Key Questions in Considering a Value-Added Tax for Central and Eastern European Countries Sijbren Cnossen, 1991-07-01 In the course of introducing a market-oriented tax system, most Central and Eastern European countries are actively considering the merits of a value-added tax (VAT). This paper examines a wide range of social, economic, structural, and administrative issues that are pertinent to the introduction of a VAT. These issues have regard to the burden distribution of the VAT, its effect on the price level and economic growth, as well as the coverage of the tax, the definition of the base, and the choice of the rate structure. Various legal and administrative aspects are also reviewed. The paper draws on the experience with value-added taxation of the member states of the European Community (EC) and other countries that belong to the Organisation for Economic Cooperation and Development (OECD).

*The Anatomy of the VAT* Mr. Michael Keen, 2013-05-16 This paper sets out some tools for understanding the performance of the value added tax (VAT). Applying a decomposition of VAT revenues (as a share of GDP) to the universe of VATs over the last twenty years, it emerges that developments have been driven much less by changes in standard rates than by changes in 'C-efficiency' (an indicator of the departure of the VAT from a perfectly enforced tax levied at a uniform rate on all consumption). Decomposing C-efficiency into a 'policy gap' (in turn divided into effects of rate differentiation and exemption) and a 'compliance' gap (reflecting imperfect implementation), results pieced together for EU members suggest that the former are in almost all cases far larger than the latter, with rate differentiation and exemptions playing roles that differ quite widely across countries.

*Fundamentals of EU VAT Law* Ad van Doesum, Herman van Kesteren, 2016-07-21 Value added tax (VAT) is responsible for generating approximately €903 billion per year in tax revenues across the European Union – revenues that play a huge role in budgetary policymaking in the Member States. This extremely useful book provides not only a thorough description of the current state of EU VAT law, but also a detailed explanation of the system's rationale and its legislative provisions. It puts the elements of the system in perspective and shows how they are linked to each other. The focus lies on the rules which can be deduced from the sources of EU VAT law and on their application in practice. The systematic presentation covers such issues and topics as the following: • sources of EU VAT law, including principles derived from CJEU case law; • principles underlying the EU VAT system; • relations among the layers of VAT law – primary and secondary EU law, national law; • how to apply the VAT legislation and case law; • allocation of taxing rights (place of supply rules); • invoicing requirements and other administrative obligations; • exemptions, VAT rates and the taxable amount; • the right of deduction of input VAT; • intra-Community transactions, importation and exportation; • immovable property; and • how far a national court must and can go in interpreting national provisions in the light of the VAT Directive and the principles underlying the VAT system. The book follows the structure of the VAT Directive/VAT determination scheme, with additional topical chapters on immovable property, intra-Community transactions, and importation and exportation of goods. With its detailed attention to the meaning and interpretation of each legislative provision and court ruling, this book serves as an incomparable guide for practitioners. Its emphasis on the rationale and systematics of the EU VAT system make it an indispensable reference for all tax law professionals and researchers.

**The EU VAT System and the Internal Market** Rita de La Feria, 2009 This thesis focuses upon VAT in the context of the Community's internal market. Its central aim is to prove that the current EU VAT system is incompatible with the concept of internal market as set out in the EC Treaty and interpreted by the Court of Justice. The study commences with an analysis of the concept of internal market, the main objective of which is to establish the basic legal framework for the proposed thesis. As part of this examination, it is demonstrated that the EC Treaty creates a temporally unlimited obligation for the Community to approve legislation with the aim of establishing and improving the functioning of the internal market. By analysis of existing EU VAT jurisprudence, it is argued that obstacles cannot be overcome through incremental developments emerging from the Court of Justice, but can only be resolved by fundamental and substantive legislative amendment.

*Value-added Tax* George N. Carlson, 1980 This report examines the European Economic Community experience with the value-added tax and draws lessons regarding U.S. adoption of a VAT.

Value-Added Taxes in Central and Eastern European Countries A Comparative Survey and Evaluation OECD, European Union, 1998-10-09 This study offers a comparative evaluation of the main features of the VAT systems between the ten countries of Central and Eastern Europe and provides a commentary on the development of the VAT systems in line with the VAT legislation of the EU.

**The Value-added Tax** Henry J. Aaron, Brookings Institution, 1981 Monograph of conference papers providing a comparison of value added tax experiences and fiscal policy issues in six Western European countries – discusses transition to VAT and current structures, tax collection, income distribution effects, economic implications for consumer expenditure, consumer prices, trade, investment, etc., and lessons for the USA. References and statistical tables. List of participants. Conference held in Washington 1980 Oct.

**E-commerce and EU VAT** Rosamund Barr et al., 2021-07-12 E-commerce and EU VAT: Theory and Practice Rosamund Barr, Jeroen Bijl, Nils Bleckman, Gijsbert Bulk, Ethan Ding & Matthias Luther The new EU rules governing online sales of goods and services affect all businesses that sell online to EU customers, no matter where the seller is based. This timely book, written by leading tax professionals from various EU countries, is the first to clearly explain the VAT compliance obligations and options that businesses and tax practitioners worldwide must understand in order to adapt to the new system. In addition to describing the legal framework, the authors provide examples of how the rules work in practice and illustrate available choices for businesses, with particular attention to avoiding pitfalls. Thoroughly describing the rules affecting place of supply, liability, and accounting procedures in all relevant contexts, the book covers such areas of VAT compliance as the following: • distinction between goods and services; • differences between imported goods and goods sold intra-EU; • filing and invoicing obligations under the new one-stop shop scheme; • reclaiming foreign VAT; • mitigating fears of fraud and hijacking; • distinction between business-to-customer and business-to-business transactions; and • navigating through appeals, mistakes, and adjustments. Also covered are the particular VAT variations applicable to transactions involving the major European non-EU states – Norway, Switzerland, and the United Kingdom. The important distinction between the concept of 'nexus' in the United States state and local tax rules and 'place of supply' under EU law is also fully explored. Because a very large number of remote sellers of goods and services will need to understand and comply with the changes in the EU VAT e-commerce rules, it goes without saying that this book is indispensable to in-house corporate counsel worldwide. Tax administration officials, professionals in indirect tax management, corporate tax and finance directors and other tax professionals, and academics concerned with indirect tax law are sure to welcome this essential resource.

**VAT in the European Community** Alan Buckett, 1992 An introductory guide to the single market transitional VAT regime which is to commence 1 January 1993, along with a country-by-country analysis of the basic features of the EC VAT systems which were in effect on 1 April 1992. Each chapter includes the following topics: scope of the tax, tax rates, tax invoices, place of supply, registration, importation procedures, input tax deduction, administration, appeals, the relationship between VAT and other taxes and VAT refund procedures. However, the material does not include the amendments to national legislation enacted to conform national law to Directive 91/680/EEC.

**Value-added Taxes in Central and Eastern European Countries** Centre for Co-operation with Non-members, 1998 This is the first study of the Value-Added Tax (VAT) systems of the ten countries of Central and Eastern Europe preparing for integration into the European Union (EU).

Consumption Tax Trends Organisation for Economic Co-operation and Development,1995 This new study charts the rise of VAT since 1965, looks at differences between countries in both rates and the goods and services included in the tax base, and considers the problems encountered in administration.

**The Efficiency of VAT Implementation** William Jack,1996-07 This paper presents calculations of the efficiency with which value-added taxes are collected in five transition economies in Central and Eastern Europe. Actual VAT revenues in 1994 are compared with those that would have resulted if the statutory VAT rates had been applied without any revenue leakage. The five countries fall into two broad groups, one exhibiting relatively high collection efficiency, and the other relatively low efficiency. While lack of detailed information on tax rules and consumption patterns makes definitive conclusions difficult, the impact of exemptions is shown to likely strengthen the comparative results.

*VAT Indicators* Alexandre Mathis,2004

**Taxation Trends in the European Union** Eurostat,2007 This report contains a detailed statistical and economic analysis of the tax systems of the Member States of the European Union and Norway. The data are presented within a unified statistical framework (the ESA95 harmonised system of national and regional accounts), which makes it possible to assess the heterogeneous national tax systems on a fully comparable basis. The standard classifications of tax revenues (by major type of tax or by level of government) presented in most international tax revenue statistics are hard to interpret in economic terms. This publication stands out for offering a breakdown of tax revenues by economic function (i.e. according to whether they are raised on consumption, labour or capital). This classification is based on disaggregated tax data and on a breakdown of the revenue from the personal income tax. In addition, the report contains indicators of the average effective tax burden on consumption, labour and capital. Country chapters give an overview of the tax system in each of the 28 countries covered, the revenue trends and the main recent policy changes. Detailed tables allow comparison between the individual countries and European averages. Data cover the 1995-2005 period and are presented both as a percentage of GDP and as a percentage of total taxation.

Value Added Tax Alan A. Tait,1988-06-15 This book, by Alan A. Tait, is an examination of VAT. It looks at problems and theoretical options and potential impacts, as well as detailing the practical aspects of implementing new tax structures. The author advances arguments for and against alternative policies and illustrates his study with international examples from Europe, Latin America, Asia, and the Pacific. He suggests that countries can learn from each other's experiences with VAT.

Towards an [unlawful] Modernized EU VAT Rate Policy R. de la Feria,2017 In late 2015, the European Commission announced a monumental U-turn on Value Added Tax (VAT) rates policy. After decades of advocating the benefits of harmonization of VAT rates across the EU Member States, and after many failed legislative attempts at achieving it, the Commission declared its intention to do the opposite, namely to disharmonize VAT rates across Europe. The announcement was followed by a VAT Action Plan, and a public consultation on the reform of VAT rates, which, under the guise of modernization and consistency with the destination principle, presented two options for reform, both of which would give Member States further freedom and flexibility in the application of reduced rates. Against this background, the aim of this article is not to restate the benefits of VAT rate harmonization, but to assess whether the EU has legislative competence to approve disharmonizing VAT legislation. The article concludes that Article 113 TFEU could not be used as a legal basis for a Directive aimed at disharmonizing VAT rates, and that any such Directive, would lack legal basis and, consequently, be unlawful under the EU constitutional principle of conferral of powers.

**European VAT and the Sharing Economy** Giorgio Beretta,2019-10-24 A breadth of new digital platforms has dramatically expanded the range of possibilities for exchanging anything required by business or personal needs from accommodation to rides. In the virtual marketplaces shaped and ruled by these novel matchmakers, rather than by a single centralized entity, value is created through the granular interaction of many dispersed individuals. By allowing instantaneous and smooth interaction among millions of individuals, platforms have indeed pushed the digital frontier farther and farther, so as to include within it even services once not capable of direct delivery from a remote location such as accommodation and passenger transport. Legal disruption is also underway with foundational dichotomous categories, such as those between suppliers and customers, business and private spheres, employees and self-employed, no longer viable as organizational legal structures. This is the essential background of the first book to relate what is synthetically captured under the umbrella definition of ‘sharing economy’ to key features at the core of European Value Added Tax (EU VAT) and to look at the feasibility of a reformed EU VAT system capable of addressing the main challenges posed by these new models of production, distribution and consumption of goods and services. Specifically, the study analyses five legal propositions underpinning the current EU VAT system as the following: taxable persons; taxable transactions; composite supplies; place of supply rules; and liability regimes for collection and remittance of VAT. Exploration of these five legal propositions is meant to assess the practical feasibility of shoehorning the main sharing economy business models – notably, those available in the accommodation and passenger transport sectors – into the framework of existing EU VAT provisions. The author further draws on the normative standards of equality, neutrality, simplicity, flexibility and proportionality to test the ‘reflexes’ of the current EU VAT system in the sharing economy domain. Opportunities for reform of the current EU VAT system are in turn evaluated with each chapter including cogent proposals in the form of incremental and targeted amendments to the current EU VAT provisions. As the first comprehensive analysis of the treatment of the sharing economy for VAT purposes, the book provides not only a theoretical framework for future studies in the tax field but also indispensable practical guidance for VAT specialists confronting daily with the many challenges ushered in by the sharing economy. Moreover, the various solutions and recommendations advanced in the book offer valuable insights to international and national policymakers dealing with similar issues under other VAT systems.
