The European Union Dean J. Kotlowski,2000 Contains 14 essays, drawn from the lectures of the Baker Conference at Ohio University, exploring the European Union from its launch by French statesman Jean Monnet in 1950 to recent EU economic and security developments. Contributors include North American and European scholars of law, history, economics, and comparative literature. Annotation copyrighted by Book News Inc., Portland, OR

Explaining Euro-Paralysis J. Zielonka,2015-12-22 This book is about Europe's apparent inability to cope with the complex international environment. Why does the Union fail to create a workable (sound) Common Foreign and Security Policy? Five distinct explanations for Euro-paralysis are considered, focusing on power politics, the assertion of national interests, misguided institutional designs, a crisis of modern democracy, and the post-Cold War conceptual confusion.

The Economic Consequences of the Euro Stefan Kawalec,Ernest Pytlarczyk,Kamil Kamiński,2019-12-05 This book presents a new narrative on the Eurozone crisis. It argues that the common currency has the potential to kill the European Union, and the conventional wisdom that the Eurozone can be fixed by a common budget and further political integration is incorrect. The authors address key questions such as why the European Union and the single market have been successful, why the common currency poses a threat to European integration, and whether it is possible to either fix the Eurozone or dissolve it while keeping the EU and the single market. Contrary to the view that it would be best if the Southern European countries left the Eurozone first, the book makes the case that the optimal solution would be to start the process with the most competitive countries exiting first. The authors argue that a return to national currencies would be beneficial not only to the crisis-ridden southern countries, but also to France and Germany, which were the main promoters of the single currency. An organised unwinding of the Euro area would be beneficial both for the European economy and for Europe's main trading partners. The authors contend that to defend the Euro at all costs weakens the European economy and threatens the cohesion of the European Union. If pro-European and pro-market EU leaders do not dismantle the Eurozone, it will most likely be done by their anti-European and anti-market successors. If that happens, the European Union and the common market will be destroyed. This book will be a useful and engaging contribution to the existing literature in the fields of macro, monetary and international finance and economics--

**The Remaking of the Euro-Mediterranean Vision** Aybars Görgülü,Gülsah Dark Kahyaoglu,2019 The findings and policy recommendations presented in the book aim to contribute to making EU policies more responsive to major challenges in the region, more flexible on the multilateral and the bilateral level and more inclusive of key stakeholders.

Saving Europe Carlo Bastasin,2012-03-08 Three times in the few years since the global financial crisis erupted, the euro has come close to extinction, endangering both the world economy and history's most ambitious project in shared sovereignty. Yet each time, the case for a common currency proved to be more compelling than its weaknesses, and the euro survived. Saving Europe reveals how the nexus of international economics and national politics pushed monetary union to the brink of a breakup, how that disastrous development was avoided, and why the long-term viability of a common currency challenges politics as we know it. Carlo Bastasin reveals and analyzes what has been happening behind the scenes in European negotiations since the financial crisis began with the collapse of major financial institutions in 2008. He argues that the crisis in the euro zone actually has a political origin, having emerged from the self-interested abuses of national politics. Moreover, the crisis is reinforced even now by the obstinate defense of national prerogatives in politics and finance as well as by the lack of commitment for shared or supranational sovereignty. While the prevalent view is that monetary union was a flawed project from the start and is in need of amending, Bastasin shows that the failures have to do almost entirely with national opportunism—not only in Greece but in most countries, including Germany—and concludes that the crisis will lead to Europe's political union. Bastasin's work is an engrossing historical chronicle, interweaving moments of high drama with individual personalities on the world stage. German Chancellor Angela Merkel, French President Nicolas Sarkozy, and national and European central bankers, among others, play key roles. Saving Europe is also a rigorous attempt to make larger sense of what has happened in the euro zone and what might happen next. Given the central importance of Europe within the fragile world economy as well as growing speculation that the euro might disappear, this is essential reading for anyone trying to grasp international economics and politics. Just as important, it is a compelling tale of people, personalities, power, and money. There is no other book like it.

The Barcelona Process Alvaro Vasconcelos,George Joffe,E. George H. Joffé,2000 This volume takes a critical look at the problems faced by the Barcelona Process and the likelihood of its success.

**Euro-Mediterranean Relations After September 11** Annette Jünemann,2004 A comprehensive study of the nexus between democratization and security in the Mediterranean, which are seen as essentially complementary yet threatened by political trends witnessed since the September 2001 attacks. Contributors from a variety of European and Mediterranean countries address the impact of a restructured security system, Europe's effort to establish an autonomous security and defence policy, and attempts among the Mediterranean Partner Countries (MPCs) to build regional security regimes.

The Euro-Mediterranean Partnership Richard Gillespie,1997 While some contributions provide overviews, others examine key partners (Spain, Morocco, Egypt), for national interests and ambitions have surfaced repeatedly. This is one of the first assessments of the Euro-Mediterranean Partnership, focusing primarily on its political and economic dimensions.

The Periphery of the Periphery Dimitar Bechev,European Council on Foreign Relations,2012 Next July Croatia will become the 28th EU member, but as Europe struggles to deal with the euro crisis, has any further enlargement into the Western Balkans frozen to a halt? Although the temptation for the EU is to adopt a 'wait and see' strategy, the stability of the status quo may prove deceptive. There is a silent pact between the enlargement-fatigued and crisis-hit EU member states and rent-seeking Balkan elites who do not mind slowing the pace of reform, with a 'fire-brigade' approach to periodic crises and outbursts of violence in Kosovo and elsewhere. But in a new ECFR paper, The periphery of the periphery: the Western Balkans and the euro crisis,Dimitar Bechev warns that a failure to deliver transformation in the region would hurt EU credibility in other regions, like the Middle East and former Soviet Union. He argues that: The EU must shift its focus from a narrative based upon security, to one based upon the economy. A Greek exit would send shockwaves through the Western Balkan economies already weakened by the euro crisis, and threaten an economic meltdown -- Stagnation and rising unemployment (especially among the young) wipe out support for the type of reformist policies that the EU supports. The popularity of the EU in the Western Balkans has declined markedly in some areas, as 'Eurorealism' takes over from 'Europhilia' -- Reform remains essential. The Western Balkans are also struggling to cope with the crisis thanks to domestic policy failures, highlighting that 'Europeanisation' needs to be accompanied by deeper transformation. In good times the EU exported prosperity to the Balkans; now in a time of crisis it is exporting instability. The EU needs to restore a sense of momentum towards enlargement and put pressure on under-performing governments. If not ambitious powers like Russia, Turkey and China will fill the gaps. Key facts: Montenegro opened accession talks on 29th June and hopes to join the EU in a decade -- Serbia was upgraded to candidate status back in March 2012 -- Bosnia may submit a membership application this year, after its 16 month wait for a state level government ended in February 2012 -- Kosovo began a visa liberalisation dialogue with the European Commission on 19th January 2012 -- 2/3 of Western Balkans trade is with the EU--Publisher's description.

**Enlarging the Euro Area** Kenneth H. F. Dyson,2023 Offering in-depth and systematic analysis of the challenges of the Euro Area and the eastward enlargement of the EU, this book focuses in particular on how the prolonged process of accession to the Euro Area is affecting domestic economic policies in the accession states of east central Europe.
