02-02 This book presents a new way of thinking about, teaching, learning, and practicing real estate development. Real Estate Development Matrix describes the process in a two-dimensional model and presents seven Development Stages which form the horizontal axis, and eight sets of Development Tasks which form the vertical axis to define a 56-cell matrix. In each cell, money is spent and risks are taken to achieve certain tasks and thereby create (or destroy) value. This holistic process considers the entire life cycle of real estate from its green field inception to its brown field state. The book is written by a real estate developer and academic, and the presented material is conceptual, practical, and non-technical. Jargon has been minimized as much as possible as the author introduces an entirely new model for real estate development that is both academically authoritative and developed in practice. It is aimed at a general professional audience participating in the development process, but equally the book is ideal for use as a textbook in undergraduate and graduate courses in real estate development, and an excellent supplemental text for business courses discussing real estate finance and investment. It may also be used as a textbook for professional courses, workshops, or seminars in real estate development. The book is supported by an interactive website at <http://realestatedevelopmentmatrix.com/>
