Statistical Mechanics James Sethna,2006-04-07 In each generation, scientists must redefine their fields: abstracting, simplifying and distilling the previous standard topics to make room for new advances and methods. Sethna's book takes this step for statistical mechanics - a field rooted in physics and chemistry whose ideas and methods are now central to information theory, complexity, and modern biology. Aimed at advanced undergraduates and early graduate students in all of these fields, Sethna limits his main presentation to the topics that future mathematicians and biologists, as well as physicists and chemists, will find fascinating and central to their work. The amazing breadth of the field is reflected in the author's large supply of carefully crafted exercises, each an introduction to a whole field of study: everything from chaos through information theory to life at the end of the universe.

Jazz and Totalitarianism Bruce Johnson,2016-08-12 Jazz and Totalitarianism examines jazz in a range of regimes that in significant ways may be described as totalitarian, historically covering the period from the Franco regime in Spain beginning in the 1930s to present day Iran and China. The book presents an overview of the two central terms and their development since their contemporaneous appearance in cultural and historiographical discourses in the early twentieth century, comprising fifteen essays written by specialists on particular regimes situated in a wide variety of time periods and places. Interdisciplinary in nature, this compelling work will appeal to students from Music and Jazz Studies to Political Science, Sociology, and Cultural Theory.

*La Quarta Filosofia - Volume 0* Valter Cartella,2014-12-06 Siamo entrati in un periodo storico "interessante". L'umanità è giunta a porsi il seguente dilemma: estinguersi o cambiare. È arrivata l'ora di scegliere e non abbiamo molto tempo. Il presente Volume Zero, intitolato "La Via all'Età dell'Oro", è la summa dell'intera collana, "La Quarta Filosofia". L'opera (8 volumi), frutto di anni di lavoro, dimostra "sperimentalmente" che la fisica fondamentale (microcosmo e macrocosmo) ha a che fare con la narrativa, piuttosto che con la scienza. La stessa "santa" Fisica Quantistica, oggi ritenuta la punta di diamante della nostra conoscenza, grazie a quel suo misticismo "indeterminato" (Principio di indeterminazione di Heisenberg) ma poi, quando tratta di cose reali come la free energy, diventa la Fisica del Vorrei Ma Non Posso, per non parlare del fatto che, laddove necessario, non si tira indietro a raccapriccianti trucchi matematici, tutto questo basandosi su fondamentali postulati posticci e alcuni di essi totalmente arbitrari. Siamo stanchi di vedere banchieri, in effetti, al governo, parlarci loro di limiti nelle vesti di chi non è mai stato votato per parlare al popolo. I limiti non esistono. Siamo così convinti di questo che siamo pronti ad adottare un Nuovo Modello Economico totalmente basato sull'individuo neanche sullo Stato e supportato dalla Fisica dell'Etere,

perché si ritornerà all'oro. La Banca Centrale di colpo non avrà più alcun ruolo. Fine della dominazione economica. La Rivoluzione Scientifica è la Fisica dell'Etere scienza per la quale la free energy è l'essenza del suo credo. L'infrastruttura o sistema che per l'estrazione dell'energia, la distribuzione e la trasmissione sarà il Tesla World System (TWS), gioiello tecnologico che creerà anche un'Internet parallela totalmente inviolabile, "segreta come il pensiero", come ebbe a dire il grande Nikola Tesla. Il mondo dell'Età dell'Oro che abbia inizio... Noi tutti siamo stati vittime di un inganno di gigantesche proporzioni. Nulla è quello che sappiamo essere. Il Volume Zero dopo aver presentato la "sintesi" di questo scellerato inganno, passa a proporre "reali" soluzioni (TWS e non solo) per sottrarci alla Fine dei Tempi ormai prossimi. La presente opera porta alla luce scienze e tecnologie "sperimentali" (quindi dimostrabili) eretiche, chiamate da chi le teme pseudo scienze. Il volume zero, attingendo dai libri di dettaglio (Vol. 1 - Vol. 7), descrive, tra i diversi temi, la "Fisica dell'Etere", scienza e tecnologia di Nikola Tesla. Grazie alla Fisica dell'Etere siamo pronti a supportare l'uomo a una nuova ed epocale Rivoluzione Scientifica che lo condurrà all'Età dell'Oro. La filosofia o linea politica da adottare non dovrà essere scritta ma è stata già studiata e praticata ben oltre 2000 anni fa, nientemeno che dal Gesù "storico" e da "Lui" denominata "La Quarta Filosofia". Tale "regale" programma potrà essere attuato sfruttando la potenza della Fisica dell'Etere, già oggi in grado d'oltrepassare l'immaginazione. Se lo vogliamo, l'Età dell'Oro è pronta a sbocciare. Il vero titolo della presente collana è in realtà "La Quarta Filosofia nel Mondo di Nikola Tesla"

**The Moral Uncanny in Black Mirror** Margaret Gibson, Clarissa Carden, 2020-11-05 This erudite volume examines the moral universe of the hit Netflix show Black Mirror. It brings together scholars in media studies, cultural studies, anthropology, literature, philosophy, psychology, theatre and game studies to analyse the significance and reverberations of Charlie Brooker's dystopian universe with our present-day technologically mediated life world. Brooker's ground-breaking Black Mirror anthology generates often disturbing and sometimes amusing future imaginaries of the dark side of ubiquitous screen life, as it unleashes the power of the uncanny. This book takes the psychoanalytic idea of the uncanny into a moral framework befitting Black Mirror's dystopian visions. The volume suggests that the Black Mirror anthology doesn't just make the viewer feel, on the surface, a strange recognition of closeness to some of its dystopian scenarios, but also makes us realise how very fragile, wavering, fractured, and uncertain is the human moral compass.

Networking Tatiana Bazzichelli, 2009-02 Networking means to create nets of relations, where the publisher and the reader, the artist and the audience, act on the same level. The book is a first tentative reconstruction of the history of artistic networking in Italy, through an analysis of media and art projects which during the past twenty years have given way to a creative, shared and aware use of technologies, from video to computers, contributing to the creation of Italian hacker communities. The Italian network proposes a form of critical information, disseminated through independent and collective projects where the idea of freedom of expression is a central theme. In Italy, thanks to the alternative use of Internet, during the past twenty years a vast national network of people who share political, cultural and artistic views has been formed. The book describes the evolution of the Italian hacktivism and net culture from the 1980s till today. It builds a reflection on the new role of the artist and author who becomes a networker, operating in collective nets, reconnecting to Neoavant-garde practices of the 1960s (first and foremost Fluxus), but also Mail Art, Neoism and Luther Blissett. A path which began in BBSes, alternative web platforms spread in Italy through the 1980s even before the Internet even existed, and then moved on to Hackmeetings, to Telestreet and networking art by different artists such as 0100101110101101.ORG, [epidemic], Jaromil, Giacomo Verde, Giovanotti Mondani Meccanici, Correnti Magnetiche, Candida TV, Tommaso Tozzi, Federico Bucalossi, Massimo Contrasto, Mariano Equizzi, Pigreca, Molleindustria, Guerriglia Marketing, Sexyshock, Phag Off and many others.

Reconstructing Ancient Landscape Sofia Pescarin, 2009 This book serves as an up-to-date manual

for the ever evolving discipline of digital landscape reconstruction, and shows how digital tools can be used in the interpretation of archaeological data related to past landscapes. It draws on the work of the Italian National Research Councils Lab in Virtual Heritage, illustrating its points with case studies from their research.

**Radical Media** John D. H. Downing, 2000-08-18 This is an entirely new edition of the author's 1984 study (originally published by South End Press) of radical media and movements. The first and second sections are original to this new edition. The first section explores social and cultural theory in order to argue that radical media should be a central part of our understanding of media in history. The second section weaves an historical and international tapestry of radical media to illustrate their centrality and diversity, from dance and graffiti to video and the internet and from satirical prints and street theatre to culture-jamming, subversive song, performance art and underground radio. The section also includes consideration of ultra-rightist media as a key contrast case. The book's third section provides detailed case studies of the anti-fascist media explosion of 1974-75 in Portugal, Italy's long-running radical media, radio and access video in the USA, and illegal media in the dissolution of the former Soviet bloc dictatorships.
