**News as Entertainment** Daya Kishan Thussu,2008-01-09 Thussu brings to this project the passion for news of a socially committed former journalist, the political economy of his international relations education and a formidable assembly of global detail, examining the recent explosion of 'infotainment'. - John Downing, Southern Illinois University Thussu's account of war as infotainment, the Bollywoodization of news and the emergence of a global infotainment sphere is as compelling as it is alarming. This is a significant and essential book for anyone interested in exploring the connections between news journalism, informed citizenship and democracy. - Bob Franklin, The Cardiff School of Journalism, Media and Cultural Studies Richly detailed and empirically grounded, this first book-length study of infotainment and its globalization by a leading scholar of global communication, offers a comprehensive and critical analysis of this emerging phenomenon. Going beyond - both geographically and theoretically - the 'dumbing down' discourse, largely confined to the Anglo-American media, the book argues that infotainment may have an important ideological role, a diversion in which 'soft news' masks the hard realities of neo-liberal imperialism. Chapters include a historical appraisal of infotainment; the infrastructure for its globalization as well as coverage of recent wars on television news as high-tech infotainment and the growing synergies between Hollywood and Bollywood-originated infotainment. A 'global infotainment sphere' is emerging, the book argues, within which competing versions of news - from 24/7 news networks to bloggers - coexist. Accessible, engagingly written and robustly argued, the book combines analyses of theoretical debates on infotainment with extensive and up-to-date comparative data.

Remote Control Shoma Munshi,2012-12-15 What do the TV shows we're watching tell us about ourselves? Television is the single most powerful and dynamic agent of change in India today. It is also the country's most popular and accessible form of entertainment. Remote Control examines three kinds of programming—24x7 news, soap operas and reality shows—that have changed Indian television forever, and analyzes how these three genres, while drawing on different sources, are hybridized, indigenized and manage to ultimately project a distinctively Indian identity. Shoma Munshi's book shows us how everyday reality in India in the twenty-first century shapes television; and how television, in turn, shapes us.

Relocating Television Jostein Gripsrud,2012-07-26 For over half a century, television has been the most central medium in Western democracies – the political, social and cultural centrepiece of the public sphere. Television has therefore rarely been studied in isolation from its socio-cultural and political context; there is always something important at stake when the forms and functions of television are on the agenda. The digitisation of television concerns the production, contents, distribution and reception of the medium, but also its position in the overall, largely digitised media system and public sphere where the internet plays a decisive role. The articles in this comprehensive collection are written by some of the world's most prominent scholars in the field of media, communication and cultural studies, including critical film and television studies. Relocating Television offers readers an insight into studying television alongside the internet, participatory media and other technocultural phenomena such as DVDs, user-generated content and everyday digital media production. It also focuses on more specific programmes and phenomena, including The Wire, MSN, amateur footage in TV news, Bollywoodization of TV news, YouTube, fan sites tied to e.g. Grey's Anatomy and X Factor. Relocating Television will be highly beneficial to both students and academics across a wide range of undergraduate and postgraduate courses including media, communication and cultural studies, and television and film studies.

**“A Sociological Study of Patterns of Televiewing”** Dr. BABAN M. CHOUDHARI (Researcher) ,Dr. (Mrs) SUNANDA BIRE (Supervisor), During the past decade, the number of television receivers per home has skyrocketed, with many children each having a TV set in their bedroom. Through cable and satellite access, families have a choice of a hundred or more channels, most broadcasting twenty-four hours a day. The videotape recorder has enabled viewers to delay watching or to rewatch television programs at any time and thereby shift the traditional viewing hours to virtually any time of the day. The research studies directed at these phenomena have confirmed, however, that little effect has been seen in children's viewing habits. There was simply more of the same programming fare and it was available through a broader time frame. The distribution of television sets into various areas of the home and the less traditional hours of availability have, if anything, reduced the opportunities for parental coviewing and control. The V-chip was predicted to enhance the ability of parents to exercise such control, but appears to have been a failure with many parents not even aware of the existence of such a device.

**Political Campaigning in Digital India** Anil M. Varughese,Holli A. Semetko,2024-06-28 This book provides a conceptual toolkit to understand the changing technologies and dynamics of political campaigning in

India. Examining political campaigning and party strategies across many Indian states, with special attention to regional politics, histories, cultures, social and technological contexts, the book discusses the potential impacts of campaign strategies on electoral outcomes. Political campaigning reached a tipping point with millions of social media users engaging online with family and friends, political issues, parties and candidates in India’s 2019 parliamentary election. Although India’s political parties had been working with consultants and professional advertising agencies for decades, by 2019, millions of first-time voters as well as older voters were microtargeted with campaign messaging by parties and their affiliates, including frequent misinformation from unknown sources supporting one party or another. Filling a key gap in political communication research on election campaigns in digital India, the chapters in this book capture how political campaigning is important for the electoral fortunes of political parties in India’s diverse regions and states. This book will appeal to students, scholars, and practitioners in political communication, public administration, and political consulting, as well as anyone interested in data-driven political campaigning. It will also be an invaluable reading for those interested in South Asian studies. This book was originally published as a special issue of South Asian History and Culture.
