**Building Industries at Sea - 'Blue Growth' and the New Maritime Economy** Kate Johnson,Ian Masters,Gordon Dalton,2022-09-01 Throughout the world there is evidence of mounting interest in marine resources and new maritime industries to create jobs, economic growth and to help in the provision of energy and food security. Expanding populations, insecurity of traditional sources of supply and the effects of climate change add urgency to a perceived need to address and overcome the serious challenges of working in the maritime environment. Four promising areas of activity for 'Blue Growth' have been identified at European Union policy level including Aquaculture; Renewable Energy (offshore wind, wave and tide); Seabed Mining; and Blue Biotechnology. Work has started to raise the technological and investment readiness levels (TRLs and IRLs) of these prospective industries drawing on the experience of established maritime industries such as Offshore Oil and Gas; Shipping; Fisheries and Tourism. An accord has to be struck between policy makers and regulators on the one hand, anxious to direct research and business incentives in effective and efficient directions, and developers, investors and businesses on the other, anxious to reduce the risks of such potentially profitable but innovative investments.The EU H2020 MARIBE (Marine Investment for the Blue Economy) funded project was designed to identify the key technical and non-technical challenges facing maritime industries and to place them into the social and economic context of the coastal and ocean economy. MARIBE went on to examine with companies, real projects for the combination of marine industry sectors into multi-use platforms (MUPs). The purpose of this book is to publish the detailed analysis of each prospective and established maritime business sector. Sector experts working to a common template explain what these industries are, how they work, their prospects to create wealth and employment, and where they currently stand in terms of innovation, trends and their lifecycle. The book goes on to describe progress with the changing regulatory and planning regimes in the European Sea Basins including the Caribbean where there are significant European interests. The book includes:• Experienced chapter authors from a truly multidisciplinary team of sector specialisms• First extensive study to compare and contrast traditional Blue Economy with Blue Growth• Complementary to EU and National policies for multi-use of maritime space

ETINED - Volume 1 - 7th Session of the Prague Forum Council of Europe,2016-11-01 A quality education must be free of corruption! Further to the clear political commitment made by the European Ministers of Education at the Helsinki Ministerial Conference in April 2013, the Council of Europe launched its Platform on Ethics, Transparency and Integrity in Education, ETINED. ETINED is a network of specialists representing the 50 States Parties to the European Cultural Convention, which carries out initiatives at European, regional and national level to take effective action against corruption and encourage all the relevant stakeholders in society to commit fully to a set of fundamental ethical principles for public and professional life. This publication reflects the discussions held at the 7th Session of the Prague Forum and provides strong evidence of the drive in Europe to promote high quality, corruption-free education based on common ethical principles. Offering many national examples and good practice in this area, it also raises several issues relating to the ethical behaviour of all education players, academic integrity and plagiarism, and the problem of the recognition of qualifications obtained by distance and online learning. It also covers how ETINED came into being, how it has developed and how it is applied in various countries.

**The EU Political System After the 2019 European Elections** Olivier Costa,Steven Van Hecke,2022-11-22 This book assesses the impact of the May 2019 European elections as well as the Covid-19 pandemic on the EU's politics, institutions, and policies. Special attention is paid to the impact of these events on the different political forces as well as on the Union's institutional balance, its priorities and the reform of its budget and policies. Because of the many post-electoral uncertainties, the book also takes into account how the relations between the Parliament, the European Council and the new Commission have developed. Furthermore, it analyses the capacity of the von der Leyen Commission to implement an ambitious programme, especially in the context of an unfolding pandemic. The objective of this book is to study the 2019 electoral sequence (parliamentary elections, appointment of EU institutions leaders, investiture of the Commission, new legislative programme) and determine its influence on the main institutional and political challenges for the 2019-2024 legislature. In other words, the volume deals with the question of who holds the EU's leadership after the 2019 elections and how it handles the 2020-2021 pandemic.

**Rights of Nature in Europe** Jenny García Ruales,Katarina Hovden,Helen Kopnina,Colin D. Robertson,Hendrik Schoukens,2024-04-09 This book addresses the recognition of the Rights of Nature (RoN) in Europe, examining their conceptualisation and implementation. RoN refers to a diverse set of legal developments that seek to redefine Nature's status within the law, gradually emerging as a novel template for environmental protection. Countries like Ecuador and New Zealand, each with distinct histories and ways of dwelling in the world, have pioneered a new era in environmental governance by legally acknowledging rights or personhood for nature, ecosystems, and more-than-human populations. In recent years, Europe has witnessed growing interest in RoN, with academic, legislative, and political initiatives gaining momentum. A significant development is the September 2022 passage of a law in the Spanish Parliament, granting legal personhood and rights to the Mar Menor, a saltwater lagoon severely affected by environmental degradation. Given the diversity in interpretations and articulations of 'Rights of Nature', this edited volume argues that their arrival in Europe fosters different kinds of interactions across distinct areas of law, knowledge, practices, and societal domains. The book employs a multidisciplinary approach, exploring these interactions in law and policy, anthropology, Indigenous worldviews and jurisprudence, philosophy, spiritual traditions, critical theory, animal communication, psychology, and social work. This book is tailored for scholars in law, political science, environmental studies, anthropology and cultural studies; as well as legal practitioners, NGOs, activists and policy-makers interested in ecology and environmental protection.
