*Eastern European Railways in Transition* Henry Jacolin, 2016-04-29 During the nineteenth century, railway lines spread rapidly across Europe, linking the continent in ways unimaginable to previous generations. By the beginning of the twentieth century the great cities of the continent were linked by a complex and extensive rail network. Yet this high-point of interconnectivity, was abruptly cut-off after 1945, as the Cold War built barriers - both physical and ideological - between east and west. In this volume, leading transport history scholars take a fresh look at this situation, and the ramifications it had for Europe. As well as addressing the parallel development of railways either side of the Iron Curtain, the book looks at how transport links have been reconnected and reconfigured in the twenty years since the reunification of Europe. In particular, it focuses upon the former communist countries and how they have responded to the challenges and opportunities railways offer both nationally and internationally. Including contributions from historians, researchers, policy makers, representatives of railway companies and railway museum staff, the essays in this collection touch upon a rich range of subjects. Divided into four sections: 'The Historical Overview', 'Under Russian Protection', 'After the Fall of the Iron Curtain', and 'The Heritage of Railways in Eastern Europe' the volume offers a broadly chronological introduction to the issue, that provides both a snap-shot of current debates and a starting point for further research. It concludes that in an era of increased globalisation and interconnectivity - and despite the rise of air and road transport and virtual methods of communication - railways still have a crucial role to play in the development of a prosperous and connected Europe.

*EU Railway Policy-Making* H. Dyrhaug, 2013-09-18 Through policy and intervention national governments in Europe have long held an active interest in railways, an interest that has transferred to the supranational level via the EU commission. This book explores why the EU Commission has been so slow in creating an EU railway policy, pointing the finger at strong resistance by national governments

*The Golden Age of European Railways* Christian Wolmar, 2013 One of the most important developments in European history, the railways helped create the social and economic fabric of the continent. In the 'Golden Age' of the railways, from the late nineteenth century to the early twentieth, there was no more exciting, exotic or desirable way to travel. As the major railway companies quickly became huge industrial powers in their own right, they began to influence the infrastructure of trade, industry, agriculture and settlement. In some countries the bulk of the railway network was centralized under state control, while in others corporate and personal fortunes were won and lost as railway fever spread far and wide. Crossing stunning landscapes, linking the continent's great cities, and bringing natural wonders within the reach of ordinary people, the railways encouraged the growth of tourism industry, which in turn spurred the development of dramatic poster art. All these aspects of the early decades of European railway history are explored in this elegant, lavishly illustrated volume. The social, economic, environmental and technological challenges and achievements are all covered, together with highlights of the routes and the experiences of eager train passengers. The Golden Age of European Railways contains more than three hundred contemporary illustrations as well as route maps, schedules, technical appendices, and the fascinating perspectives of a team of award-winning writers and acknowledged railway experts.

**Rail Economics, Policy and Regulation in Europe** Matthias Finger, Pierre Messulam, 2015-09-25 The European railway sector has undergone profound and predominantly institutional changes over the past 20 years, due to the initiatives of the European Commission. This book constitutes a first systematic assessment and account of the recent transformations of the industry along a series of critical yet contentious issues such as competition, unbundling, regulation, access charging, standards and interoperability, and public-private partnerships. It also covers the main railways sectors including passenger transport, high speed and freight.
