Alan Marvell, Peter Hayward

Media Management and Live Experience Alex Connock, 2024-04-03 Global and authoritative, this textbook maps modern, live experience media, the categories that thrive on real-time engagement and human connection - even in the age of synthetic content, AI and the Metaverse. Sports and sports betting, festivals, comedy, concerts, tours and theme parks are covered - plus theatre, trade events, conventions, museums and galleries, and immersive media. Live media events included are Burning Man, Glastonbury, the Indian Premier League, the English Premier League, Olympics, NBA and Bundesliga - plus sell-out Taylor Swift tours, the World Cup, Super Bowl, Ryder Cup and Formula One. Business models in this media category start with ticketing and advertising - now amplified with ecommerce, affiliate marketing, subscription and gambling transactions. Deep dives ask: Why is Saudi Arabia investing billions into golf and football? Why is standup comedy big in Nigeria? How are Broadway and the West End evolving? What do immersive technologies like Abba Voyage and the MSG Sphere offer for the future? With class questions, a quiz, summaries and slides for each chapter, this is a guide and course structure for anyone at university level or in industry studying the media, music, entertainment, events, exhibitions, sports, social media or gambling industries.

Gods and Rollercoasters Crispin Paine, 2019-01-10 This worldwide study examines how religion gets into theme parks - as mission, as an aspect of culture, as fable, and by chance. Gods and Rollercoasters analyses religion in theme parks, looking at how it relates to modernism, popular culture, right-wing politics, nationalism, and the rise of the global middle class. Crispin Paine argues that religion has discovered a major new means of expression through theme parks. From the reconstruction of Biblical Jerusalem at the Holy Land Experience in Orlando, through the world of Chinese mythology at Haw Par Villa in Singapore, to the great temple/theme park Akshardham in New Delhi, this book shows how people are encountering and experiencing religion in the context of fun, thrills and leisure time. Drawing on examples from six of the seven continents, and exploring religious traditions including Christianity, Daoism, Buddhism, Hinduism and Islam, Gods and Rollercoasters provides a significant contribution to the study of religion, sociology, anthropology, and popular culture.

The Out-of-Home Immersive Entertainment Frontier Mr Kevin Williams, Mr Michael Mascioni, 2014-06-28 Digital Out of Home Entertainment is transforming the customer experience in shops, cinemas, museums; almost any environment where consumers are congregating. This book provides a 'state of play' exploration of the successes, the emerging new applications and the strategies that inform them--and is an essential guide for entertainment executives as well as those involved in retailing, the hotel industry, mobile communications, museums and heritage.

Staging the Past Judith Schlehe, Michiko Uike-Bormann, Carolyn Oesterle, Wolfgang Hochbruck, 2014-03-31 Popular representations of history are taking on new forms and reaching wider audiences. The search for usable pasts is branching out into active appropriations of history such as historical theme parks, housing developments, and live-action role play. Drawing on themed environments across the continents, the articles in this volume focus on how these appropriations bypass, are different from, or even contradict traditional as well as scientific modes of disseminating historical knowledge. Bringing together theorists and practitioners, they provide the basis for an interdisciplinary as well as a transcultural theory of how pasts are staged in various social contexts.

Funworld, 2009

More Than a Music Box Andrew Crisell, 2006 Since the rise of television, much radio consists of 'capsule' news and music formats which are heard as background to other activities. However the medium offers a great deal more. This collection of essays shows how in North America, the United Kingdom, Europe, Australia and the South Pacific,

radio continues to provide distinctive forms of content for the individual listener, yet also enables ethnic and cultural groups to maintain their sense of identity. Ranging from radio among the primordial communities to digital broadcasting and the internet, these essays suggest that the benefits and gratifications which radio confers remain unique and irreplaceable in this multi-media age.

Key Concepts in Theme Park Studies Florian Freitag, Filippo Carlà-Uhink, Salvador Anton Clavé, 2023-03-03 This book offers a comprehensive, multidisciplinary introduction to theme parks and the field of theme park studies. It identifies and discusses relevant economic, social, and cultural as well as medial, historical, and geographical aspects of theme parks worldwide, from the big international theme park chains to smaller, regional, family-operated parks. The book also describes the theories and methods that have been used to study theme parks in various academic disciplines and reviews the major contexts in which theme parks have been studied. By providing the necessary backgrounds, theories, and methods to analyze and understand theme parks both as a business field and as a socio-cultural phenomenon, this book will be a great resource to students, academics from all disciplines interested in theme parks, and professionals and policy-makers in the leisure and entertainment as well as the urban planning sector.

Roland Mack Benno Stieber, 2015-06-25 »Play hard, work hard.« The inversion of the well-known expression has become a motto for Roland Mack, founder of Germany's largest theme park. Europa-Park breaks all existing records. Children as well as adults are thrilled by spectacular roller coaster rides, magic shows and the experience of an idyllic world, created with love. But what, or rather who, is behind all this? Benno Stieber presents a unique account of the entrepreneur of a family business, while casting a glance behind the colourful scenery of a theme park – glittering, exciting and a little mysterious.

Exploring Interconnectedness Katja Gorbahn, Erla Hallsteinsdóttir, Jan Engberg, 2023-06-22 This volume explores the socio-cultural and media background of a critical and ongoing political challenge: the complex entanglement between European integration and strong national agendas in the context of globalisation. It does so using

educational media - both textbooks and digital media - as sites of cultural contestation to enquire into the intricate relationships around national and European identities and aspects of students' knowledge and reception. Using a variety of methods and technologies, the chapters analyse identity constructions present in educational media discourses, embedded as they are in their national and European contexts and as both the catalysts and products of their time. The book is a study of the post-digital condition in an educational context, exploring the potential of digital humanities and linguistic approaches for educational media research and employing methods such as eye-tracking or concept maps.

Examining Internet and Technology around the World Laura M. Steckman, 2020-12-02 This book offers comparative insights into the challenges and opportunities surrounding emerging technology and the internet as it is used and perceived throughout the world, providing students with cross-cultural and cross-national perspectives. The United Arab Emirates has a national goal of colonizing Mars by 2117, and China seeks to modernize its entire manufacturing process to produce cutting-edge technologies and research advances by 2025. How are other countries using the internet and emerging technologies to their advantage? This volume in the Global Viewpoints series examines 10 issues pertaining to the internet and technology, including access and censorship, alternative energy technologies, artificial intelligence, autonomous robots, cyberbullying, cybercrime, e-learning, GMOs, online privacy, and virtual and augmented reality. For each topic, the volume features eight country-level perspectives that span the world to allow for comparisons of different nations' specific approaches to the technology or issue. This encyclopedia takes a new direction in understanding the importance and impact of emerging technologies on the world, showing that even when experiencing similar technologically related challenges or advances, these technologies do not form one-size-fits-all solutions for every nation and population. Even when nations develop similar technologies, human dimensions—from policy to social norms to culture—influence people and society across the world differently.
