E-commerce and EU VAT Rosamund Barr et al., 2021-07-12 E-commerce and EU VAT: Theory and Practice Rosamund Barr, Jeroen Bijl, Nils Bleckman, Gijsbert Bulk, Ethan Ding & Matthias Luther The new EU rules governing online sales of goods and services affect all businesses that sell online to EU customers, no matter where the seller is based. This timely book, written by leading tax professionals from various EU countries, is the first to clearly explain the VAT compliance obligations and options that businesses and tax practitioners worldwide must understand in order to adapt to the new system. In addition to describing the legal framework, the authors provide examples of how the rules work in practice and illustrate available choices for businesses, with particular attention to avoiding pitfalls. Thoroughly describing the rules affecting place of supply, liability, and accounting procedures in all relevant contexts, the book covers such areas of VAT compliance as the following: • distinction between goods and services; • differences between imported goods and goods sold intra-EU; • filing and invoicing obligations under the new one-stop shop scheme; • reclaiming foreign VAT; • mitigating fears of fraud and hijacking; • distinction between business-to-customer and business-to-business transactions; and • navigating through appeals, mistakes, and adjustments. Also covered are the particular VAT variations applicable to transactions involving the major European non-EU states – Norway, Switzerland, and the United Kingdom. The important distinction

between the concept of 'nexus' in the United States state and local tax rules and 'place of supply' under EU law is also fully explored. Because a very large number of remote sellers of goods and services will need to understand and comply with the changes in the EU VAT e-commerce rules, it goes without saying that this book is indispensable to in-house corporate counsel worldwide. Tax administration officials, professionals in indirect tax management, corporate tax and finance directors and other tax professionals, and academics concerned with indirect tax law are sure to welcome this essential resource.

Rethinking EU VAT for P2P Distribution Cristina Trenta, 2015-09-24 Peer-to-peer (P2P) networks – decentralized group structures allowing anyone to easily download and share resources online – already play a critical role in the distribution of digital content. Most of the debate on P2P heretofore has focused on copyright issues. However, as the basis for legitimate business models a number of companies have already quietly embraced, P2P has a largely unknown and underestimated impact on taxation, with vast repercussions on the development of mature, profitable markets. This book analyses the current framing for digital and media supplies provided via P2P technologies through the lens of an interdisciplinary approach drawing on tax law, computer science, economics, copyright law, and business studies. VAT concepts such as those of economic activity and taxable person, taxable transactions, consideration, barter and taxable amount, and territoriality rules are

discussed in connection with P2P, as is the evaluation of VAT liability for P2P operations in the presence of copyright infringement. Topics and issues considered include: - centralized and decentralized P2P networks; - free-riding problems; - identifying actors in P2P networks for VAT purposes; - P2P and place of supply; and - pros and cons of integrating P2P with taxation regimes and especially VAT systems. The analysis draws on a vast range of sources, including EU legislation and case law, tax law literature and doctrine, international conventions and treaties, Council of Europe and OECD documents, ECHR case law, and official documents and cases from key jurisdictions worldwide, offering the first thoroughly grounded approach to overcoming the lack of understanding and awareness of ongoing changes currently separating the digital economy and traditional taxation systems, and a solid platform for discussion to the diverse communities of researchers and professionals interested in P2P.

European VAT and the Sharing Economy Giorgio Beretta, 2019-10-24 A breadth of new digital platforms has dramatically expanded the range of possibilities for exchanging anything required by business or personal needs from accommodation to rides. In the virtual marketplaces shaped and ruled by these novel matchmakers, rather than by a single centralized entity, value is created through the granular interaction of many dispersed individuals. By allowing instantaneous and smooth interaction among millions of individuals, platforms have indeed pushed the digital frontier farther and farther, so as

to include within it even services once not capable of direct delivery from a remote location such as accommodation and passenger transport. Legal disruption is also underway with foundational dichotomous categories, such as those between suppliers and customers, business and private spheres, employees and self-employed, no longer viable as organizational legal structures. This is the essential background of the first book to relate what is synthetically captured under the umbrella definition of 'sharing economy' to key features at the core of European Value Added Tax (EU VAT) and to look at the feasibility of a reformed EU VAT system capable of addressing the main challenges posed by these new models of production, distribution and consumption of goods and services. Specifically, the study analyses five legal propositions underpinning the current EU VAT system as the following: taxable persons; taxable transactions; composite supplies; place of supply rules; and liability regimes for collection and remittance of VAT. Exploration of these five legal propositions is meant to assess the practical feasibility of shoehorning the main sharing economy business models – notably, those available in the accommodation and passenger transport sectors – into the framework of existing EU VAT provisions. The author further draws on the normative standards of equality, neutrality, simplicity, flexibility and proportionality to test the 'reflexes' of the current EU VAT system in the sharing economy domain. Opportunities for reform of the current EU VAT system are in turn evaluated with each chapter including cogent proposals in

the form of incremental and targeted amendments to the current EU VAT provisions. As the first comprehensive analysis of the treatment of the sharing economy for VAT purposes, the book provides not only a theoretical framework for future studies in the tax field but also indispensable practical guidance for VAT specialists confronting daily with the many challenges ushered in by the sharing economy. Moreover, the various solutions and recommendations advanced in the book offer valuable insights to international and national policymakers dealing with similar issues under other VAT systems.

The EU VAT System and the Internal Market Rita de La Feria, 2009 This thesis focuses upon VAT in the context of the Community's internal market. Its central aim is to prove that the current EU VAT system is incompatible with the concept of internal market as set out in the EC Treaty and interpreted by the Court of Justice. The study commences with an analysis of the concept of internal market, the main objective of which is to establish the basic legal framework for the proposed thesis. As part of this examination, it is demonstrated that the EC Treaty creates a temporally unlimited obligation for the Community to approve legislation with the aim of establishing and improving the functioning of the internal market. By analysis of existing EU VAT jurisprudence, it is argued that obstacles cannot be overcome through incremental developments emerging from the Court of Justice, but can only be resolved by fundamental and substantive legislative amendment.

Fundamentals of EU VAT Law Ad van Doesum, Herman van Kesteren, 2016-07-21

Value added tax (VAT) is responsible for generating approximately €903 billion per year in tax revenues across the European Union – revenues that play a huge role in budgetary policymaking in the Member States. This extremely useful book provides not only a thorough description of the current state of EU VAT law, but also a detailed explanation of the system's rationale and its legislative provisions. It puts the elements of the system in perspective and shows how they are linked to each other. The focus lies on the rules which can be deduced from the sources of EU VAT law and on their application in practice. The systematic presentation covers such issues and topics as the following:

- sources of EU VAT law, including principles derived from CJEU case law;
- principles underlying the EU VAT system;
- relations among the layers of VAT law – primary and secondary EU law, national law;
- how to apply the VAT legislation and case law;
- allocation of taxing rights (place of supply rules);
- invoicing requirements and other administrative obligations;
- exemptions, VAT rates and the taxable amount;
- the right of deduction of input VAT;
- intra-Community transactions, importation and exportation;
- immovable property; and
- how far a national court must and can go in interpreting national provisions in the light of the VAT Directive and the principles underlying the VAT system.

The book follows the structure of the VAT Directive/VAT determination scheme, with additional topical chapters on immovable property, intra-Community transactions, and

importation and exportation of goods. With its detailed attention to the meaning and interpretation of each legislative provision and court ruling, this book serves as an incomparable guide for practitioners. Its emphasis on the rationale and systematics of the EU VAT system make it an indispensable reference for all tax law professionals and researchers.

Taxing Consumption in the Digital Age Katharina Artinger, 2020-10-16 Die Digitalisierung hat enorme Auswirkungen auf die Grundidee der Mehrwertsteuer: den Austausch von Leistungen für Konsumzwecke. Die Dissertation konzentriert sich auf den Austausch von scheinbar kostenlosen Online-Dienstleistungen und die Zustimmung der Kunden zur Verwertung ihrer persönlichen Daten. Diese können der Mehrwertsteuer unterliegen, wobei die Bemessungsgrundlage auf Grundlage der Anbieterkosten berechnet werden muss. Die Ergebnisse basieren auf einer Analyse der EU-Mehrwertsteuer als Verbrauchsteuer im Vergleich zu anderen theoretischen Konsummodellen. Auch andere digitale Geschäftsmodelle, wie die Sharing Economy oder Bitcoins, können unter die Idee der EU-Mehrwertsteuer als Verbrauchsteuer subsumiert werden. Information Asymmetries in EU VAT Frank J.G. Nellen, 2016-04-24 Unlike conventional direct taxes, the application and administration of value-added tax (VAT) depends to a considerable extent on the exchange of information

between the taxable person and his transaction counterparts. In practice, the taxable person often fails to obtain necessary information from his transaction counterparts, giving rise to information asymmetries that can induce VAT assessments, sanctions, and audits. In its up-to-date overview of European Union (EU) VAT law, this book assesses legislation, case law, and practice at EU and national levels, in the process of examining how to minimize the risks and negative consequences associated with information asymmetries. As a result of his in-depth treatment of the subject, the author establishes the following: – to what extent information asymmetries in EU VAT have legal implications (e.g., VAT assessments, fines) for the taxable person; – to what extent information asymmetries should have legal implications for the taxable person, taking into account the legal principles applicable in EU VAT; – to what extent positive EU VAT law indeed implies the risk of information asymmetries and any associated unjustified legal implications; and – to what extent legal remedies should be employed to avoid or to reduce information asymmetries for the taxable person. This is the first book to conduct thorough research into the causes and legal implications of information asymmetries, as well as the instruments which can be employed to counter their materialization. As such, it will be of inestimable value to practitioners, legislators, policymakers, entrepreneurs, judicial professionals, and academics concerned with EU VAT law.

A Guide to the European VAT Directives Julie Kajuś, Ben J. M. Terra, 1993

VAT in the EU Nancy Cruickshanks, Marc Welby, 2011-05-01 VAT in the EU offers a country by country guide on all 27 EU member states. Each country has its own system with rules and regulations varying widely between different countries and jurisdictions. Businesses, especially those operating internationally, need practical strategies to help confront the growing challenges of complying with and managing indirect taxes. Each chapter addresses the main considerations for the international tax professional impacting VAT in a given country. Written by Nancy Cruickshanks, a VAT specialist and partner at Shipley's AGN, in conjunction with contributors from other AGN firms, this comprehensive title enables practitioners to help their clients drive indirect tax costs out of their supply chain, as well as give better advice on more tax-efficient structures impacting offshoring and outsourcing. The text also covers such areas as: * Structured indirect tax planning* Supply-chain review and planning* Registration, fiscal representation and agency services* Optimisation of indirect tax accounting * Mergers and acquisitions

VAT in a Day Adrianus Johannes Doesum, F.J.G. Nellen, 2021

VAT in a Day. A Concise Overview of the EU VAT System Adrianus Johannes Doesum, F.J.G. Nellen, 2013 This book serves as an introduction to the current EU Value Added Tax system. It provides a concise overview of the working of EU VAT and the concepts and rationale behind it. The goal of this book is to enable the reader obtaining a basic knowledge of the EU VAT system, or to refresh his or hers memory within a day's work. Hence, this book is titled: 'Vat in a day'. Even though the book covers all aspects of the EU Vat system, some elements are discussed in more details than others. Didactically sound choices were made as regards the depth at which the various subjects in this book are discussed. Nevertheless, the book provides an account of the key providers in the VAT Directive and the key case law of the Court of Justice of the European Union in the field of VAT.
